

October 23, 1985

Docket No. 50-275

Pacific Gas and Electric Company
77 Beale Street
Room 1451
San Francisco, California 94106

Attention: Mr. J. D. Shiffer, Vice President
Nuclear Power Generation, Licensing

Gentlemen:

This letter will acknowledge receipt of your August 30, 1985 letter to Mr. John B. Martin that transmitted the scenario manual for the 1985 Diablo Canyon Power Plant Emergency Preparedness Exercise to be held October 30, 1985.

On September 11, Mr. K. Prendergast of my staff contacted Mr. Brian Giffin and discussed with him and other members of your staff some improvements to the scenario. Mr. Giffin also clarified a number of issues from our review. A conference call was held on October 22, 1985, and at the conclusion of this call, it appeared that all of the NRC comments on the scenario had been adequately addressed by the licensee. It is our understanding that the minor changes suggested, along with any other changes made between now and the date of the exercise, will be provided to the NRC team members prior to the exercise. In addition, during a recent contact, FEMA Region IX indicated that they were satisfied with the scenario.

It is our conclusion that the scenario package with the minor agreed to changes is adequate to permit you to meet the exercise objectives contained in your July 26, 1985 submittal.

Sincerely,

8510300057 851023
