Docket No. 50-353

License No. NPF-85

U.S. Nuclear Regulatory Commission  
Attn: Document Control Desk  
Washington, DC 20555

SUBJECT: Licensee Event Report  
Limerick Generating Station - Unit 2

This LER reports a non-compliance with a specific provision of the Fire Protection Program for Unit 2. The electrical power to two motor operated valves was not removed during start-up following a planned maintenance outage. These valves are required to be closed and de-energized to protect a high/low pressure system interfaces in the event of a fire in certain areas of the plant. This resulted in a failure to meet a License Condition for Unit 2.
