

ILLINOIS POWER COMPANY

CLINTON POWER STATION, P.O. BOX 678, CLINTON, ILLINOIS 61727

August 5, 1985

Docket No. 50-461

Mr. Harold R. Denton, Director
Office of Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Subject: Clinton Power Station Unit 1
FSAR Amendment No. 34

Dear Mr. Denton:

Illinois Power Company (IPC) hereby files Amendment No. 34 dated July, 1985 for the Clinton Final Safety Analysis Report (CPS-FSAR). FSAR Amendment No. 34 presents changes that update and clarify information. These changes are summarized on the attached pages.

Much of this material has been previously sent to the NRC Staff in 5 submittals made over the last two months. This has been noted on the attached summary of changes. The remaining changes, with two exceptions, should not impact the Safety Evaluation Report conclusions. The two exceptions, which will require additional staff review, are IPC's commitment to the AWS D1.3 welding standard, which is in Section 3.10, and the revision to Section 11.4 describing the Solid Radwaste System.

Three (3) signed originals and fifty (50) copies are furnished for amending the FSAR sets provided to NRC per 10CFR50.30.

Sincerely yours,

D. P. Hall
Vice President
