OCT 2 | 1985

SUBJECT: COMANCHE PEAK STEAM ELECTRIC STATION DOCKET NOS. 50-445 AND 50-446 AUXILIARY FEEDWATER SYSTEM QA FILE: CP-85-32, SDAR-193

Dear Mr. Denise:

On August 27, 1985, we verbally notified your Mr. T. Westerman of a deficiency regarding the potential loss of control capability of the feedwater regulating valve due to the valve's power supply being located in the cable spread room. We have submitted an interim report logged TXX-4567, dated September 24, 1985.

We have completed our investigation and concluded that the matter is not reportable under 10 CFR 50.55(e). Records supporting this determination are available for your inspector's review at the CPSES site.

Very truly yours,

W. G. Counsil
