CLEVELAND ELECTRIC ILLUMINATING COMPANY, ET AL.
(Perry Nuclear Power Plant, Units 1 and 2)
Docket Nos. 50-440 OL, 50-441 OL

Dear Members of the Appeal Board:

For your information I am forwarding to you a Memorandum recently issued by the Commission's Emergency Preparedness Branch, OIE, concerning the emergency planning conditions contained in the Concluding Partial Initial Decision issued September 4, 1985 in this proceeding.

Sincerely,

Colleen P. Woodhead
Counsel for NRC Staff

MEMORANDUM FOR: B. Joe Youngblood, Chief
Licensing Branch #1
Division of Licensing
Office of Nuclear Reactor Regulation

FROM: David B. Matthews, Chief
Emergency Preparedness Branch
Division of Emergency Preparedness
and Engineering Response
Office of Inspection and Enforcement

SUBJECT: PERRY ATOMIC AND SAFETY LICENSING BOARD CONDITIONS
RELATED TO OFFSITE EMERGENCY PREPAREDNESS

Our input to the Perry SER dated September 26, 1985, addressed the Atomic Safety and Licensing Board (ASLB) hearing on emergency preparedness. We indicated that two of the four ASLB conditions stated in the concluding partial initial decision of September 3, 1985, had been met and that our evaluation of the Federal Emergency Management Agency's (FEMA's) response regarding the two remaining conditions would be provided in a future supplement to the SER.

Enclosed for your information is FEMA's status report on the two remaining ASLB conditions. FEMA reports that the conditions have not been completely resolved, however, final resolution in all areas is anticipated by November 27, 1985. When FEMA advises us that all actions are complete, we will provide our evaluation of FEMA's response in a future supplement to the SER prior to operation above 5% of rated power.

SUBJECT: Perry Atomic Safety and Licensing Board
Conditions Related to Offsite Emergency
Preparedness

Attached is a status report on the two remaining offsite emergency preparedness licensing conditions for the Perry Nuclear Power Plant (NPP). These conditions were identified in the Perry Atomic Safety and Licensing Board's (ASLB) Concluding Partial Initial Decision issued on September 3, 1985.

On September 25, 1985, your office requested the Federal Emergency Management Agency (FEMA) to provide the Nuclear Regulatory Commission (NRC), by October 15, 1985, with a status report on two licensing conditions related to offsite preparedness. The conditions arose from the following two contentions: (1) There are no letters of agreement regarding the availability of school buses (Contention Q); and, (2) reception centers do not have the means or facilities for handling contaminated property (Contention U).

FEMA Region V staff contacted the Ohio Disaster Services Agency (ODSA) to determine the current status. The information provided by ODSA is contained in the attached memorandum with attachments from FEMA Region V. Following the Region's submittal of the status report to FEMA Headquarters, ODSA provided the enclosed follow-up written confirmation, dated October 11, 1985. While the conditions have not been totally resolved, the State has informed FEMA that (1) copies of the letters of agreement will be provided to FEMA Region V by November 27, 1985; (2) all personnel performing emergency response duties in the care centers will be trained by November 20, 1985; and, (3) equipment and personnel decontamination kits are being assembled and will be in the care centers by November 15, 1985.

FEMA Region V will monitor the progress of these scheduled actions and notify FEMA Headquarters when these actions have been completed.

If you have any questions, please contact Mr. Robert S. Wilkerson, Chief, Technological Hazards Division, at 646-2861.

Wallace J. Weaver, Chief
Technological Hazards Branch

Subject: Perry Atomic Safety and Licensing Board Conditions Related
to Offsite Preparedness.

The following information represents the status of the two remaining offsite emergency preparedness licensing conditions (contentions Q and U) issued by the Atomic Safety and Licensing Board (ASLB) in their September 3, 1985 Concluding Partial Initial Decision regarding emergency planning for the Perry Nuclear Power Plant.

(1) Status relative to contention Q: "There are no letters of agreement regarding the availability of school buses."

The Ohio Disaster Services Agency (ODSA) reports that all letters of agreement referred to by the plans for use of school buses to evacuate personnel are to be signed by the appropriate officials by November 1, 1985. ODSA anticipates that they will have received and reviewed each of these documents for inclusion into the plans by November 20, 1985. Copies of these letters will be furnished to FEMA by November 27, 1985.

(2) Status relative to contention U: "Reception Centers do not have the means or facilities for handling contaminated property."

For the purpose of this report, status is reported in two areas: Training and Equipment.

Training:

ODSA indicated to FEMA Region V staff recently that each care center (including decontamination functions in these areas) will be staffed with a minimum of four (4) staff members which have received at least 16 hours of certified instrumentation training. In addition, each center will have at least three (3) personnel which have received training in the procedures for the decontamination of personnel and equipment. ODSA reports that all the personnel performing emergency response duties in the care centers have been or will have been trained by November 20, 1985. Attachment 1 is a projection of this training schedule.

Equipment:

Each care center will be provided with a kit containing the necessary supplies to effectively decontaminate personnel and another kit with the items necessary to decontaminate equipment. The state has indicated that these kits are being assembled and that each care center will receive these kits by November 15, 1985. See attachment 2 Equipment and Personnel Decontamination Lists.

FEMA Region V will continue to monitor the progress of these actions to resolve these concerns and will advise FEMA Headquarters when the actions taken have been completed.

October 11, 1985

Mr. Robert Shapiro
F.B.M.A., Region V
74 N. Washington St.
Battle Creek, MI 49016

Dear Bob:

I have included with this correspondence several documents showing the information you requested on September 24, 1985.

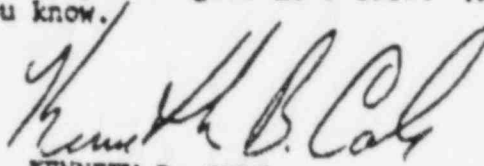

The Care Center Listing included shows the total number of people trained in the 16 hour instrumentation program. As a minimum, four people per Care/Decon Center must receive this training. As you will see, three departments do not have a sufficient number of personnel trained at this time. The Ashtabula Twp. Fire Department and Middlefield Fire Department are scheduled to participate in the course offered on 7 OCT 85. We are currently in the process of scheduling a 16 hour course for the Conneaut Fire Department. This training will be completed prior to November 15, 1985. The column identified as "Decon SOP Trained" shows few people trained to date. The training course is 4 hours in length and includes specific actions to be taken at the care center. As the training schedule shows, each department requiring the course will receive it prior to November 15. There are three exceptions; they are Willowick, Newbury and Bainbridge.

You also requested an inventory of supplies available at each care center. I have provided two lists showing both the personnel decontamination kit and the equipment decontamination kit. There will be one of each of these located at every care center. The equipment kit will be used for the decontamination of vehicles while the personnel kit will be for use inside the care center for evacuees. Please note, there may be a change in the quantity of items 21, 22, 23 & 24 in the equipment decontamination kit. The number of these items will probably be revised.

Concerning the Letters of Agreement required by Contention Q, I have been assured that all letters will be signed by November 1, 1985. Presently I have complete copies of the Geauga County Letters of Agreement. I expect to have copies of all letters by November 20th and will provide them to you by November 27, 1985.

I personally feel that all contentions will be satisfied by mid November. A tremendous amount of effort has been put forth by the counties involved and the utility to meet this target date.

If you need additional information, please give me a call. And if any conditions change, I'll let you know.

A handwritten signature in dark ink, appearing to read "Kenneth B. Cole". The signature is fluid and cursive, with the first name "Kenneth" and last name "Cole" being more prominent than the middle initial "B".

KENNETH B. COLE
Nuclear Operations Officer
