

March 22, 1972

F. J. Long, Senior Reactor Inspector (Construction)
Region II, Division of Compliance

INSPECTOR'S EVALUATION - GEORGIA POWER COMPANY (ALVIN W. VOGTLE - UNITS
1, 2, 3 and 4), LICENSE PENDING, DOCKET NOS. UNASSIGNED

This memorandum refers to Report Nos. 50/72-1 for the initial management
meeting held on March 6, 1972.

The initial management meeting was held as planned. All agenda items
were presented and discussed with the GPC management present for the
meeting.

GPC was requested to make two copies of their QA manual available for
our use.

The plant layout will be done by both SSI and Bechtel; however, the
detail design will be done by Bechtel at the Norwalk, California office.
The field constructor has not been chosen.

No problems are foreseen in accomplishing the forthcoming QA audits.
