SUBJECT: Request for Extension of SNM 33 to Include A
New Storage Facility

REFERENCE: Original Request Dated April 16, 1960
Our Letters of June 15 and June 24, 1960

Gentlemen:

Thank you for your letter of July 13, 1960 transmitting
our amended license number SNM 33.

We are currently evaluating the economics of the installation of an emergency power supply for our high level gamma alarm system and emergency lighting. Meanwhile, so that our license may be amended to include the subject storage facility, we will not move material in, out or within the storage facility in the event a power failure should deactivate the gamma alarm system. It is understood that this restriction will be removed at the time an emergency power supply is added to the gamma alarm system. We will of course keep you advised of our action on this matter.

We will appreciate an early reply from you so that we may incorporate this facility into our operation. Please do not hesitate to call collect should any questions on this application remain.

Respectfully yours,

MALLINCKRODT NUCLEAR CORPORATION
