Mallinckrodt
FINE CHEMICALS
Manufactured since 1847

ST. LOUIS, 7 MO

AIR MAIL

Dear Mr. Johnson:

We recently completed an order for the Argentine Government for the conversion of UF_6 to U_3O_8 . Following completion of this job and collection and purification of the residues, it was determined that we had remaining at the Hematite Plant 1168 grams of contained U with an assay of 19.71%. This material was originally allocated to the Division of International Affairs.

This letter is a formal request for an allocation to cover this amount of material which we propose to use in our plant for research and development purposes or to transfer to others who have allocations for such material for similar purposes.

Since the material is now being leased by Mallinckrodt, we are requesting early action on this request to determine whether or not we may retain the material at the Hematite Plant or have to return it to the AEC for cancellation of lease charges. If you have any questions, do not hesitate to call us collect.

Very truly yours,

MALINCKRODT CHEMICAL WORKS
