Gentlemen:

This refers to the routine safety inspection conducted by Messrs. Z. Falevits and R. Mendez of this office on July 22-25, 1985, of activities at Braidwood Nuclear Power Station, Units 1 and 2, authorized by NRC Construction Permits No. CPPR-132 and No. CPPR-133 and to the discussion of our findings with Mr. T. Quaka and others of your staff at the conclusion of the inspection.

The enclosed copy of our inspection report identifies areas examined during the inspection. Within these areas, the inspection consisted of a selective examination of procedures and representative records, observations, and interviews with personnel.

During this inspection, certain of your activities were in violation of NRC requirements, as described in the enclosed Appendix. The inspection showed that action had been taken to correct the identified noncompliance and to prevent recurrence. Consequently, no reply to this noncompliance is required and we have no further questions regarding this matter at this time.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter and the enclosures will be placed in the NRC's Public Document Room.
