| 1  | P-R-O-C-E-E-D-I-N-G-S   |
| 2  | (7:00 p.m.)   |
| 3  | M3. DEBOLD: Welcome to Haddam, one of the   |
| 4  | great towns in Connecticut. We are glad to have you here.                                 |
| 5  | I'm Marjorie Debold, the first selectman of Haddam.                                       |
| 6  | I'd like to let you know, right away, that  |
| 7  | this is just an information meeting. It is not a hearing                                  |
| 8  | in the formal sense. There is an agenda for the meeting,                                  |
| 9  | and there were some copies around, I believe. If there                                    |
| 10 | were, they are gone, but I will review it.  |
| 11 | Is there anyone who doesn't have an agenda,   |
| 12 | were they passed out? They may be all gone, but I can run                                 |
| 13 | through the agenda, and speak to each of the items.                                       |
| 14 | First, a little bit of housekeeping. There  |
| 15 | are men's and women's lavatories at the back of the room,                                 |
| 16 | around the corner. There are lavatories down the hall,                                    |
| 17 | behind me. The emergency exits are marked.  |
| 18 | There is a concert that will be going on  |
| 19 | shortly, and it is in the auditorium. You can go there                                    |
| 20 | after we finish here, or maybe they will come up after                                    |
| 21 | they finish.  |
| 22 | Let me go over the agenda just very quickly.  |
| 23 | It must be 7 o'clock on a Wednesday. If you wish to speak                                 |
| 24 | or make comments, there is a sign-up sheet over to my                                     |
| 25 | left. The comment period will be at the end.  |
|    | NEAL R. GROSS   |
|    | (202) 234-4433 1323 RHODE ISLAND AVE., N.W.<br>WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

| l  | At the beginning, after I introduce myself,  |
|----|--|
| 2  | describe very briefly, most of you know already, the   |
| 3  | purposes of the meeting. Shortly thereafter, Ted   |
| 4  | Feigenbaum of Northeast Utilities and Jere LaPlatney, also   |
| 5  | of Connecticut Yankee, plant manager, will outline for you   |
| 6  | the future plans for the plant.  |
| 7  | If you have a question following that  |
| 8  | presentation, and if you would wait until the end, if you  |
| 9  | can, they will be happy to answer your question. And if  |
| 10 | you raise your hands, I will point or whatever. And if   |
| 11 | you go to a mike, to be heard, please. And I will explain  |
| 12 | why in just a minute.  |
| 13 | Following that presentation, Mr. Michael   |
| 14 | Masnik of the NRC will describe the decommissioning  |
| 15 | regulations and proposed future NRC oversight. Again,  |
| 16 | there will be a short question and answer period, same   |
| 17 | relatively easy manner of responding.  |
| 18 | And then by 9 o'clock, if we could, we would   |
| 19 | like to open it for public comment. Several of you have  |
| 20 | signed up already. We will try to limit that, we will  |
| 21 | find out how many people signed up, and we will divide the   |
| 22 | hour into the number of people or something akin to that,  |
| 23 | and maybe try to hold it down to three minutes for   |
| 24 | comments, if we can.   |
| 25 | And at 10, I would like to close the meeting.  |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>(202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

|    | 5  |
|----|--|
| ı  | I'm sure there will be other opportunities, so if we can   |
| 2  | try to keep to a fairly close time schedule.   |
| 3  | Just trying to skip through and make sure I  |
| 4  | don't miss anything. If you wish to give a written   |
| 5  | statement, the NRC will accept those. If it is something   |
| 6  | that is very short, or of a summary nature, it probably  |
| 7  | will be included with the written communication that will  |
| 8  | come out following this meeting. If it is very long,   |
| 9  | please try to abbreviate it.   |
| 10 | People that do not want to speak, do not need  |
| 11 | to sign up, of course. But people who do wish to speak or  |
| 12 | make public comment should sign up. And that will happen,  |
| 13 | hopefully, starting at 9 o'clock.  |
| 14 | There is a second sign-up sheet, again, over   |
| 15 | to my left, that asks for your name and address if you   |
| 16 | would like a copy of tonight's proceedings. As you have  |
| 17 | noticed, we are having this meeting transcribed.   |
| 18 | Not that it is a formal hearing, but rather to   |
| 19 | make sure that we understand what questions were raised  |
| 20 | and what comments were made. Single copies of that   |
| 21 | transcript will be mailed to anyone who signs up for it.   |
| 22 | Any group or individual who would like to distribute   |
| 23 | information should have a table, again to my left, and   |
| 24 | hopefully that is where you will pick up materials.  |
| 25 | Since the meeting is being transcribed, please   |
|    | NEAL R. GROSS      COURT REPORTERS AND TRANSCRIBERS      1323 RHODE ISLAND AVE., N.W.      (202) 234-4433      WASHINGTON, D.C. 20005-3701      (202) 234-4433 |

|     | 6  |
|-----|--|
| 1   | make sure when you speak, that you give your name. And if  |
| 2   | it is one that might be confusing to the person  |
| 3   | transcribing the meeting, if you would spell it.   |
| 4   | Also, if you have a question or comment, again   |
| 5   | following the presentations, don't forget, if you will   |
| 6   | raise your hand I'll point to indicate, and then do go and   |
| 7   | use one of the microphones in the aisle, so that you can   |
| 8   | be heard, and then also so that it can be transcribed  |
| 9   | properly.  |
| 1.0 | At the end of the evening's proceedings, the   |
| 11  | transcript and a copy of the overhead slides will be bound   |
| 12  | into that transcription. It will be, again, you can  |
| 13  | receive it, I'm sure I will have it, and any material that   |
| 14  | you wish to have included there, should be given to the  |
| 15  | NRC project manager. It could go right here to Mort  |
| 16  | Fairtile, or to Mike Masnik.   |
| 17  | Remember, if it is a few pages, I'm sure they  |
| 18  | will include it, and if it is more than that, if it could  |
| 19  | have a summary page.   |
| 20  | The MRC project manager will review the  |
| 21  | transcription before he mails it out, and will make minor  |
| 22  | changes to correct any obvious errors, but it is going to  |
| 23  | be done in pen, so you will get whatever the transcription   |
| 24  | says, as it was originally transcribed.  |
| 25  | Since this is an information meeting and it is   |
|     | NEAL R. GROSS      COURT REPORTERS AND TRANSCRIBERS      1323 RHODE ISLAND AVE., N.W.      (202) 234-4433      WASHINGTON, D.C. 20005-3701      (202) 234-4433 |

ŧ

|    | 7  |
|----|--|
| l  | not part of a formal proceeding, speakers will not get the   |
| 2  | opportunity to correct this is, principally, in the  |
| 3  | interest of getting the transcription out, so that the   |
| 4  | public can have it as soon as possible.  |
| 5  | As you can see, from hearing the agenda, there   |
| 6  | is a lot of ground to cover. I will try to insist that we  |
| 7  | keep to the schedule. I will cut you off, I brought my   |
| 8  | egg timer. It has a little 20 second beeping series that   |
| 9  | I can stop, but hopefully I will not even have to use it.  |
| 10 | You are encouraged, by the way, to ask   |
| 11 | questions and later to make comments. And I certainly  |
| 12 | don't mean to be flip about limiting your time, but it is  |
| 13 | important that we try to give everybody a chance to speak  |
| 14 | who wishes to.   |
| 15 | If we take a break, or at the end of the   |
| 16 | meeting, you are, of course, free to speak to the NRC  |
| 17 | people who will be here. And I'm sure that the NU  |
| 18 | personnel will be around, also.  |
| 19 | For those of you who are media people, I would   |
| 20 | ask and they've been very good today they generally  |
| 21 | are, I don't mean to say that. If they wish to interview,  |
| 22 | I would ask that they do it outside of this room, or   |
| 23 | during a time when we are not actively going through the   |
| 24 | meeting.   |
| 25 | The NRC people, certainly, as well as the rest   |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>(202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

|    | 0  |
|----|--|
| 1  | of us who are public officials, I'm sure will speak to you   |
| 2  | at your request.   |
| 3  | Is there anything that you need to know from   |
| 4  | me before we continue on?  |
| 5  | I'm doing very well, it is now 7:10, and Mr.   |
| 6  | Feigenbaum if you would come up, and maybe you would   |
| 7  | introduce the people who are here with you today, and help   |
| 8  | us keep going on schedule.   |
| 9  | MR. FEIGENBAUM: Thank you, Marge. I'm Ted  |
| 10 | Feigenbaum, and I'm the Executive Vice President for   |
| 11 | Northeast Utilities, and Chief Nuclear Officer for   |
| 12 | Connecticut Yankee.  |
| 13 | This is a beautiful facility, and it is a  |
| 14 | pleasure to be here. I tell you, this is a facility that   |
| 15 | is unlike one that I went to high school. I had a school   |
| 16 | that was maybe a tenth of the size of this one.  |
| 17 | It is a pleasure being here today. I do want   |
| 18 | to introduce some folks that work with us at Connecticut   |
| 19 | Yankee. First of all, Jere LaPlatney is here, Jere is the  |
| 20 | prematurely grey individual here, he is our unit director,   |
| 21 | and has been at Connecticut Yankee for 12 years.   |
| 22 | He has over 20 years of experience in the  |
| 23 | nuclear power business, was licensed on the plant, and is  |
| 24 | licensed to operate the plant. And, as I said, he is the   |
| 25 | current unit director.   |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>(202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

.

John Haseltine is another member of my staff. He is the director of engineering. John has background not only at Northeast Utilities and at Connecticut Yankee, but was also involved at Yankee Rowe, which was a plant that was recently decommissioned up in Northwestern Massachusetts.

7 Interesting background on John, his father was 8 one of the first plant superintendents of Connecticut 9 Yankee, in the early 1960's. And now John has been 10 associated with the plant, and is going to be involved in 11 the decommissioning of the plant, so it is kind of a 12 closing of the loop.

Gary Bouchard is here, as well. Gary, if you would stand? Gary is our director of work services, Gary is over there in the back. He is also a past unit director of Connecticut Yankee. He is experienced in maintenance, and he was also licensed on the plant, to operate the plant, and also has more than 20 years of experience.

So we have a strong experience base at Connecticut Yankee that remains. And that is going to be, obviously, supplemented with additional new talent, and individuals who are highly experienced in radiological controls, and health physics, which is a very important aspect moving forward into the decommissioning process.

> NEAL R. GROSS COURT REPORTERS AND TRANSCRIBERS 1323 RHODE ISLAND AVE., N.W. WASHINGTON, D.C. 20005-3701

(202) 234-4433

(202) 234-4433

| 11 | 10   |
|----|--|
| 1  | We are also going to supplement our existing   |
| 2  | work force with specialized decommissioning experience, as   |
| 3  | we need it, going forward as we do our planning process.   |
| 4  | But I just did want to introduce some of the   |
| 5  | key members of my staff. There are other individuals here  |
| 6  | that are also in the audience, and we will call upon them  |
| 7  | as needed during the evening to answer questions.  |
| 8  | Well, today we as Marge indicated, we want   |
| 9  | to start the dialogue. Decommissioning is a big deal. It   |
| 10 | is a major effort, and it is very important for us at  |
| 11 | Connecticut Yankee that it be done properly.   |
| 12 | We are very proud of the 28 years of service   |
| 13 | of the plant, we want to make sure that the plant is   |
| 14 | retired properly, and brought completely to a safe   |
| 15 | condition and maintained until we can off-load the fuel,   |
| 16 | and ship it to a final repository.   |
| 17 | Now, we recognize that decommissioning is very   |
| 18 | different from operating a plant. It presents different  |
| 19 | challenges, and special requirements. But also, at the   |
| 20 | same time, there are radiological issues, there are  |
| 21 | industrial safety issues and concerns, as we dismantle   |
| 22 | major pieces and buildings, and remove certain equipment   |
| 23 | in the plant. And, certainly, there is the need for  |
| 24 | environmental stewardship throughout this entire process.  |
| 25 | The process, the initial process of  |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>(202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

ż

|    | 11   |
|----|--|
| 1  | decontamination and decommissioning and preparing the  |
| 2  | plans and the engineering for decommissioning the plant  |
| 3  | will take a number of years. We estimate that that is in   |
| 4  | the six to eight year range.   |
| 5  | But, of course, the fuel facility will remain  |
| 6  | operational, on the site, for many more years, until we  |
| 7  | can ship the fuel. And that could be as long as 20 years.  |
| 8  | We plan to work very closely with the NRC  |
| 9  | every step of the way, following their rules, learning   |
| 10 | from their experience, as they regulate other facilities   |
| 11 | that are decommissioned. So we will always be up to speed  |
| 12 | with the latest of what is happening in the industry.  |
| 13 | And, certainly, we want to carefully listen to   |
| 14 | the public at every step during the process. 1997 is   |
| 15 | going to be really a year of listening for us, and   |
| 16 | planning. Planning for the decommissioning of Connecticut  |
| 17 | Yankee.  |
| 18 | We did not expect to shut the plant down when  |
| 19 | we did, the plant license life, as you may recall, was to  |
| 20 | run through the year around 2007. But we, for economic   |
| 21 | reasons, which we periodically check all our facilities,   |
| 22 | we came to the conclusion that it was in the best interest   |
| 23 | of the rate payers to decommission the plant early.  |
| 24 | So this year, 1997, will be a year where we  |
| 25 | study options, where we determine the best way to  |
|    | NEAL R. GROSS      COURT REPORTERS AND TRANSCRIBERS      1323 RHODE ISLAND AVE., N.W.      (202) 234-4433      WASHINGTON, D.C. 20005-3701      (202) 234-4433 |

|    | 12   |
|----|--|
| 1  | decommission the plant safely and efficiently, so that the       |
| 2  | public is satisfied that we've done a good job, and that         |
| 3  | we meet all the rules and requirements of the NRC, and           |
| 4  | that we are satisfied that we can shut this facility down        |
| 5  | and maintain it in a safe condition for many years to            |
| 6  | come, and remain a good neighbor in the community.               |
| 7  | We are, as I said, completely committed to                       |
| 8  | public participation. That is the reason we are here             |
| 9  | tonight, and I'm sure there will be many other meetings in       |
| 10 | this facility to provide more details as we get further          |
| 11 | along in the planning process.                                   |
| 12 | But, certainly, before we get into any active                    |
| 13 | decontamination/dismantlement of the plant, there are            |
| 14 | certain things that we have to take care of, first.              |
| 15 | Our performance at Connecticut Yankee last                       |
| 16 | year, in the late last the last half of last year,               |
| 17 | certainly was not up to our standards. We had some events        |
| 18 | that led us to re-examine the way we do business at the          |
| 19 | plant, and clearly we have to raise our standards and            |
| 20 | change some things that we do at the plant.                      |
| 21 | We need to make improvements in several areas,                   |
| 22 | before we move forward, at all, with any major                   |
| 23 | decommissioning. I'm talking about the radiological              |
| 24 | control area. We certainly have talked about this in             |
| 25 | public forums before. Corrective action process, that is         |
|    | NEAL R. GROSS  |
|    | COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W. |

| l  | the process of finding problems and fixing them  |
|----|--|
| 2  | effectively.   |
| 3  | The way we control our design basis and our  |
| 4  | documentation, to make sure that the parts of the plant  |
| 5  | that will remain functional are, in fact, in accordance  |
| 6  | with the documents that we all use on a daily basis, and   |
| 7  | that the NRC uses to provide oversight of us.  |
| 8  | So we shut the plant down, but as we move  |
| 9  | forward, we have to make sure that all these issues that   |
| 10 | have concerned us over the last few months as we've had  |
| 11 | these operational events are, in fact, taken care of.  |
| 12 | I want to talk about our commitments to the  |
| 13 | public, to ourselves, to the NRC, regarding our key  |
| 14 | priorities for moving forward. Certainly, safety has to  |
| 15 | be at the very top of that list. We are, even though we  |
| 16 | are a non-operating facility in terms of producing   |
| 17 | electricity, we are still a nuclear facility, and we will  |
| 18 | have spent fuel, on-site obviously for many years to come.   |
| 19 | Now, when we have a shutdown facility with   |
| 20 | fuel in the fuel pool, the operational risks are,  |
| 21 | obviously, much decreased, but there are still important   |
| 22 | safety issues that have to demand our continuous attention   |
| 23 | on a daily basis.  |
| 24 | And we recognize that, and safety will come  |
| 25 | first, in all our planning and design and engineering,   |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>(202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

11

| 1917 | **   |
|------|--|
| ı    | before we move into the decommissioning process.           |
| 2    | Also, in the area of resources, our commitment             |
| 3    | is to provide all the necessary resources to do the job    |
| 4    | without any compromises. We will be doing, in 1997, a      |
| 5    | research, visiting other facilities. We have already       |
| 6    | visited some of the 70 some odd facilities in this country |
| 7    | that have gone through different stages of decommissioning |
| 8    | to come up with the best decision as to how to move        |
| 9    | forward in decommissioning and how to do it carefully.     |
| 10   | We will not hesitate to bring in experts when              |
| 11   | we need them. We've already done some of that, and we      |
| 12   | will do a great deal more of it. People from other         |
| 13   | utilities who have gone through this, and from other       |
| 14   | organizations that have been involved in the               |
| 15   | decommissioning of plants. And there certainly is a        |
| 16   | growing industry of people and expanding knowledge in the  |
| 17   | area of decommissioning, which we will tap, and take       |
| 18   | advantage of.  |
| 19   | We are going to staff the CY, Connecticut                  |
| 20   | Yankee organization with the right number of people, with  |
| 21   | the right talents, to deal with the decommissioning        |
| 22   | challenges. And they are different talents, somewhat       |
| 23   | similar, but certainly the emphasis changes when you are   |
| 24   | in a decommissioned kind of situation.                     |
| 25   | Also, I just want you to be aware, because                 |
|      | NEAL R. GROSS  |
|      | COURT REPORTERS AND TRANSCRIBERS                           |
|      | (202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433  |
|      |  |

| Ξų. | 1   | 5   |
|-----|---|-----|
| 1   | many of the people that work at the plant are your        |     |
| 2   | neighbors, they live in this community. We are working    |     |
| 3   | very hard to make sure that as we transition from an      |     |
| 4   | operating facility that employed directly at the plant    |     |
| 5   | about 360, 370 people, and as that as we de-staff in      |     |
| 6   | certain areas, that we are working very hard to make sure |     |
| 7   | that those people are able to continue their nuclear      |     |
| 8   | careers, or continue in other careers as they wish to.    |     |
| 9   | We are taking some of the key talented people             |     |
| 10  | and using them in our Millstone facility, where obviously |     |
| 11  | we have great needs at this moment. We also run a         |     |
| 12  | facility that I'm responsible for up at Seabrook in New   |     |
| 13  | Hampshire.  |     |
| 14  | And we have, just recently, starting I belie              |     |
| 15  | Monday of this week, taking some 12 people from the plan  | t   |
| 16  |   |     |

|     | (202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433 |     |

|    | 16   |
|----|--|
| 1  | plant, that we will need, and we will certainly need to          |
| 2  | retain the operational history, the history of the               |
| 3  | organization, as we move forward in the decommissioning          |
| 4  | process.   |
| 5  | Certainly, in use area of compliance with the                    |
| 6  | rules, we recognize that we have relinquished the right to       |
| 7  | operate the plant. We have certified to the NRC that we          |
| 8  | will no longer operate the plant, but we still have many         |
| 9  | regulatory requirements that still exist. Whether those          |
| 10 | are in security, for example, or emergency preparedness in       |
| 11 | the ten mile zone around the plant.                              |
| 12 | Certainly we have quality oversight                              |
| 13 | requirements, surveillance requirements of key components        |
| 14 | that remain functional, and will remain functional for           |
| 15 | many years to come.  |
| 16 | These requirements remain in force. And we                       |
| 17 | intend to provide strict compliance with procedures and          |
| 18 | NRC rules, and that will be a cornerstone of our                 |
| 19 | operations going forward.  |
| 20 | Another major commitment we have is to a                         |
| 21 | public dialogue. We are going to listen to our neighbors,        |
| 22 | and hear what you have to say on a continuous basis, and         |
| 23 | we will not finalize our plans for decommissioning until         |
| 24 | we feel that we've heard from the public and we understand       |
| 25 | your concerns, and those have been addressed, and factored       |
|    | NEAL R. GROSS  |
|    | COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W. |
|    | (202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433        |

1 | into our plans.

We are helping to create a community decommissioning advisory committee, which will hopefully represent a broad spectrum of people in Haddam and Haddam Neck area, and we hope to be able to start getting that committee off to a series of meetings beginning in the March time frame.

And that March time frame will certainly be well in advance of any active or major decommissioning work that we are planning at Connecticut Yankee. So there will be many months of this committee, which will have a lot of tentacles out into the various towns, and key constituencies into the community, to be able to feed back to us your concerns, that we can work into our plan.

We have had a very active Connecticut Yankee information function that has been staffed by Tony Nericcio and a number of people who have done a good job of keeping people in the community informed of issues and events going on at Connecticut Yankee.

We are going to continue to keep that function staffed. Our practice of giving tours of the plant will continue, and we invite anybody in this room, or anybody else that has an interest, to come by and see what is going on at Connecticut Yankee.

> NEAL R. GROSS COURT REPORTERS AND TRANSCRIBERS 1323 RHODE ISLAND AVE., N.W. WASHINGTON, D.C. 20005-3701

We will be holding our own, in addition to the

(202) 234-4433

25

(202) 234-4433

|    | 10   |
|----|--|
| 1  | advisory committee, citizen's advisor committee, holding   |
| 2  | meetings ourselves, when we have important information,  |
| 3  | and we have reached certain milestones in the  |
| 4  | decommissioning planning process.  |
| 5  | We will hold meetings in public places to  |
| 6  | inform you of the directions we are going in, and seek   |
| 7  | your input where we feel that it deserves to be heard.   |
| 8  | So public dialogue is definitely one of our  |
| 9  | cornerstone commitments going forward in the years ahead.  |
| 10 | We want your input. I can't stress that enough. That is  |
| 11 | why we are here tonight, and we will have additional   |
| 12 | forums and opportunities. Give us a call, you know, we   |
| 13 | can't always have a meeting every week, but if you hear  |
| 14 | something, or you read something that disturbs you, or you   |
| 15 | just want to ask a question, please give us a call, at the   |
| 16 | plant, and we promise to get back to you with a prompt   |
| 17 | response.  |
| 18 | At this point, I'm going to ask Jere LaPlatney   |
| 19 | to come up, the unit director, and talk a good deal more   |
| 20 | about specific activities in 1997, and what we are going   |
| 21 | to be doing in the process.  |
| 22 | MR. LAPLATNEY: I am Jere LaPlatney, the unit   |
| 23 | director. My name is not as simple as Ted's, so I'll   |
| 24 | spell it. L-A-P-L-A-T-N-E-Y. That is to get even for the   |
| 25 | prematurely grey comment.  |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE N.W.<br>(202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

11

|    | **   |
|----|--|
| ı  | I guess I want to tell you a little bit about  |
| 2  | me, first, before I get started. I'm a member of this  |
| 3  | community. I've lived in the area for 20 years, and that   |
| 4  | is a newcomer by my family standards. My wife has lived  |
| 5  | here her whole life. Her family has lived here their   |
| 6  | whole lives, their grandparents lived here their whole   |
| 7  | lives. So it is pretty important that I be standing here   |
| 8  | in front of my community and talk about these subjects.  |
| 9  | I'm going to give you an overview of the   |
| 10 | activities that will go on at Connecticut Yankee in 1997.  |
| 11 | I would characterize these as the big picture look. There  |
| 12 | are no details here. We didn't plan shutting the plant   |
| 13 | down, so we haven't filled them all in.  |
| 14 | In 1996, as Ted mentioned, we had a series of  |
| 15 | performance issues, specifically two contaminations of a   |
| 16 | couple of individuals, and a nitrogen intrusion in the   |
| 17 | reactor vessel at Connecticut Yankee.  |
| 18 | These were both very disturbing events. They   |
| 19 | were, I would characterize it as well outside the norms of   |
| 20 | our performance in the past, and they were quite gut   |
| 21 | wrenching.   |
| 22 | In public forums we have told you that we feel   |
| 23 | that significant corrective actions had to be taken. We  |
| 24 | have identified those corrective actions, and they are in  |
| 25 | our programs and processes, and will be implemented in   |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>(202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

- 5

1 1997. Those processes will really carry through, at 2 least until the summer, so this is not a guick fix, you 3 know, put a band-aid on it and get on with 4 decommissioning. These are fundamental changes in the way 5 we are doing business. It is going to take some time. 6 So the first thing we are going to do in 1997 7 is to correct the performance deficiencies that we 8 identified at the end of 1996. 9 The second item, and it is these items, some 10 of them are going in parallel, this is one of them, is 11 that we need to staff this organization for 12 decommissioning. The decommissioning needs of a plant are 13 not as large as an operating plant. This is well 14 documented, across other plants that have gone through 15 this process. 16 We have identified our needs, and we have 17 identified, basically, two phases of our needs. In 1997 18 we maintained a full 10CFR50 in regulatory parlance, 19 operating license, even though we have given up the right 20 to operate the reactor, we have to maintain compliance 21 with those regulations. 22 In order to do that, we've identified a 23 staffing size, which has been in the newspapers. It is 24 approximately 177 permanent folks, plus additional 25 NEAL R. GROSS COURT REPORTERS AND TRANSCRIBERS 1323 RHODE ISLAND AVE., N.W. (202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433

| l  | contractor support.  |
|----|--|
| 2  | By the end of the year, we expect to be able   |
| 3  | to drop that number down to about, in the range of 100, I  |
| 4  | think 107 is the number I've seen in the newspapers, which   |
| 5  | is pretty accurate. And that will carry on for a   |
| 6  | considerable amount of time in the decommissioning.  |
| 7  | Taking an organization from 322 people to 177,   |
| 8  | to 107, is a very emotional event. These people, a lot of  |
| 9  | them have been working there as long as I've lived in  |
| 10 | Connecticut, and their lives and their souls, and a lot of   |
| 11 | what they've been in the last 28 years, is about this  |
| 12 | plant.   |
| 13 | Managing that process is delicate. This  |
| 14 | company is going out of its way to try to place every  |
| 15 | employee in a place of meaningful employment. And that,  |
| 16 | quite honestly, is a big focal item for us. That is the  |
| 17 | second big thing that we are looking at this year, is  |
| 18 | managing the transition to a decommissioning organization.   |
| 19 | The third thing is very technocratic. I  |
| 20 | mentioned our license, that we still have it in effect.  |
| 21 | Through the licensing processes provided by the NRC, we  |
| 22 | will make submittals, and we will change our license to  |
| 23 | reflect the fact that the fuel is no longer in the   |
| 24 | reactor, it is now in the spent fuel building.   |
| 25 | Specifically, things like the emergency plan,  |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>(202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

8

|    | 22  |
|----|---|
| 1  | the security plan, and our technical specifications can be                        |
| 2  | revised to eliminate requirements that simply no longer                           |
| 3  | exist.  |
| 4  | We have a technical specification, for  |
| 5  | example, on how quickly the reactor has to trip. That is                          |
| 6  | no longer applicable to this unit. Items like that will                           |
| 7  | be removed from our current requirements, and only those                          |
| 8  | items which apply to a de-fueled reactor will remain.                             |
| 9  | Next slide, please.   |
| 10 | I think of importance to this audience is also                                    |
| 11 | an activity, a key activity in 1997, will be the                                  |
| 12 | development of the post-shutdown decommissioning                                  |
| 13 | activities report. I still haven't memorized the term                             |
| 14 | yet, because like Ted said, we weren't planning on                                |
| 15 | shutting this unit down.  |
| 16 | This is the plan. It is a document summary  |
| 17 | level document on the order of eight to ten pages. It                             |
| 18 | will have how we plan to tear this plant apart, in                                |
| 19 | accordance with regulations.  |
| 20 | We will spend the better part of 1997 putting                                     |
| 21 | this plan together. Right now, our optimistic schedule                            |
| 22 | shows this being completed around the end of the summer                           |
| 23 | time frame, but that will require reviews and everything                          |
| 24 | else, so understand, this is not something that is going                          |
| 25 | to come out in the next month or so.  |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W. |

WASHINGTON, D.C. 20005-3701 (202) 234-4433

| 1  | We are going to fix the problems from 1996, we   |
|----|--|
| 2  | are going to staff the organization and take care of those   |
| 3  | issues, then we will get to work on the plan.  |
| 4  | When the plan has been submitted, we can   |
| 5  | actually we can begin planning the actual  |
| 6  | decommissioning work. If you want to think of it this  |
| 7  | way, we submit a plan to the NRC, and I'll discuss the   |
| 8  | process in a minute. Pending their approval, we can go   |
| 9  | off and start figuring out the nuts and bolts, where do  |
| 10 | you make the cut, how do you remove the component, the   |
| 11 | detailed planning can begin.   |
| 12 | Those are activities that may occur in 1997,   |
| 13 | so I put them up here for completeness.  |
| 14 | Last point I wanted to make is, the regulation   |
| 15 | says, that we cannot begin any major decommissioning work  |
| 16 | until the PSDAR has been filed with the NRC, and 90 days   |
| 17 | have elapsed to allow time for public comment.   |
| 18 | As Ted has already announced, we intend not to   |
| 19 | live just to the letter of that, we are going to go to the   |
| 20 | spirit, and we intend to involve the public in the   |
| 21 | development of the plan.   |
| 22 | The citizen's committee, I see is a key  |
| 23 | resource to helping us identify those issues that the  |
| 24 | community is worried about, and we intend to provide good  |
| 25 | responses.   |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>(202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

.

| 1  | But, again, we cannot do any major   |
|----|--|
|    |  |
| 2  | decommissioning work until 90 days after the plan has been   |
| 3  | submitted.   |
| 4  | So, what I'm telling you is, if you look   |
| 5  | across the river, or if you happen to be on the Haddam   |
| 6  | Neck side as you come down the road, the physical plant  |
| 7  | will appear the same for the next year. We will not cut  |
| 8  | out steam generators, we will not be cutting out reactor   |
| 9  | vessels, it will stay the same.  |
| 10 | The intent of the regulation is to plan your   |
| 11 | decommissioning, submit it to the NRC, get approval, and   |
| 12 | then next fit your plan. That is exactly what we plan on   |
| 13 | doing at Connecticut Yankee.   |
| 14 | Connecticut Yankee, when we make decisions, we   |
| 15 | run through a series of decision gates, and so any   |
| 16 | decision that we make, we have to pass that series of  |
| 17 | gates. The top gate, the gate that you have to pass first  |
| 18 | is safety.   |
| 19 | So when we look at when we make decisions  |
| 20 | for decommissioning, or any decision during the day, we  |
| 21 | look at our priorities. Our priorities are safety first.   |
| 22 | In this case, we always used to say, nuclear safety, I   |
| 23 | think we are going to change our thinking here, it is fuel   |
| 24 | storage safety now. That really is the majority of our   |
| 25 | nuclear safety.  |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>(202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

11

|    | 25   |
|----|--|
| ı  | Radiological safety is going to gain   |
| 2  | importance. At Connecticut Yankee we have a lot of   |
| 3  | seasoned radiation workers, and notwithstanding the event  |
| 4  | of this fall, these people have done this work for a long  |
| 5  | time, and they are experienced.  |
| 6  | In the decommissioning mode there will be  |
| 7  | people who aren't as experienced, taking on tasks that are   |
| 8  | more challenging, radiologically. We need to make sure   |
| 9  | that we keep radiological safety high on the scope.  |
| 10 | Environmental safety is another important  |
| 11 | aspect at Connecticut Yankee. We have a good   |
| 12 | environmental record, we do report everything as required  |
| 13 | by the regulations, and we manage the very lowest level  |
| 14 | indicators, what is called exceedences.  |
| 15 | As we go through the decommissioning, there is   |
| 16 | a potential use of chemicals, there is potentials where we   |
| 17 | have to address the environmental impact of our  |
| 18 | activities. Most activities have been evaluated, but some  |
| 19 | may not have, and they have to be looked at.   |
| 20 | And so environmental safety, I think will be   |
| 21 | coming up, higher on our radar scope than maybe it has   |
| 22 | been in the past, because of the nature of the new work.   |
| 23 | And, finally, industrial safety. This has  |
| 24 | been around for a long time. Our industrial safety record  |
| 25 | is excellent. We've completed I see some employees, it   |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>(202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

÷.

|    | 26   |
|----|--|
| 1  | is over 400 days now without a lost time accident.   |
| 2  | Our industrial safety record, I notice   |
| 3  | reportables is an order below the construction industry.   |
| 4  | We intend to maintain that kind of focus on industrial   |
| 5  | safety. Industrial safety is the benefits of   |
| 6  | industrial safety, there is a number of them.  |
| 7  | First of all, is that you return your  |
| 8  | employees to their families the same way they gave them in   |
| 9  | the morning. That is the most important. Industrial  |
| 10 | safety attitude also shows an overall attitude. If a   |
| 11 | person is focusing on safety, and they safely perform  |
| 12 | their job, that is a good indicator as to how they do  |
| 13 | their job, overall.  |
| 14 | And, finally, safety doing his job safely,   |
| 15 | usually means you are doing it right. So it is a good  |
| 16 | thing to focus on, it has a lot of benefits, and we've   |
| 17 | kept that high on the screen for many years, and we have   |
| 18 | good results, to date.   |
| 19 | The second major item is quality. Do it right  |
| 20 | the first time. In the nuclear field, if you do not do   |
| 21 | something properly the first time, you will always get the   |
| 22 | opportunity to do it, and do it until you get it right.  |
| 23 | So there is no benefit in trying to cut corners in a   |
| 24 | nuclear power plant.   |
| 25 | Our focus is do it safe, do it right the first   |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>(202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

|    | 27   |
|----|--|
| 1  | time. And finally, the actual performance of the job.            |
| 2  | And just so you know the difference go back                      |
| 3  | to that slide for a second, please.                              |
| 4  | The only thing different from the first time I                   |
| 5  | delivered this talk to my first set of shift managers in         |
| 6  | 1990, was the fact that I've added the emphasis on fuel          |
| 7  | storage and environmental. The rest of this hasn't               |
| 8  | changed, at least for me, for the last six, seven years.         |
| 9  | I'm going to change topics, here, for a                          |
| 10 | second. I'd just like to spend a couple of minutes               |
| 11 | talking about the nuts and bolts of decommissioning              |
| 12 | options. So this is a small primer on regulation.                |
| 13 | There are three options in the regulation for                    |
| 14 | the decommissioning. Prompt dismantlement is DECON. That         |
| 15 | is, essentially, filing a plan with the NRC and the plan         |
| 16 | says, we intend to decontaminate and disassemble the             |
| 17 | plant, and remove all radioactivity from the site. And do        |
| 18 | it, essentially, starting whenever our plan is approved.         |
| 19 | The second one is SAFSTOR, that one says that                    |
| 20 | you can store the plant up to an overall period of 60            |
| 21 | years, and at some point in the 60 year period, you begin        |
| 22 | the dismantlement of the first option, but you can just          |
| 23 | safely store the plant for the interim period.                   |
| 24 | And the final is ENTOMB, and that is where you                   |
| 25 | do some engineering items to put concrete and entomb             |
|    | NEAL R. GROSS  |
|    | COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W. |
|    | (202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433        |

28 certain portions, but within the 60 year period, you still 1 have to go back and tear it apart and have it dismantled 2 and, you know, you have to have DECON done at the end of 3 the 60 years. 4 The point I'm making here is they will all end 5 up at the DECON. The question is, the durations that you 6 wait, and how you configure the plant, while you wait to 7 get to the ultimate dismantlement. 8 The final stage for any nuclear facility is, 9 you remove the radioactivity from the site. 10 At Connecticut Yankee, our options will be 11 evaluated. We have filed with FERC a cost estimate for 12 decommissioning that is required. The current cost 13 estimate is based on the DECON option. 14 That does not mean we have selected the DECON 15 option. That means that the current cost estimate is 16 based on the DECON option. 17 When we file our PSDAR, we will in fact have 18 the final decision in that document. 19 And the final point I want to make is that 20 we've had a lot of questions from the public, and I'm 21 trying to answer some of the questions I anticipated in 22 this slide, about the future use of the facility. 23 Currently, there is no planned use for the 24 facility. It is consider to be a -- basically a 25 NEAL R. GROSS COURT REPORTER. ID TRANSCRIBERS 1323 RHODE IS AND AVE NW WASHINGTON, D.C. 20005-3701

(202) 234-4433

(202) 234-4433

|    | 29   |
|----|--|
| 1  | liability that we have to dispose of, at this point.   |
| 2  | That could change at some point, but right now   |
| 3  | there are no plans for the facility. There have been   |
| 4  | questions about re-powering, etcetera. That is not in the  |
| 5  | cards, currently, at Connecticut Yankee.   |
| 6  | I got a little bit choked up when I was  |
| 7  | talking about my family. But I really want to reiterate  |
| 8  | that, you know, Gary has been here at Connecticut Yankee   |
| 9  | for 25 years, and he is a life-long resident of  |
| 10 | Connecticut.   |
| 11 | I'm a member of this community, my daughter  |
| 12 | just played sports yesterday in the gymnasium, in the  |
| 13 | shot-put by the way. And, you know, we are here to make  |
| 14 | sure that this job gets done right. We live in the EPZ,  |
| 15 | we are part of this community, and we are going to make  |
| 16 | sure this job gets done right.   |
| 17 | And that is the end of our presentation,   |
| 18 | Marge.   |
| 19 | MS. DEBOLD: Next we had planned a short  |
| 20 | period so that you might ask questions related to what the   |
| 21 | two presenters have just given you. If there is anyone   |
| 22 | who would like to ask a question, if you would just raise  |
| 23 | your hand or step to the mike.   |
| 24 | Is there anyone at this point who would like   |
| 25 | to ask go right ahead.   |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>(202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

| 1  | 30  |
|----|---|
| 1  | MR. BLOCK: Yes. My name is John Block, and  |
| 2  | I'm the attorney for the Citizens Awareness Network of  |
| 3  | both Massachusetts and Connecticut, as well as Friends of   |
| 4  | the Coast, and Nuclear Information Resource Service.  |
| 5  | My question is this. A point was made that no   |
| 6  | major decommissioning work will be done until the PSDAR   |
| 7  | has been submitted and approved.  |
| 8  | I was wondering if you could describe what  |
| 9  | activity will take place that you are not considering   |
| 10 | major decommissioning work.   |
| 11 | Also, one technical question. There was a   |
| 12 | citation to a FERC filing, and I was wondering if you   |
| 13 | could provide the citation, so that somebody could get a  |
| 14 | copy of that filing.  |
| 15 | MR. LAPLATNEY: I'll take the first question,  |
| 16 | because that is in my realm, I'm the plant manager.   |
| 17 | MR. BLOCK: Thank you.   |
| 18 | MR. LAPLATNEY: What we are going to do here,  |
| 19 | for the first for the next couple of months, is   |
| 20 | maintain the spent fuel pool, and really very little else.  |
| 21 | The only activity that would be in excess of that, that I   |
| 22 | can foresee in 1997, is the possibility of a full circuit   |
| 23 | chemical decontamination of our contaminated primary  |
| 24 | systems.  |
| 25 | We would do that to reduce the subsequent   |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

|    | 31  |
|----|---|
| 1  | radiation exposure for the engineering evaluations, the   |
| 2  | walk-downs, and all the work on that piping.  |
| 3  | We are one of the oldest plants in the  |
| 4  | country, and we are quite contaminated.   |
| 5  | Other than that, there are I don't want to  |
| 6  | way no equipment removals. I mean, if we took out a   |
| 7  | circulating pump like you have in your basement, I  |
| 8  | wouldn't want to be held to that standard. But we are not   |
| 9  | moving any major equipment out of the plant, we are not   |
| 10 | going to attempt to take any out of the turbine building,   |
| 11 | or the reactor site.  |
| 12 | There is no work planned, other than a  |
| 13 | potential chemical decontamination. The FERC filing, Ted,   |
| 14 | I may have to defer to you on the number.   |
| 15 | MR. FEIGENBAUM: If you would give me  |
| 16 | information as to where we can contact you, we will give  |
| 17 | you that citation. There may be somebody here in the  |
| 18 | audience that might have it, from my staff, I do not carry  |
| 19 | that information around with me.  |
| 20 | But I will get it for you, within the next 24   |
| 21 | hours, if you would just give me a phone number.  |
| 22 | MR. BLOCK: It can even be 48 hours. Thanks.   |
| 23 | MS. DEBOLD: Is there further questions? Step  |
| 24 | right up.   |
| 25 | MR. SMITH: My name is Peter Smith, and I'm  |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>(202) .'34-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

.

| -   | 32   |
|-----|--|
| ı   | from Haddam Neck. I'd like to know, now that the   |
| 2   | attention is going to be focused more on the spent fuel  |
| 3   | area, you talked 20 year storage, somewhere in that area,  |
| 4   | but I'm a little I don't know, not disbelieving, but I   |
| 5   | think it might be there a lot longer.  |
| 6   | Since attention is going to turn to that,  |
| 7   | rather than the chamber and the actual reactor area, I   |
| 8   | wondered if they may find a problem with the storage area,   |
| 9   | once the concentration really looking at that area,  |
| 10  | specially seeing as there are faults in the area.  |
| 11  | Have there been any contingency plans to   |
| 12  | store, at least the older fuel, above ground?  |
| 13  | MR. LAPLATNEY: Okay. I believe I can address   |
| 14  | your question. First of all, I think you allude to a   |
| 15  | point that at least I would like to drive home. And that   |
| 16  | is, we are reviewing the design of the spent fuel  |
| 17  | building.  |
| 1.8 | If you remember I said, we have corrective   |
| 19  | actions to complete from 1996. One of the things that we   |
| 20  | found was that the design basis at Connecticut Yankee is   |
| 21  | poorly documented.   |
| 22  | Every system that is required to support spent   |
| 23  | fuel pool cooling and maintenance of the fuel in the spent   |
| 24  | fuel pool, the design basis is being completely  |
| 25  | reconstructed. That is one of the reasons why it is going  |
|     | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>(202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

| 1  | to take us some time to submit our PSDAR.  |
|----|--|
| 2  | The second and the fault and the earthquake  |
| 3  | proof is part of that design review. So that will get  |
| 4  | looked at.   |
| 5  | You alluded to the length of storage. You  |
| 6  | recognize I'm sure the public recognizes that is really  |
| 7  | a DOE issue, they need to take possession of the fuel.   |
| 8  | I'm not going to comment on, you know, they have an  |
| 9  | obligation, they need to deal with that, and it is our   |
| 10 | obligation to safely store the fuel until such time as   |
| 11 | they do that.  |
| 12 | You also alluded to a thing called dry storage   |
| 13 | option. Some utilities have gone that way. There is no   |
| 14 | way we would make a decision on that now, but it is a  |
| 15 | it is considered a viable option, in fact, a very good   |
| 16 | option that some utilities have pursued.   |
| 17 | But there is an awful lot of questions that  |
| 18 | have to be answered in terms of compatibility of the fuel  |
| 19 | storage canister within the shielding, making sure it is   |
| 20 | compatible with the over-the-road transporter, so you  |
| 21 | don't have to undo work that you've done once.   |
| 22 | You don't want to handle spent fuel any more   |
| 23 | than you have to.  |
| 24 | MR. SMITH: I have one other question. It has   |
| 25 | to do with the canal area. Will that be filled in, at  |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>(202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

.

| 1  | some point?  |
|----|--|
| 2  | MR. LAPLATNEY: The current cost estimate,  |
| 3  | which I said was the DECON, does not include filling in  |
| 4  | the canal. So it assumes that we will leave the canal  |
| 5  | essentially as is.   |
| 6  | MR. SMITH: Thank you.  |
| 7  | MR. LAPLATNEY: I'd like to throw in one more   |
| 8  | thing on that. I wanted to call Rosemary but come on   |
| 9  | up, Rosemary.  |
| 10 | I just said, though, that the canal will not   |
| 11 | be filled in. That is the current plan. I want to re-  |
| 12 | emphasize, until the final plan is approved, anything we   |
| 13 | are saying here is preliminary.  |
| 14 | MS. BASSILAKIS: Rosemary Bassilakis, a   |
| 15 | resident of Haddam, and also a member of the Citizens  |
| 16 | Awareness Network. Mr. LaPlatney, you are assuring us  |
| 17 | that you are going to decommission the reactor safely and  |
| 18 | in compliance with NRC regulations.  |
| 19 | However, I would like to bring up the fact   |
| 20 | that you've operated that reactor outside of NRC   |
| 21 | requirements for the past 28 years. You have not updated   |
| 22 | your final safety analysis report. You've been operating   |
| 23 | with an inoperable emergency core cooling system, as well  |
| 24 | as containment air recirculation fans, just to mention a   |
| 25 | couple of issues.  |
|    | NEAL R. GROSSCOURT REPORTERS AND TRANSCRIBERS1323 RHODE ISLAND AVE., N.W.(202) 234-4433WASHINGTON, D.C. 20005-3701(202) 234-4433 |

|    | 35  |
|----|---|
| 1  | I would like to know how we can be sure that  |
| 2  | you will follow the rules now, when you have a long time  |
| 3  | history of not following the rules.   |
| 4  | MR. LAPLATNEY: Well, Rosemary, I'm glad you   |
| 5  | asked that question. I guess I've got to be honest, I   |
| 6  | expected you to ask that question this evening. So I  |
| 7  | thought about the answer to that, okay?   |
| 8  | Let me tell you the story of what happened.   |
| 9  | You've cited long-time design basis issues at Connecticut   |
| 10 | Yankee, which quite frankly did surface in 1996.  |
| 11 | At the first occurrence of one of those, which  |
| 12 | was the CAR fans, which you've pointed out, we could not  |
| 13 | prove that the CAR fans could survive a water hammer event  |
| 14 | after a large break loss of coolant.  |
| 15 | You are looking at the person who made the  |
| 16 | decision to shut the plant down, based on that question.  |
| 17 | So when I became aware of the design basis issue, I shut  |
| 18 | the plant down.   |
| 19 | Additionally, information came to light,  |
| 20 | subsequent to that, which the NRC brought to our  |
| 21 | attention, I can't take credit for us bringing it out,  |
| 22 | that showed there were significant design issues at   |
| 23 |   |
| 24 |   |
| 25 | out, we have to do a complete design basis reconstruction.  |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

|    | 36]  |
|----|--|
| l  | It is going to cost this much money, it turned out to be   |
| 2  | about 40 million dollars, and I think this number is in  |
| 3  | the public record.   |
| 4  | And that prompted a cost benefit study of the  |
| 5  | unit. The cost benefit study says, well, not only does   |
| 6  | the 40 million cause you problems, but by the way, you are   |
| 7  | not economical, anyway. Which I think this is all off-   |
| 8  | hand.  |
| 9  | So quite honestly, when we found out about it,   |
| 10 | and we understood it, we did the right thing. So I'm   |
| 11 | going to do the right thing again.   |
| 12 | MS. BASSILAKIS: If I may just rebut. So what   |
| 13 | you are saying is that you didn't know you weren't in  |
| 14 | compliance?  |
| 15 | MR. LAPLATNEY: That is what I'm saying.  |
| 16 | MS. BASSILAKIS: So what will stop that from  |
| 17 | happening again?   |
| 18 | MR. LAPLATNEY: Well, you know, you want to go  |
| 19 | back in history a little bit, I think you have to  |
| 20 | understand. Connecticut Yankee was not initially licensed  |
| 21 | to be single failure proof. We pre-dated those   |
| 22 | regulations.   |
| 23 | The initial design of the plant only has one   |
| 24 | suction line from the containment over to the RHR pumps.   |
| 25 | The initial design of the plant only had one spent fuel  |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>(202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

|    | 37   |
|----|--|
| 1  | cooling pump, and one spent fuel heat exchanger.   |
| 2  | This plant is not a modern plant. It is a 30   |
| 3  | year old design.   |
| 4  | So, for us, we have had to try to meet the   |
| 5  | regulations as best we could, and there is a program   |
| 6  | called SEP, which has compared us against the regulation,  |
| 7  | and quite frankly, we've done an awful lot of  |
| 8  | modifications.   |
| 9  | I'll point out, to rebut the other way, that   |
| 10 | Connecticut Yankee has voluntarily undertaken  |
| 11 | modifications since 1987, that have reduced the core melt  |
| 12 | frequency by magnitude.  |
| 13 | That gobbledygook means that we voluntarily,   |
| 14 | over the last decade, have made modifications to the plant   |
| 15 | that reduced the risk inherent in the plant. The core  |
| 16 | melt frequency is our measure of risk, which I know you  |
| 17 | are aware of.  |
| 18 | So I think we are doing the right thing.   |
| 19 | MR. FEIGENBAUM: A couple of points, here,  |
| 20 | regarding oversight of the facility. We are constituting   |
| 21 | a new and separate safety oversight board, with specific   |
| 22 | individuals from outside the company that have   |
| 23 | decommissioning and nuclear power operational experience.  |
| 24 | We have never had, in the recent past, a   |
| 25 | specific Connecticut Yankee focused oversight board, and   |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>(202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

| 1  | we are putting one together, and we hope to have that in   |
|----|--|
| 2  | place very shortly, that will have, again, special talents   |
| 3  | from people around the country, recognized experts to  |
| 4  | watch our performance, to look at our programs and our   |
| 5  | procedures, to make sure that we are meeting all   |
| 6  | requirements.  |
| 7  | In addition to that, we have a new quality   |
| 8  | oversight manager at the site, and he has brought in   |
| 9  | people from another company, completely separate from  |
| 10 | Northeast Utilities, to provide the day-to-day   |
| 11 | surveillance and auditing and inspection of activities in  |
| 12 | the plant.   |
| 13 | So I feel that this provides an additional   |
| 14 | level of assurance, in terms of compliance, to make sure   |
| 15 | that we meet the necessary standards, here, going forward.   |
| 16 | MS. BASSILAKIS: Thank you.   |
| 17 | MS. DEBOLD: Is there anyone else with a  |
| 18 | question? This gentleman right here in the front.  |
| 19 | MR. REARDON: Jerry Reardon, Newington,   |
| 20 | Connecticut.   |
| 21 | I have two questions for you. In regard to   |
| 22 | your statement about long-term liability, long-term  |
| 23 | storage of radioactive materials on-site, should Northeast   |
| 24 | Nuclear go belly up, are you planning for that   |
| 25 | contingency?   |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>(202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

| 11 | 39  |
|----|---|
| 1  | LAPLATNEY: Do you want to take that one,  |
| 2  | since it is financial?  |
| 3  | MR. FEIGENBAUM: Well, first of all,   |
| 4  | Connecticut Yankee is a jointly owned facility. There are   |
| 5  | 10 owners of Connecticut Yankee. We are obligated, going  |
| 6  | forward, whether it is Northeast Utilities or some  |
| 7  | subsequent company, whoever takes ownership of the assets,  |
| 8  | is responsible for decommissioning that plant, and taking   |
| 9  | it to its full decommissioned state.  |
| 10 | We have done some cost estimates, as I'm sure   |
| 11 | we mentioned earlier, that indicate based on the prompt   |
| 12 | dismantlement, that we need approximately 425 million   |
| 13 | dollars to complete the job, and that includes the 20   |
| 14 | years of storage of the fuel on-site.   |
| 15 | We have collected, through rates, at least  |
| 16 | half of that amount, about 200 million dollars. We have   |
| 17 | filed, as the gentleman pointed out, with FERC, to collect  |
| 18 | the remaining cost to complete the necessary trust funds  |
| 19 | to complete the decommissioning.  |
| 20 | We have filed with FERC, who will do a review,  |
| 21 | and hopefully grant the ability for us to collect those   |
| 22 | 에 전성적인 방법에 가지 않는 것 같은 것은 것이 있는 것이 있는 것이 있는 것 같이 많이 많이 많이 많이 많이 했다.  |

|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>(202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433  |

| 1  | 40   |
|----|--|
| 1  | power elsewhere, at a lower price, will pay for that   |
| 2  | difference.  |
| 3  | So we believe that whether it is Northeast   |
| 4  | Utilities or somebody else that takes ownership of assets,   |
| 5  | we are all responsible, under the law, to make sure that   |
| 6  | this plant is decommissioned safely.   |
| 7  | MR. REARDON: Question two. Recent newspaper  |
| 8  | articles indicated that the NRC will require CY to update  |
| 9  | the FSAR before proceeding with decommissioning.   |
| 10 | Could you elaborate on your plans of updating  |
| 11 | the FSAR?  |
| 12 | MR. LAPLATNEY: Jerry, that is very accurate.   |
| 13 | Not only do we have to revise the design basis of the  |
| 14 | systems required to support spent fuel operation, but part   |
| 15 | of that is we have to update the FSAR.   |
| 16 | We have to maintain an active FSAR right   |
| 17 | through decommissioning, as well as a set of tech specs.   |
| 18 | We will have a plan, we will have a security plan. It is   |
| 19 | the scope of the documents, the FSAR will be maintained.   |
| 20 | It has to be updated and maintained.   |
| 21 | MR. REARDON: Thank you.  |
| 22 | MS. DEBOLD: The gentleman right on the aisle,  |
| 23 | and then we will follow him by the woman to his right.   |
| 24 |  |
| 25 | Guntner, I'm director of the Reactor Watchdog Project for  |
|    | NEAL R. GROSS      COURT REPORTERS AND TRANSCRIBERS      1323 RHODE ISLAND AVE., N.W.    1323 RHODE ISLAND AVE., N.W.      (202) 234-4433    WASHINGTON, D.C. 20005-3701    (202) 234-4433 |

|    | 41  |
|----|---|
| 1  | Nuclear Information and Resource Service in Washington,   |
| 2  | D. C. and I think one of the reasons that we are here,  |
| 3  | today, up from Washington, has to do with what we believe   |
| 4  | to be a precedent that is likely to be set with the   |
| 5  | Connecticut Yankee decommissioning under the new NRC  |
| 6  | decommissioning rules.  |
| 7  | But what I'd like to address, just briefly,   |
| 8  | Mr. Feigenbaum's remarks with regard to the fact that the   |
| 9  | anticipation of 10 co-owners in Connecticut Yankee  |
| 10 | basically pooling their efforts to cover what we see, in  |
| 11 | Washington, as an ever escalating cost of decommissioning.  |
| 12 | I'm sure you are aware that the cost of   |
| 13 | decommissioning Yankee Rowe is a moving target right now.   |
| 14 | Ard, already, it is up to nearly 400 million for that much  |
| 15 | smailer plant.  |
| 16 | The concern that I just think that shouldn't  |
| 17 | be glossed over, here, is that this whole issue of  |
| 18 | decommissioning is occurring at a very unstable time for  |
| 19 | this industry, in terms of deregulation of the electricity  |
| 20 | market.   |
| 21 | And at the same time that your 10 co-owners   |
| 22 | who are all nuclear power operators, would be seeking to  |
| 23 | raise the cost to their consumers. There is going to be   |
| 24 | increasing competition, in New England, particularly, with  |
| 25 | regard to cheaper, safer, cleaner sources of electricity.   |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>1/202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

.

And this is part of the problem that we are 1 facing, because -- and as the gentleman brought up before 2 us, the risk is that you will default on an un-3 decommissioned plant leaving the whole issue of safety, 4 environmental quality, basically in limbo. 5 And it shouldn't just be glossed over with 6 just a casual remark. This gentleman had a very good 7 8 question. MR. FEIGENBAUM: Mr. Guntner, I'm not trying 9 to gloss over the issue. It is an important issue. The 10 Public Utility Commissions in the various states around 11 the country, are struggling with this issue of stranded 12 assets, of which decommissioning is part of that. 13 Certainly, the Federal Energy Regulatory 14 Commission is well aware of it, as are the utilities in 15 this nation. It is a responsibility that we have to make 16 sure that these facilities that provided power all these 17 years, are safely decommissioned. 18 We understand that, I think the public utility 19 commissioners around the country understand it. It is 20 being discussed on agendas on a daily basis. 21 And I believe that it will be worked out, 22 because it is the responsible thing to do, it is the only 23 thing that is necessary to do, and the monies that we 24 collect, I just want you to understand, that the monies 25 NEAL R. GROSS COURT REPORTERS AND TRANSCRIBERS 1323 RHODE ISLAND AVE., N.W. (202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433

|    | 43   |
|----|--|
| 1  | that are collected through rates, are put in trust funds,  |
| 2  | where this money is dedicated, it can't be touched by the  |
| 3  | utility for any other purpose than for decommissioning.  |
| 4  | And this is overseen and regulated quite a   |
| 5  | bit. So that money is protected, once it is collected,   |
| 6  | for the purpose of decommissioning. And, yes, the  |
| 7  | industry is going through restructuring, and there is  |
| 8  | deregulation and competition coming. It is a very  |
| 9  | important issue to us, and I think to all of you in the  |
| 10 | community, and this is an issue of stranded investment,  |
| 11 | and commitment for service provided in the past, that has  |
| 12 | to be dealt with.  |
| 13 | So it is important, and I'm not glossing over  |
| 14 | it, but I do believe that through the process that we have   |
| 15 | in the government of before we move into deregulation,   |
| 16 | that these issues will be fully aired and worked out, and  |
| 17 | resolved successfully, so that we can be sure that plants,   |
| 18 | like Connecticut Yankee, are decommissioned safely.  |
| 19 | MS. KATZ: Hi. My name is Debby Katz, I'm   |
| 20 | with the Citizen's Awareness Network.  |
| 21 | I have a couple of questions. I was a little   |
| 22 | confused about some of the things that you presented. Not  |
| 23 | that you were confusing, but it just raised some issues  |
| 24 | with it.   |
| 25 | You were talking about doing evaluations for   |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>(202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

| 11 | 44   |
|----|--|
| 1  | the issues that were out of compliance with the reactor,   |
| 2  | where the NRC is mandating that you do that.   |
| 3  | But I had some confusion. It sounds like you   |
| 4  | were possibly only going to do the compliance issues that  |
| 5  | would be effective under decommissioning, so that you were   |
| 6  | not going to correct all the 50.59 errors that were  |
| 7  | happening in the reactor, in total?  |
| 8  | MR. LAPLATNEY: That is correct.  |
| 9  | MS. KATZ: Which is correct?  |
| 10 | MR. LAPLATNEY: I'll try that again. That is  |
| 11 | correct. Yes, we will, right now we have to plan the   |
| 12 | configuration with a limited number of systems required to   |
| 13 | safely protect the fuel.   |
| 14 | We have deficiency, and I'll give you the most   |
| 15 | glaring one. Rosemary mentioned it, okay? We had a   |
| 16 | problem with the containment sump suction not being  |
| 17 | adequate to provide net positive suction to the RHR pumps  |
| 18 | on recirculation.  |
| 19 | That means that we may not be able to get  |
| 20 | enough water from the containment to cool the core after a   |
| 21 | large break LOCA accident.   |
| 22 | There is no longer fuel in the core, we have   |
| 23 | certified to the NRC that we will never put fuel in the  |
| 24 |  |
| 25 | community, to fix that deficiency. There is no reason to   |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE N.W<br>WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

| - 1 | 45   |
|-----|--|
| ı   | go and fix that deficiency.  |
| 2   | We should focus our resources on safely  |
| 3   | maintaining the fuel in the spent fuel building, and   |
| 4   | fixing the things that are a problem.  |
| 5   | MS. KATZ: Oh, I agree that maintaining the   |
| 6   | radiated fuel pool is terribly important. But since  |
| 7   | reactor workers are going to be decommissioning the  |
| 8   | reactor, just as they were operating the reactor, and they   |
| 9   | are going to have to cut it apart, and they are going to   |
| 10  | potentially be contaminated in the process, the issue of   |
| 11  | knowing how that reactor worked, and knowing what the  |
| 12  | blueprint really means, and whether it is accurate, would  |
| 13  | seem very important, given the kinds of exposures that   |
| 14  | we've seen at Rowe, in a reactor that was one-third the  |
| 15  | size.  |
| 16  | MR. LAPLATNEY: Okay. There were no   |
| 17  | deficiencies noted in the structural prints or any prints  |
| 18  | that or any design features that you would have to have  |
| 19  | knowledge in order to safely dismantle it.   |
| 20  | The deficiencies were noted in the operation,  |
| 21  | how does this system work, what is its flow, what is the .   |
| 22  | operating characteristics.   |
| 23  | The issues you raised, if there happens to be  |
| 24  | one out there, we will certainly deal with it, but we are  |
| 25  | being conservative, and we are including more things   |
|     | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>(202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

|    | 46   |
|----|--|
| 1  | rather than less in the things that we are dealing with.   |
| 2  | But something which clearly no longer applies,   |
| з  | is a waste of resources, and that is not appropriate.  |
| 4  | MR. FEIGENBAUM: Just to complete our answer  |
| 5  | on that, though. Jere talked about specific systems that   |
| 6  | we may be dismantling them, and it doesn't make sense to   |
| 7  | spend a lot of time and effort and money to update   |
| 8  | drawings and specifications.   |
| 9  | But there are some generic programmatic  |
| 10 | issues, such as our radiological control program, which we   |
| 11 | will fix generically across the board. Corrective action,  |
| 12 | that is when we find a problem, how it gets fixed and  |
| 13 | implemented throughout our processes.  |
| 14 | Those kind of generic issues will get  |
| 15 | addressed, everywhere, across the board.   |
| 16 | MS. KATZ: You see, from the Rowe experience,   |
| 17 | there were major problems, potentially, with the reactor   |
| 18 | vessel. When that reactor shut down, those problems  |
| 19 | disappeared. And, as of yet, what has happened with the  |
| 20 | Rowe reactor, has not fully been understood, even though   |
| 21 | it could be very helpful, to the industry, in terms of   |
| 22 | understanding embrittlement of reactor vessels.  |
| 23 | We are concerned that the problems that may  |
| 24 | have come up at Connecticut Yankee, will in fact be  |
| 25 | buried, as the problems in Rowe were buried.   |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>(202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

|    | 47   |
|----|--|
| 1  | But I want to ask you about what maintenance   |
| 2  | operations will be this is my last question.   |
| 3  | MS. DEBOLD: Well, the time if you will   |
| 4  | make it quick.   |
| 5  | MS. KATZ: It will be a very quick question,  |
| 6  | it may be a longer answer, I can't guarantee that.   |
| 7  | I wanted to know what maintenance operations   |
| 8  | would be taking place during 1997, on the reactor, by  |
| 9  | reactor workers.   |
| 10 | MR. LAPLATNEY: The only activities that will   |
| 11 | occur on the reactor vessel, as I see it now, is we may  |
| 12 | take a radiation survey of the internals of the reactor  |
| 13 | vessel, in order to make the calculations to safely ship   |
| 14 | it.  |
| 15 | So a radiological survey that would be   |
| 16 | performed under water. The people are on top of the  |
| 17 | water, the shielding protects them from the vessel, so I   |
| 18 | would characterize it as very low risk, compared to some   |
| 19 | activities, such as assembling and disassembling the   |
| 20 | reactor.   |
| 21 | MS. KATZ: So there is no other maintenance   |
| 22 | work going on?   |
| 23 | MR. LAPLATNEY: We do not need to maintain a  |
| 24 | reactor that is no longer going to be used, so we will not   |
| 25 | waste exposure time or money on that.  |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>(202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

|    | 48  |
|----|---|
| 1  | MS. DEBOLD: I did say that I would call on  |
| 2  | one other person at this section, so I will call you to                           |
| 3  | the microphone, then we will judge whether we move on to                          |
| 4  | the second part of the program.   |
| 5  | MR. FARBER: Doug Farber of Middletown,  |
| 6  | Connecticut.  |
| 7  | In the event that less than rational minds  |
| 8  | prevail in the method of decommissioning chosen is prompt                         |
| 9  | dismantlement this is a multi-part question. What is                              |
| 10 | the anticipated mode of transporting contaminated                                 |
| 11 | materials and components from the site.   |
| 12 | And will the public be made aware prior to  |
| 13 | transportation, as well as the route being taken? And                             |
| 14 | finally, what safeguards will be taken against, you know,                         |
| 15 | not that I want to sound paranoid, but vandalism and/or                           |
| 16 | terrorism.  |
| 17 | MR. FEIGENBAUM: We have made no decisions as                                      |
| 18 | far as method of transportation, yet. And I think this is                         |
| 19 | the kind of issue, because it is an important issue,                              |
| 20 | about, you know, barges or trucks going through the                               |
| 21 | community, and what is the best way to do that with the                           |
| 22 | least risk and the least environmental impact.                                    |
| 23 | This is the kind of an issue that we would  |
| 24 | expect the citizens, community advisory committee to help                         |
| 25 | us with, to air before we move forward, to talk about the                         |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W. |

WASHINGTON, D.C. 20005-3701

(202) 234-4433

(202) 234-4433

|    | 49   |
|----|--|
| 1  | way we are going to transport these major components, the  |
| 2  | way it is going to go through the town, and get feedback   |
| 3  | from the community about their feelings about that, and  |
| 4  | how we should look at other options.   |
| 5  | So I would say that we made no decisions in  |
| 6  | that regard. We will get input from the community before   |
| 7  | we go forward and make any decisions in that regard.   |
| 8  | MS. DEBOLD: I'd like to move on to the NRC   |
| 9  | part of this, just to try to keep to our time schedule.  |
| 10 | Save your questions. At the end, I'm sure, the people  |
| 11 | from Northeast Utilities will be happy to answer them.   |
| 12 | I've been a little flexible. Hopefully, some   |
| 13 | of the questions that you asked at this point will not   |
| 14 | have to be asked again later.  |
| 15 | At this point, I would very much like to ask -   |
| 16 | - I've got to look at my Mike Masnik, from the NRC.  |
| 17 | DR. MASNIK: Good evening. My name is Mike  |
| 18 | Masnik, I'm the section chief of the decommissioning   |
| 19 | section of the U.S. Nuclear Regulatory Commission. I work  |
| 20 | in Rockville, Maryland, at NRC headquarters.   |
| 21 | I hope that most of you have gotten a copy of  |
| 22 | a handout of my slides. Unfortunately, I didn't expect   |
| 23 | quite so many folks tonight, and I did not provide enough  |
| 24 | copies. However, it will be bound in the transcript.   |
| 25 | Also, what we will do is we will put several   |
|    | NEAL R. GROSS      COURT REPORTERS AND TRANSCRIBERS      1323 RHODE ISLAND AVE., N.W.      (202) 234-4433      WASHINGTON, D.C. 20005-3701      (202) 234-4433 |

. 9

|    | 50   |
|----|--|
| 1  | sheets of paper up on the table there, and if you would  |
| 2  | like a copy of the slides, you just leave your name and  |
| 3  | address and we will mail them to you.  |
| 4  | I have a number of other . ~ people here with  |
| 5  | me tonight, and I would like to take a few minutes to  |
| 6  | introduce them.  |
| 7  | Steve Dembek, also from NRC headquarters, is   |
| 8  | the immediate task project management for the Haddam Neck  |
| 9  | plant. Mr. Mort Fairtile, who is the current   |
| 10 | decommissioning project manager for Haddam Neck. Mort is   |
| 11 | an important person in the decommissioning of the plant.   |
| 12 | He is the principal point of contact for the NRC.  |
| 13 | Your second slide has all the pertinent  |
| 14 | information for contacting Mort, if you have any questions   |
| 15 | about the plant.   |
| 16 | Also with me, today, is William J. Raymond,  |
| 17 | who is the Senior Resident Inspector stationed full-time   |
| 18 | at Haddam Neck. Mr. Raymond's immediate supervisor, John   |
| 19 | Rogge, and his branch chief, John White, from our regional   |
| 20 | office in King of Prussia, Pennsylvania, is also with us.  |
| 21 | Also Mr. Dave Matthews, the Deputy Director of   |
| 22 | the Division of Reactor Program Management. One of our   |
| 23 | senior managers out of Rockville Maryland.   |
| 24 | And Mr. Gene Holler, an attorney from the NRC  |
| 25 | headquarters, with the Office of General Counsel. Gene is  |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>(202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433   |
|    | The second secon |

|    | 51   |
|----|--|
| 1  | an expert on the legal aspects of decommissioning, and has   |
| 2  | been an attorney on several recent shutdown reactors.  |
| 3  | Also with the NRC is Diane Screnci, also from  |
| 4  | King of Prussia, and she works in the NRC Office of Public   |
| 5  | Affairs.   |
| 6  | And finally, I have also brought along Ms.   |
| 7  | Etoy Hylton, from our branch, who is our licensing   |
| 8  | assistant.   |
| 9  | As you can see, we've brought a lot of folks,  |
| 10 | here, tonight, primarily to be sure that we have the right   |
| 11 | people here to answer your questions, but also to listen   |
| 12 | first-hand to your concerns about the transition of Haddam   |
| 13 | Neck from an operating plant to a decommissioning plant.   |
| 14 | The purpose of today's public meeting is to  |
| 15 | provide you with a little background on decommissioning of   |
| 16 | nuclear power facilities, and to share with you the NRC's  |
| 17 | experiences in our role of oversight of decommissioning of   |
| 18 | power reactors. And, finally, to explain the Commission's  |
| 19 | new regulations on decommissioning.  |
| 20 | I first want to talk a little about  |
| 21 | decommissioning of power reactors. There are definite  |
| 22 | stages in the life of a nuclear power plant. There is the  |
| 23 | planning, the construction, the licensing, the operation,  |
| 24 | and finally decommissioning.   |
| 25 | Decommissioning is the last phase in the life  |
|    | NEAL R. GROSSCOURT REPORTERS AND TRANSCRIBERS1323 RHODE ISLAND AVE., N.W.(202) 234-4433WASHINGTON, D.C. 20005-3701(202) 234-4433 |

\*

| 1  | 52   |
|----|--|
| 1  | of a nuclear facility, and its purpose is to remove the          |
| 2  | facility safely from service, and reduce the residual            |
| 3  | radioactivity of the facility, and the site, to a level          |
| 4  | that permits the release of the site, and termination of         |
| 5  | the NRC license.   |
| 6  | Now, this definition is important as to what                     |
| 7  | it says, and what it does not say. The focus of the NRC          |
| 8  | is limited, solely, to the removal of the radiological           |
| 9  | hazards resulting from operation of the facility.                |
| 10 | The fact that the licensee may choose to spend                   |
| 11 | additional funds to remove buildings from the facility, is       |
| 12 | of interest to us, only if the material that is being            |
| 13 | disposed of is radioactive.                                      |
| 14 | Now, once the residual levels of radioactive                     |
| 15 | materials are reduced to below certain criteria, either by       |
| 16 | decontamination, or disposal off-site, then the NRC              |
| 17 | license for the facility and site can be terminated.             |
| 18 | Before the license is terminated, the licensee                   |
| 19 | has to perform an extensive, final survey that proves to         |
| 20 | the NRC that the site is clean enough to terminate the           |
| 21 | license.   |
| 22 | The NRC may do a confirmatory survey to be                       |
| 23 | certain that the site is clean enough. Once the license          |
| 24 | is terminated, the NRC no longer has any regulatory              |
| 25 | oversight over the facility or site.                             |
|    | NEAL R. GROSS  |
|    | COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W. |

|    | 53  |
|----|---|
| 1  | This is the ultimate goal with  |
| 2  | decommissioning, the termination of the license.  |
| з  | Now, there is one other key phrase in the   |
| 4  | definition of decommissioning, and that is removing the   |
| 5  | facility safely from service. Once the facility   |
| 6  | permanently ceases power operation, there are a number of   |
| 7  | systems that still are required to protect public health  |
| 8  | and safety.   |
| 9  | They relate, principally, to the safe storage   |
| 10 | of irradiated spent fuel. The spent fuel pool and its   |
| 11 | associated systems are the principal structure systems or   |
| 12 | components that must be maintained operational.   |
| 13 | Licensee activities that result in disposal of  |
| 14 | contaminated and activated materials must also be   |
| 15 | conducted in such a way as to safeguard public health and   |
| 16 | safety, and to protect the environment.   |
| 17 | Now, you may have noticed that I have not said  |
| 18 | anything about disposal of the spent fuel. The spent fuel   |
| 19 | will ultimately be disposed of in a U.S. Department of  |
| 20 | Energy high level waste burial site.  |
| 21 | Today, however, the U.S. Department of Energy   |
| 22 | does not have an approved burial site for disposal of the   |
| 23 | spent fuel. Therefore, the fuel will remain on the site   |
| 24 | until a decision is made as to its disposal.  |
| 25 | Initially, when the spent fuel is removed from  |
|    | NEAL R. GROSS   |
|    | COURT REPORTERS AND TRANSCRIBERS  |
|    | 1323 RHODE ISLAND AVE., N.W.        (202) 234-4433      WASHINGTON, D.C. 20005-3701      (202) 234-4433 |

| 1  | 24   |
|----|--|
| 1  | the reactor, it is both highly radioactive, and it   |
| 2  | generates a lot of heat. Over time, the radioisotopes  |
| 3  | decay, and the fuel becomes less radioactive, and the  |
| 4  | amount of heat generated decreases dramatically.   |
| 5  | However, even after many years, the radiation  |
| 6  | levels of the spent fuel are quite high, and radiation   |
| 7  | shielding must be provided.  |
| 8  | What most licensees are doing, are   |
| 9  | constructing on-site storage facilities that store the   |
| 10 | fuel in a dry condition, in large casks. These dry   |
| 11 | storage facilities are thoroughly reviewed by the NRC  |
| 12 | prior to approval.   |
| 13 | The storage facility is, typically, only a   |
| 14 | couple of acres in size, and requires minimal maintenance.   |
| 15 | Concrete and steel shielding reduces the radiation to very   |
| 16 | low levels, and the storage containers are constructed so  |
| 17 | that there is no leakage of radioisotopes to the   |
| 18 | environment.   |
| 19 | So to summarize, decommissioning is the  |
| 20 | removal of the facility from service, reducing the levels  |
| 21 | of radioactivity of the facility and site, the levels that   |
| 22 | will ultimately result in termination of the license.  |
| 23 | NRC oversight activities relate directly to  |
| 24 | the continued safe storage of the irradiated fuel, and the   |
| 25 | proper decontamination and dismantlement of the facility.  |
|    | NEAL R. GROSS      COURT REPORTERS AND TRANSCRIBERS      1323 RHODE ISLAND AVE., N.W.      (202) 234-4433      WASHINGTON, D.C. 20005-3701      (202) 234-4433 |

| 1  | Now that I've provided you with some                      |
| 2  | background on the concept of decommissioning, I'd like to |
| 3  | talk a little about your experience with the actual       |
| 4  | decommissioning of other power reactors in the United     |
| 5  | States.   |
| 6  | We've had 15 nuclear power reactors                       |
| 7  | permanently cease operation, and begin decommissioning    |
| 8  | since the early 1960's. These plants, their location and  |
| 9  | status, are given on the next slide.                      |
| 10 | I realize that it is difficult, for those of              |
| 11 | you in the back, to read it. And, again, if you do not    |
| 12 | have a copy of the slides and you would like one,         |
| 13 | immediately after the presentation you can sign up for    |
| 14 | one.  |
| 15 | As you can see, we've had a fair amount of                |
| 16 | experience in the area of decommissioning oversight. A    |
| 17 | number of plants are in long term storage. A number are   |
| 18 | actively being decontaminated and dismantled.             |
| 19 | And one, the Shoreham plant, has actually had             |
| 20 | its license terminated. The Fort St. Vrain plant in       |
| 21 | Colorado, is also very close to having its license        |
| 22 | terminated, as well.                                      |
| 23 | You will notice under the column, "status" I              |
| 24 | indicate for the most part, that we have facilities that  |
| 25 | are either in long term storage, or decontamination and   |
|    | NEAL R. GROSS   |
|    | COURT REPORTERS AND TRANSCRIBERS                          |
|    | 1323 RHODE ISLAND AVE., N.W.                              |
|    | (202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

1 dismantlement.

| 2  | I would like to talk a little about these two              |
|----|--|
| 3  | options. Our regulations allow licensees, after            |
| 4  | permanently ceasing operations, to decide if they would    |
| 5  | like to begin dismantlement immediately, or if they prefer |
| 6  | to store the facility in a safe, stable condition, for     |
| 7  | some period of time, before they begin dismantling.        |
| 8  | Or they may conduct a partial dismantlement,               |
| 9  | followed by a storage period, ending with final            |
| 10 | dismantlement. Our regulations say that under normal       |
| 11 | circumstances, the licensee has 60 years to completely     |
| 12 | decommission the facility.                                 |
| 13 | The decision as to store or dismantle                      |
| 14 | immediately, as I said, is a licensee decision. Some       |
| 15 | years ago we performed a generic environmental impact      |
| 16 | statement that looked at decommissioning options, and we   |
| 17 | determined that as long as the licensee complied with our  |
| 18 | regulations, either option, or a combination was           |
| 19 | acceptable.  |
| 20 | One of the principal reasons for arriving at               |
| 21 | this conclusion is because the risk to the public health   |
| 22 | and safety and the environment associated with licensee    |
| 23 | activities at a nuclear power plant undergoing             |
| 24 | decommissioning, is significantly less, than those at an   |
| 25 | operating facility.  |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS          |

1323 RHODE ISLAND AVE., N.W. WASHINGTON, D.C. 20005-3701

(202) 234-4433

|    | D /  |
|----|--|
| 1  | This risk continues to decrease over time, due   |
| 2  | to radioactive decay, which reduces both the radiation   |
| 3  | levels, and the heat generated by the spent fuel.  |
| 4  | This reduction in risk, after a period of  |
| 5  | time, is so significant, that many of the regulatory   |
| 6  | requirements associated with plant operation are no longer   |
| 7  | needed.  |
| 8  | For example, off-site emergency planning in  |
| 9  | many of the detailed technical requirements applicable   |
| 10 | only to operating plants. These regulatory requirements  |
| 11 | are generally reduced gradually, based on a detailed   |
| 12 | evaluation by the NRC staff of the risk.   |
| 13 | Another example of our response to the   |
| 14 | reduction in risk is the ultimate elimination of the full  |
| 15 | time resident inspector at a site, and the reliance on   |
| 16 | inspections conducted by NRC specialists in the field of   |
| 17 | decommissioning.   |
| 18 | Some regulatory requirements are eliminated  |
| 19 | immediately when the plant permanently ceases operation.   |
| 20 | An example would be the monitoring program for reactor   |
| 21 | vessel embrittlement.  |
| 22 | So to summarize, there have been a number of   |
| 23 | power reactors in the United States that are permanently   |
| 24 | shut down, and are in the process of decommissioning. The  |
| 25 | NRC staff has considerable experience in the oversight of  |
|    | NEAL R. GROSS      COURT REPORTERS AND TRANSCRIBERS      1323 RHODE ISLAND AVE., N.W.      (202) 234-4433      WASHINGTON, D.C. 20005-3701      (202) 234-4433 |

.

-11

57|

1 these activities.

| 2  | There is a gradual reduction in regulatory   |
|----|--|
| 3  | requirements on the licensees, as the decommissioning  |
| 4  | progresses. And this reduction is based on significant   |
| 5  | reduction in risk to the public due to permanent cessation   |
| 6  | of power generation operation.   |
| 7  | I next want to talk a little about the   |
| 8  | regulations governing decommissioning.   |
| 9  | Now, the first comprehensive regulations   |
| 10 | dealing with reactor decommissioning were promulgated in   |
| 11 | 1988. Based on the experience gained over the next seven   |
| 12 | years, the Commission extensively revised the regulations  |
| 13 | in the summer of 1996.   |
| 14 | In July of 1996, the NRC published a final   |
| 15 | rule making that substantially changed the decommissioning   |
| 16 | process. Perhaps the easiest way to explain how the new  |
| 17 | decommissioning rule works is by describing the process of   |
| 18 | decommissioning from the regulatory perspective, for a   |
| 19 | hypothetical nuclear power reactor that is nearing the end   |
| 20 | of its normal life.  |
| 21 | The licensee has decided not to pursue license   |
| 22 | renewal, so the reactor is destined to permanently shut  |
| 23 | down. The process is summarized in the next slide, and we  |
| 24 | will talk a little about each of these steps.  |
| 25 | Each power reactor licensee will, about five   |
|    | NEAL R. GROSSCOURT REPORTERS AND TRANSCRIBERS1323 RHODE ISLAND AVE., 1344(202) 234-4433WASHINGTON, D.C. 20005-3701(202) 234-4433 |

| 1  | 59   |
|----|--|
| 1  | years prior to the projected end of operations, submit a   |
| 2  | preliminary decommissioning cost estimate. The purpose of  |
| 3  | this cost estimate is to force the licensee to avaluate  |
| 4  | how much money it would need to decommission the facility,   |
| 5  | and compare it to how much it has in its decommissioning   |
| 6  | trust fund.  |
| 7  | If the amount of money is inadequate, the  |
| 8  | licensee has approximately five years to adjust the amount   |
| 9  | of money they have in their decommissioning trust fund.  |
| 10 | The decommissioning trust fund is a fund that  |
| 11 | each licensee is required, by our regulations, to set up   |
| 12 | to assure that there is sufficient funds to radiologically   |
| 13 | decommission the facility when the time comes.   |
| 14 | Our regulations require about 350 to 400   |
| 15 | million dollars, in today's dollars, for the radiological  |
| 16 | decommissioning of an average 1,000 megawatt electric  |
| 17 | reactor.   |
| 18 | Typically these funds cannot be used for   |
| 19 | anything other than radiological clean-up of the facility.   |
| 20 | Obviously, if a plant shuts down prematurely, as did   |
| 21 | Haddam Neck, it cannot submit a preliminary cost estimate.   |
| 22 | However, they still are required to collect  |
| 23 | the funds necessary for decommissioning the facility.  |
| 24 |  |
| 25 | shut down their reactor, and they cease power generating   |
|    | NEAL R. GROSS      COURT REPORTERS AND TRANSCRIBERS      1323 RHODE ISLAND AVE N.W.      (202) 234-4433      WASHINGTON, D.C. 20005-3701      (202) 234-4433 |

.

operations.

1

The reactor is permanently shut down. The licensee is required to submit written certification to the NRC, within 30 days of the decision to permanently shut down.

The date of cessation must be specified. Once the fuel has permanently been removed from the reactor vessel, the licensee will submit a second certification to that effect.

Then the licensee will no longer be allowed operation of the reactor, or allow the movement of fuel back into the reactor vessel. This eliminates the requirement to adhere to other certain regulatory requirements only necessary for power reactors.

Once these two certifications have been received by the NRC, the licensee can begin some limited decommissioning activities, and can begin reducing its licensing requirements on the facility.

For example, the regulations require certain minimum staffing requirements in the control room of an operating reactor. Once the two certifications have been received, the licensee may apply to amend its license to reduce the staffing requirements, and revise the qualifications to certify fuel handlers, based on the assumption that the licensed power reactor operators are

(202) 234-4433

NEAL R. GROSS COURT REPORTERS AND TRANSCRIBERS 1323 RHODE ISLAND AVE., N.W. WASHINGTON, D.C. 20005-3701

(202) 234-4433

| 1  | no longer needed.  |
|----|--|
| 2  | After receiving the two certifications, the  |
| 3  | NRC staff will likely hold a public meeting in the   |
| 4  | vicinity of the nuclear site, to discuss the   |
| 5  | decommissioning process with interested members of the   |
| 6  | public. That is what we are doing tonight.   |
| 7  | Within two years of permanently ceasing  |
| 8  | operations, the licensee must submit a post-shutdown   |
| 9  | decommissioning activities report, PSDAR, to the NRC, with   |
| 10 | a copy to the affected states.   |
| 11 | The PSDAR must include a description of the  |
| 12 | planned decommissioning activities, along with a schedule  |
| 13 | for their accomplishment, an estimate of the expected  |
| 14 | costs, and a discussion that provides the reasons for  |
| 15 | concluding that the environmental impacts associated with  |
| 16 | site-specific decommissioning activities will be bounded   |
| 17 | by appropriate, previously issued environmental impact   |
| 18 | statements.  |
| 19 | The NRC shall notice the receipt of the PSDAR  |
| 20 | in the Federal Register, and make it available to members  |
| 21 | of the public. The NRC staff will hold a public meeting  |
| 22 | in the vicinity of the nuclear plant to allow the licensee   |
| 23 | to present their plans for decommissioning of the  |
| 24 | facility, to describe what the role of the NRC in the  |
| 25 | decommissioning of the facility will be, and to listen and   |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>(202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

.

| 1  | 62  |
|----|---|
| 1  | respond to questions from members of the public.                                  |
| 2  | The licensee is prohibited from undertaking                                       |
| 3  | any major decommissioning activities until 90 days after                          |
| 4  | they submit the PSDAR. The purpose of the 90 day period                           |
| 5  | is to allow sufficient time for the NRC staff to examine                          |
| 6  | the PSDAR, to publish notification of the receipt in the                          |
| 7  | Federal Register, to hold public meeting in the vicinity                          |
| 8  | of the facility to discuss the licensee's plans for                               |
| 9  | decommissioning, and to conduct any necessary safety                              |
| 10 | inspections prior to initiation of major decommissioning                          |
| 11 | activities.   |
| 12 | Ninety days after the NRC receives the PSDAR,                                     |
| 13 | and after certification of permanent cessation of                                 |
| 14 | operations, and permanent removal of fuel from the reactor                        |
| 15 | vessel, the licensee could begin to perform major                                 |
| 16 | decommissioning activities, without specific NRC approval,                        |
| 17 | using a process described in Section 50.59 of the                                 |
| 18 | Commission's regulations.   |
| 19 | The new rule also imposed some additional   |
| 20 | requirements on decommissioning activities by licensees.                          |
| 21 | The licensee is prohibited from performing any                                    |
| 22 | decommissioning activity that would foreclose the release                         |
| 23 | of the site for possible unrestricted use, or result in                           |
| 24 | significant environmental impacts not previously reviewed,                        |
| 25 | or result in there no longer being reasonable assurance                           |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W. |

|    | 63  |
|----|---|
| 1  | that adequate funds would be available for  |
| 2  | decommissioning.  |
| 3  | So now the road is clear for the licensee to  |
| 4  | begin decommissioning in earnest. The PSDAR may call for  |
| 5  | the nuclear reactor to be placed in long term storage. So   |
| 6  | systems would be drained, certain electrical systems  |
| 7  | deactivated, and the nuclear reactor placed in a safe,  |
| 8  | stable condition.   |
| 9  | Or the PSDAR may call for immediate   |
| 10 | dismantlement, in which case the licensee would begin to  |
| 11 | take the nuclear reactor apart, and ship the contaminated   |
| 12 | material to a burial site.  |
| 13 | This activity is expected to take several   |
| 14 | years. The NRC staff would actively be involved in the  |
| 15 | areas of reducing unnecessary regulatory requirements, on-  |
| 16 | site inspections, and licensee documentation of the safety  |
| 17 | basis of their activities.  |
| 18 | The NRC staff would continue to have  |
| 19 | interactions with the public and the affected states.   |
| 20 | Two years prior to the planned termination of   |
| 21 | the license, the licensee would submit a license  |
| 22 | termination plan. The license termination plan would  |
| 23 | include a site characterization, identification of  |
| 24 | remaining dismantlement activities, plans for site  |
| 25 | remediation, detailed plans for the final radiation   |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

÷

| 1  | 64  |
|----|---|
| 1  | survey, a description of the end use of the site if it is   |
| 2  | restricted, and an updated site-specific estimate of  |
| 3  | remaining decommissioning costs, and a supplement to the  |
| 4  | environmental report describing any new information or  |
| 5  | significant environmental change associated with the  |
| 6  | licensee's proposed termination activities.   |
| 7  | The NRC staff would, again, notice the receipt  |
| 8  | of the licensee termination plan in the Federal Register;   |
| 9  | make the plan available for public comments, and offer an   |
| 10 | opportunity for a hearing on the plan.  |
| 11 | The NRC would also hold a public meeting in   |
| 12 | the vicinity of the site to allow the licensee to explain   |
| 13 | the license termination plan to the public, and to discuss  |
| 14 | the remaining NRC activities associated with terminating  |
| 15 | the license, and of course, allow the public to ask   |
| 16 | questions.  |
| 17 | The NRC approval of the license termination   |
| 18 | plan will be by license amendment, which would authorize  |
| 19 | implementation of the license termination plan.   |
| 20 | The licensee would then continue to clean up  |
| 21 | the site, perform the final radiation survey. The NRC   |
| 22 | staff would continue to provide oversight during this   |
| 23 | process. Next slide.  |
| 24 | The Commission shall terminate the license if   |
| 25 | it determines that the remaining activities have been   |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

| 1  | 65   |
|----|--|
| 1  | performed in accordance with the approved license  |
| 2  | termination plan. And that the terminal radiation survey   |
| 3  | and associated documentation demonstrates that the   |
| 4  | facility and site are suitable for release.  |
| 5  | Now, the above decommissioning process, from   |
| 6  | permanent cessation of operations to license termination,  |
| 7  | could take, at a minimum, 3 to 5 years, and at a maximum,  |
| 8  | 60 years, since the regulations allow for a licensee to  |
| 9  | take 60 years.   |
| 10 | It would likely take, if the licensee pursues  |
| 11 | immediate dismantlement, and commits to a reasonable level   |
| 12 | of effort comparable with what we've seen at other   |
| 13 | facilities to date, approximately ten years, with  |
| 14 | approximately 150 to 200 people on-site, using contractors   |
| 15 | to do much of the work.  |
| 16 | I'd like to end with a few specific comments   |
| 17 | on Haddam Neck. The licensee has notified the NRC of its   |
| 18 | permanent cessation of operations, and permanent removal   |
| 19 | of fuel from the reactor in a letter dated December 5th,   |
| 20 | 1996.  |
| 21 | They now have two years to submit a PSDAR. As  |
| 22 | we've heard tonight, they probably will submit that  |
| 23 | sometime this summer, or late this summer.   |
| 24 | During that time, or during the time between   |
| 25 | now and when they submit the PSDAR, they will submit a   |
|    | NEAL R. GROSS      COURT REPORTERS AND TRANSCRIBERS      1323 RHODE ISLAND AVE., N.W.      (202) 234-4433      WASHINGTON, D.C. 20005-3701      (202) 234-4433 |

| 1  | number of amendment requests to their license, asking for  |
|----|--|
| 2  | elimination of unnecessary regulatory requirements.  |
| 3  | For example, we would expect the licensee to   |
| 4  | submit an amendment request removing from the license  |
| 5  | those requirements that deal with operations. Now,   |
| 6  | depending on what the licensee plans to do, the licensee   |
| 7  | will either begin planning for dismantlement, or place the   |
| 8  | plant in a safe stable condition for long-term storage.  |
| 9  | That concludes my prepared remarks, and I  |
| 10 | would like to entertain questions at this time. Yes, in  |
| 11 | the front, there?  |
| 12 | MR. BLANCH: My name is Paul Blanch, from West  |
| 13 | Hartford, Connecticut, ex-employee of Northeast Utilities.   |
| 14 | Again, a lot of mistrust here, between the   |
| 15 | public, the NRC and Northeast Utilities, and what we've  |
| 16 | heard tonight, really, doesn't further instill that trust.   |
| 17 | We are calling this a decommissioning plan.  |
| 18 | This is a decommissioning meeting. But, as you said  |
| 19 | yourself, and out of the rule, it says, the NRC definition   |
| 20 | of decommissioning excludes interim storage of spent   |
| 21 | reactor fuel.  |
| 22 | What is actually being accomplished here is a  |
| 23 | transition from a power operation license part 50, to the  |
| 24 | establishment of a high level waste site.  |
| 25 | Now, the decommissioning rule does not address   |
|    | NEAL R. GROSS      COURT REPORTERS AND TRANSCRIBERS      1323 RHODE ISLAND AVE., N.W.      (202) 234-4433      WASHINGTON, D.C. 20005-3701      (202) 234-4433 |

1 the storage, the safeguards, and so on and so forth, of 2 the spent fuel. That comes under another regulation that 3 was designed specifically for the storage of high level 4 waste and spent fuel, 10CFR72.

5 What the NRC is doing here, with this new 6 decommissioning rule, is ignoring, and I do mean ignoring, 7 the requirements for storage of high level waste. We have 8 specific regulatory requirements, in part 72, that 9 require, number one, a safety analysis of the dangers of 10 the spent fuel, such that you can determine whether 11 emergency planning is or is not required.

What I would like to hear, from the NRC, is that because you are establishing a high level waste site, here, how can you in good conscience ignore the requirements of 10CFR72?

DR. MASNIK: Well, as you've said, there are two separate sets of regulations, here, of course. And nothing in the decommissioning -- the new decommissioning rule leads me to believe that we are ignoring the other regulations.

The other regulations are still in force. The licensee can safely store the fuel in the spent fuel pool for an extended period of time. That is permitted by the regulations. If they should choose to go to a dry storage option, they would be required by the regulations to

NEAL R. GROSS

WASHINGTON, D.C. 20005-3701

COURT REPORTERS AND TRANSCRIBERS 1323 RHODE ISLAND AVE., N.W.

(202) 234-4433

| 1  | 68   |
|----|--|
| 1  | submit a license application, just like every other  |
| 2  | licensee, and that license application would be reviewed,  |
| 3  | and if it is determined that the proposal is acceptable,   |
| 4  | under the regulations, they would be licensed to maintain  |
| 5  | an independent spent fuel storage facility.  |
| 6  | MR. BLANCH: But, again, part 72 addresses any  |
| 7  | type of storage. You are alluding, or trying to convince   |
| 8  | the public that it only applies to dry storage. It   |
| 9  | applies to any storage of spent fuel.  |
| 10 | These are the requirements that were   |
| 11 | essentially approved by Congress, dictated by Congress,  |
| 12 | and now the Nuclear Regulatory Commission is going to  |
| 13 | license a high level waste facility here, and not apply  |
| 14 | the regulations. This is ludicrous.  |
| 15 | We have regulations, we have a purpose, and as   |
| 16 | a member of the public, I think that we need to impose   |
| 17 | those regulations, because that is what we are winding up  |
| 18 | with, for probably the next 50 years.  |
| 19 | MR. MCCORMICK: I would like to know, from the  |
| 20 | NRC my name is Tom McCormick if NU could do anything   |
| 21 | that would result in them not being determined to be of a  |
| 22 | fit corporate character to receive a license from you, to  |
| 23 | decommission this plant.   |
| 24 | We know they lie in public, consistently,  |
| 25 | about safety matters, telling us there is containment  |
|    | NEAL R. GROSS      COURT REPORTERS AND TRANSCRIBERS      1323 RHODE ISLAND AVE., N.W.      (202) 234-4433      WASHINGTON, D.C. 20005-3701      (202) 234-4433 |

.

1 accidents, when clearly the NRC, in one of your studies, 2 is saying there is at least five pathways out, not even 3 including going through the steam generator, directly to 4 the environment.

5 So they lie about that. They lie, lie about 6 radiatic dangers. They keep telling us safe, safe, safe. 7 Yet when the International Commission on Radiation 9 Protection tells us at least 400 people die, per year, per 9 reactor year, from the mining of the fuel alone, they say 10 that is safe.

We know they lie to the state of Connecticut, consistently, consistently, consistently, on matters involving the cost of Millstone III. The plant cost 4 billion dollars, and I followed this very closely, the best I can remember NU ever saying that plant was going to cost was something like 2.6 billion dollars.

I think that if you are a company, and you are building a plant at 2.6, and it comes in more like 3.8, you have a fiscal management problem, perhaps?

Do you foresee any circumstance where you would not allow them a license? They are being investigated by the Attorney General for criminal activities regarding polluting the Long Island Sound. We know that there is a strong possibility that they are going to receive further fines from you, and

> NEAL R. GROSS COURT REPORTERS AND TRANSCRIBERS 1323 RHODE ISLAND AVE., N.W. WASHINGTON, D.C. 20005-3701

|    | 70   |
|----|--|
| 1  | possible other criminal indictments from the Attorney  |
| 2  | General of the Unit'sd States, for material false witnesses  |
| 3  | regarding the sump screening at Connecticut Yankee.  |
| 4  | Is there anything they can do, or do they have   |
| 5  | carte blanche, sir?  |
| 6  | DR. MASNIK: They do have a license, and we   |
| 7  | are charged, as the NRC, to assure that the licensee   |
| 8  | either operates the facility, or in this case, dismantles  |
| 9  | the facility in a safe manner.   |
| 10 | And we will continue our oversight of the  |
| 11 | licensee, and obviously there have been some problems that   |
| 12 | have been identified in the past, and they are serious,  |
| 13 | and we acknowledge that.   |
| 14 | But we will provide the oversight to assure  |
| 15 | that the activities that are planned will be carried out   |
| 16 | in a safe manner. I guess  |
| 17 | MS. DEBOLD: Would you step up to the mike and  |
| 18 | repeat the question, please?   |
| 19 | MR. MCCORMICK: The questions are, what could   |
| 20 | Northeast Utilities do, as a holding company, to prevent   |
| 21 | you from granting them a license, in this case? The  |
| 22 | senior stock is going down, down, down, they could end up  |
| 23 | in bankruptcy court.   |
| 24 | Do you think they are a stable corporation?  |
| 25 | What could prevent it? Just give me a little list, four  |
|    | NEAL R. GROSS      COURT REPORTERS AND TRANSCRIBERS      1323 RHODE ISLAND AVE., N.W.      (202) 234-4433      WASHINGTON, D.C. 20005-3701      (202) 234-4433 |

|    | 71   |
|----|--|
| 1  | or five factors that would prevent, if proven, different   |
| 2  | factors of granting them a license to carry forward.   |
| 3  | DR. MASNIK: Well, first of all, they have a  |
| 4  | license, there is no granting  |
| 5  | MR. MCCORMICK: But they will need a new  |
| 6  | license, they will need a renewal.   |
| 7  | DR. MASNIK: There is no renewal of the   |
| 8  | license planned, here. They are in the process of  |
| 9  | terminating the license. I guess, you know, ultimately if  |
| 10 | the situation is such that we no longer have any   |
| 11 | confidence that the licensee can safely dismantle the  |
| 12 | plant, there are provisions, under the Atomic Energy Act,  |
| 13 | that the federal government would take over the facility.  |
| 14 | However, you know, for years I worked on Three   |
| 15 | Mile Island, and there was a situation where there was a   |
| 16 | tremendous amount of money, there was a possibility of a   |
| 17 | default involved. But through the efforts of the   |
| 18 | licensee, and our efforts at oversight, that money was   |
| 19 | scraped together, and they accomplished what they set out  |
| 20 | to do, and that was, basically, place the plant in a safe,   |
| 21 | stable condition.  |
| 22 | So I don't know how else to answer your  |
| 23 | question.  |
| 24 | MR. MCCORMICK: One financial, do you think if  |
| 25 | they were financially able to carry forward, you would   |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>(202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

|    | 72   |
|----|--|
| 1  | remove them from the job of decommissioning and bring in   |
| 2  | another agent to do it?  |
| з  | DR. MASNIK: I think before we got to that, we  |
| 4  | would compel them to provide the money. I mean, it is not  |
| 5  | a question of whether or not they choose to, they have to,   |
| 6  | okay?  |
| 7  | If the company no longer exists because it   |
| 8  | goes into default, and there aren't sufficient assets to   |
| 9  | finish the job, then under the Atomic Energy Act, the  |
| 10 | federal government has the authority to step in and take   |
| 11 | over the process.  |
| 12 | But I think that I mean, that is so far  |
| 13 | down the road, we are nowhere near that point, yet. In   |
| 14 | fact, this plant is in reasonably good shape, compared to  |
| 15 | other plants that have shut down prematurely.  |
| 16 | They have a considerable amount of money put   |
| 17 | aside. If they choose to place the plant in long term  |
| 18 | storage, there is sufficient money there to take it for  |
| 19 | quite some time, until other funds become available.   |
| 20 | Yes, in the back?  |
| 21 | MR. HYMAN: My name is David Hyman. You said  |
| 22 | that the NRC asks that the licensee have 350 to 400  |
| 23 | million dollars for a 1,000 watt reactor, is that correct?   |
| 24 | DR. MASNIK: That is correct.   |
| 25 | MR. HYMAN: It is my understanding that Yankee  |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>(202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

|    | 73  |
|----|---|
| 1  | Rowe has spent in excess of 400 million dollars for their                                 |
| 2  | decommissioning, and yet they are a third that size. Have                                 |
| 3  | you considered revising your numbers, perhaps?  |
| 4  | DR. MASNIK: Well, first of all, they haven't  |
| 5  | spent that money.   |
| 6  | MR. HYMAN: I believe the actual number is   |
| 7  | 365.  |
| 8  | DR. MASNIK: Well, they've estimated 425   |
| 9  | million dollars.  |
| 10 | MR. HYMAN: They originally estimated 50, so -   |
| 11 |   |
| 12 | DR. MASNIK: Yes, I grant you that.  |
| 13 | MR. HYMAN: But still, they are one-third the  |
| 14 | size. I mean, what you are talking about is funds that                                    |
| 15 | would, in fact, cover one-third of the dismantling here.                                  |
| 16 | What does the NRC suggest   |
| 17 | DR. MASNIK: No, no, no. The number 350 to   |
| 18 | 400 million dollars is an estimate for 1,000 megawatt                                     |
| 19 | plant, electric. This is  |
| 20 | MR. HYMAN: Well, what is the megawatt at  |
| 21 | Yankee Rowe?  |
| 22 | DR. MASNIK: That is roughly one-third of  |
| 23 | that.   |
| 24 | MR. HYMAN: Correct. Therefore, if Yankee  |
| 25 | Rowe has spent 360 million, and they are not done, and                                    |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS   |
|    | (202) 234-4433 1323 RHODE ISLAND AVE., N.W.<br>WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

| 1  | 74   |
|----|--|
| 1  | they are one-third the size, if you multiply that number   |
| 2  | by three, I believe you come up to somewhere a little over   |
| 3  | one billion dollars, is that correct?  |
| 4  | DR. MASNIK: I guess I'm having trouble   |
| 5  | MR. HYMAN: Isn't that correct?   |
| 6  | DR. MASNIK: No, they have not spent anything.  |
| 7  | MR. HYMAN: It is a free job?   |
| 8  | DR. MASNIK: No, they have not spent any money  |
| 9  | yet. They have not accessed any of the funds that are in   |
| 10 | the decommissioning cost fund.   |
| 11 | MR. HYMAN: How much has Yankee   |
| 12 | DR. MASNIK: Oh, Yankee, I'm sorry.   |
| 13 | MR. HYMAN: Rowe spent to take apart that   |
| 14 | reactor, sir? How much?  |
| 15 | DR. MASNIK: I don't know the answer to that,   |
| 16 | at this point.   |
| 17 | MR. HYMAN: Well, I'll tell you what, if you  |
| 18 | could possibly come up with a number at some point, it   |
| 19 | would be nice. Let's move on, if you would, because I  |
| 20 | know that there are other people that would like to talk   |
| 21 | to you.  |
| 22 | There is a handout over here on the table,   |
| 23 | that I was looking at, and there is a quote here from a  |
| 24 | Federal District Court Judge, in a case that the Citizen's   |
| 25 | Awareness brought with the NRC.  |
|    | NEAL R. GROSS<br>COUF T REPORTERS AND TRANSCRIBERS<br>(323 RHODE ISLAND AVE., N.W.<br>(202) 234-4433 WASHINGTON, D.C. 20005-37:31 (202) 234-4433 |

| 1   | And the quote goes as follows: "This course  |
|-----|--|
| 2   | of conduct by the NRC suggests a concerted bureaucratic  |
| 3   | effort to thwart the efforts of local citizens to be heard   |
| 4 1 | about an event that vitally affects them and their   |
|     | children. It calls to mind the activities of Charles   |
| 5   |  |
| 6   | Dickens' fictional Office of Circumlocution in Bleak   |
| 7   | House. The prospect that this tax may be used nationally,  |
| 8   | as more nuclear plants shut down, and more local citizens  |
| 9   | groups express concern about the impact of the process on  |
| 10  | their lives is to put it mildly, disquieting."   |
| 11  | So this is a federal court judge talking about   |
| 12  | you. Now, somebody here, earlier, made reference to the  |
| 13  | trust that is trying to be established here.   |
| 14  | I was wondering if you could comment on this   |
| 15  | quote, and what the NRC is doing to try and regain our   |
| 16  | trust.   |
| 17  | MR. HOLLER: If I may, sir, my name is Gene   |
| 18  | Holler, and I'm an attorney with the Office of General   |
| 19  | Counsel with the NRC.  |
| 20  | The court case that you referred to, CAN   |
| 21  | versus the NRC, was addressed to the regulations in force  |
| 22  | at the time that the Yankee Rowe facility began its  |
| 23  | decommissioning. Subsequent to that, the Commission has  |
| 24  | published and promulgated the new regulations.   |
| 25  | In more detail, for those that are interested,   |
|     | NEAL R. GROSS      COURT REPORTERS AND TRANSCRIBERS      1323 RHODE ISLAND AVE., N.W.      (202) 234-4433      WASHINGTON, D.C. 20005-3701      (202) 234-4433 |

.

|    | 76   |
|----|--|
| 1  | in the statement of considerations accompanying the new  |
| 2  | regulations that talked about, referred to, and that were  |
| 3  | published on July 29, 1996.  |
| 4  | The Commission addressed those matters that  |
| 5  | the Court in CAN v US found to be deficient. Primarily   |
| 6  | the Court perceived that the Commission had not adequately   |
| 7  | provided the reasoning for the NRC's change in   |
| 8  | decommissioning.   |
| 9  | That has been explained, and has been  |
| 10 | promulgated with the new rules that are in effect. The   |
| 11 | Court also had some problems with decommissioning  |
| 12 | activities taking place prior to meeting the appropriate   |
| 13 | National Environmental Protection Act reviews.   |
| 14 | Again, the Commission, in the new rules, has   |
| 15 | provided for that. Specifically, a licensee may not  |
| 16 | undertake decommissioning activities, as allowed in this   |
| 17 | PSDAR, without explaining how they fall within the   |
| 18 | environmental impact that had been previously assessed in  |
| 19 | the generic environmental impact statement, or the   |
| 20 | specific environmental impact statement for the plant in   |
| 21 | question.  |
| 22 | Lastly, the Court also perceived that the  |
| 23 | Agency had approved the expenditure of funds for   |
| 24 | decommissioning before approval of a decommissioning plan,   |
| 25 | and thereby triggering hearing rights, or possibly NEPA  |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>(202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

|----|--|
| l  | reviews, National Environmental Protection Act reviews.  |
| 2  | Again, the new regulation sets forth specific  |
| 3  | rules, criteria, for the expenditure of those funds, and   |
| 4  | those specific NRC approval, therefore, is needed to do  |
| 5  | those.   |
| 6  | In sum, the Commission takes the position that   |
| 7  | it has explained the rational for its revised  |
| 8  | decommissioning rules, that the Court in CAN v U.S.  |
| 9  | despite the colorful language that you cited that the  |
| 10 | Court used to emphasize certain points, that they the  |
| 11 | Commission has addressed those concerns that the Court had   |
| 12 | with the 1988 rule, and as it was applied in the Yankee  |
| 13 | Rowe proceedings.  |
| 14 | And that the Court did not specify any   |
| 15 | specific approach that the Commission must take in   |
| 16 | promulgating decommissioning rules.  |
| 17 | MR. HYMAN: Thank you for addressing these  |
| 18 | concerns. I was wondering if you could address my  |
| 19 | original question. What are you doing to try and regain  |
| 20 | any confidence that we might or might not have?  |
| 21 | MR. HOLLER: Yes, sir. Briefly, the   |
| 22 | Commission, in the new rules, has provided for, as Dr.   |
| 23 | Masnik has pointed out, first of all, the opportunity for  |
| 24 | early public participation in the form of a meeting.   |
| 25 | MR. HYMAN: Does that include public  |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>(202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

ă

| - 11 | 78  |
|------|---|
| 1    | disclosure of documents, specs, radiation doses to public,                        |
| 2    | to the workers? We are talking about operating this                               |
| 3    | decommissioning in the light of day, are we not?                                  |
| 4    | MR. HOLLER: Yes, sir. I think we are sort   |
| 5    | of getting into speculation, and if you have a specific                           |
| 6    | question there?   |
| 7    | MR. HYMAN: No, that is not speculation. I'm                                       |
| 8    | really quite  |
| 9    | MR. HOLLER: So that we don't become   |
| 10   | argumentative, let me answer the first part of the                                |
| 11   | question, first. And your question was, what is the NRC                           |
| 12   | doing to re-establish trust? To begin with, as Dr. Masnik                         |
| 13   | has pointed out, the NRC conducts, early on in the                                |
| 14   | process, the public participation meetings.                                       |
| 15   | The licensee submits the PSDAR, it goes onto                                      |
| 16   | the docket, it is publicly available in the local public                          |
| 17   | document room, as well as copies can be obtained. The                             |
| 18   | public is invited to comment on it, a public meeting is                           |
| 19   | held, where it is discussed.  |
| 20   | So early on in the process, that participation                                    |
| 21   |   |
| 22   |   |
| 23   |   |
| 24   | the part where the NRC, after the termination of the                              |
| 25   | license is no longer in the process.  |
|      | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W. |

1323 RHODE ISLAND AVE., N.W. WASHINGTON, D.C. 20005-3701

(202) 234-4433

(202) 234-4433

.

| 1  | 79   |
|----|--|
| 1  | Again, the licensee must submit a termination  |
| 2  | plan, which includes specific radiation surveys, a report  |
| 3  | on those things that are still required before   |
| 4  | decommissioning is finished, an update on the cost and   |
| 5  | monies available for decommissioning, and the approval of  |
| 6  | that is through a license amendment process.   |
| 7  | Which, again, provides not only the  |
| 8  | opportunity for public participation and comment, but for  |
| 9  | the public to request a hearing on the final approval of   |
| 10 | the termination plan.  |
| 11 | So in sum, through the long process, early   |
| 12 | involvement with the public, when the licensee first comes   |
| 13 | out with its post-shut down decommissioning activities   |
| 14 | report, and a continuation of having things available in   |
| 15 | the public docket, and finally with an opportunity to  |
| 16 | review and comment on the termination plan.  |
| 17 | MR. HYMAN: I respectfully submit, sir, that  |
| 18 | despite the opportunity for hearings, discussions,   |
| 19 | etcetera, concerning Yankee Rowe, there was no movement  |
| 20 | until court was brought into it.   |
| 21 | It leads one to believe that your process of   |
| 22 | hearings and panels and meetings is merely a lot of hot  |
| 23 | air, and that it is not taken very seriously by the NRC.   |
| 24 | Thank you.   |
| 25 | MR. HOLLER: Yes, sir, I take your opinion.   |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>(202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

1 Thank you.

Russ Mellor. Just to provide a MR. MELLOR: 2 point of fact for Dave Hyman. Rowe's cost of 3 decommissioning, as estimated in its 1995 FERC case was 4 341 million, and that is on out through the entire 5 decommissioning. That includes dry storage, it includes 6 things that the NRC isn't concerned about, such as removal 7 of buildings. 8 So it is a long process, and that money hasn't 9 all been spent, nowhere near has it been spent. 10 MR. KATZ: My name is Fred Katz, I live in 11 Rowe. It is my understanding, and I think you sort of 12 said it, that the only time for the public to have an 13 opportunity for a hearing, that is an adjudicatory 14 Hearing, is after the entire process is complete. Am I 15 right? 16 DR. MASNIK: No, it is not quite right. 17 Whenever there is an amendment to the license, there is an 18 opportunity for a member of the public to request a 19 hearing. And there will be a number of license 20 amendments, as this plant proceeds down to 21 decommissioning. 22 MR. KATZ: I didn't quite understand what you 23 said. But I'm still laboring under the assumption, or the 24 understanding that the only time that the public will have 25 NEAL R. GROSS COURT REPORTERS AND TRANSCRIBERS 1323 RHODE ISLAND AVE., N.W. (202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433

|    | 81  |
|----|---|
| 1  | an opportunity for a hearing on decommissioning, is after                         |
| 2  | decommissioning is complete.  |
| 3  | DR. MASNIK: Well, the only time that the  |
| 4  | license termination plan that I spoke of, and that Mr.                            |
| 5  | Holler also talked about, requires a hearing, an                                  |
| 6  | opportunity for a hearing.  |
| 7  | But, during that period of time, any change to                                    |
| 8  | the Haddam license, which requires a license amendment,                           |
| 9  | there is an opportunity for a member of the public to                             |
| 10 | request a hearing.  |
| 11 | MR. KATZ: Well, hasn't there been a change in                                     |
| 12 | the license of Yankee Haddam in terms of their shutting                           |
| 13 | down and going into decommissioning; or is that not a                             |
| 14 | change?   |
| 15 | DR. MASNIK: No, that is not a change  |
| 16 | MR. KATZ: Is there an opportunity for a   |
| 17 | hearing?  |
| 18 | DR. MASNIK: That is not a change in the   |
| 19 | license.  |
| 20 | MR. KATZ: I see. It is not a change in the  |
| 21 | license, but it is a change somewhere? .  |
| 22 | DR. MASNIK: Well, it is a change in the   |
| 23 | status of the facility, that is correct.  |
| 24 | MR. KATZ: Which doesn't require the offering                                      |
| 25 | of an opportunity for a hearing. Now, the opportunity for                         |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W. |
|    | (202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433                         |

a hearing was available under the old rule, was it not? 1 MR. HOLLER: Excuse me, sir. If I understand 2 your question correctly, the question was, was there an 3 opportunity for a hearing under the old rule? And the 4 answer was, yes, and there is an opportunity under the new 5 rule. 6 The difference is the timing of it. Under the 7 old rule --8 MR. KATZ: When the amendment for -- at the 9 possession of the license, and now the opportunity comes 10 after the decommissioning is over. 11 Now, is this not a concerted bureaucratic 12 effort to thwart the ability of citizens to have a voice 13 in matters that affect them? 14 MR. HOLLER: I would submit to you, sir, not. 15 I think what Dr. Masnik was trying to explain, and perhaps 16 this may clarify it; if the licensee were able to go from 17 an operating plant, and doing those activities that are 18 authorized by its license to the point of completing all 19 of its decommissioning activities without the need for any 20 amendment of its license, a theoretical case if you will, 21 then they could get to that point which you suggest. 22 However, it is highly unlikely that a licensee 23 would be able to go from the point of operating a plant, 24 to conducting all the activities necessary for 25 NEAL R. GROSS COURT REPORTERS AND TRANSCRIBERS 1323 RHODE ISLAND AVE., N.W. (202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433

|    | 83  |
|----|---|
| 1  | decommissioning without the need for some license   |
| 2  | amendments, changes to its license.   |
| 3  | Now, each change to its license presents the  |
| 4  | opportunity for notice to the public of that change, and  |
| 5  | an opportunity to request a hearing.  |
| 6  | Ultimately, when the licensee has gone through  |
| 7  | the process of just prior to terminating the license, he  |
| 8  | still has a license, then the mere fact of presenting its   |
| 9  | final plan for termination of the license, itself,  |
| 10 | presents the opportunity for another hearing, for the   |
| 11 | opportunity to request a hearing.   |
| 12 | MR. KATZ: So, in other words, Connecticut   |
| 13 | Yankee is operating or its license is an operating  |
| 14 | license right now? Whatever activities are going to take  |
| 15 | place will take place under its operating license?  |
| 16 | MR. HOLLER: Correct. Yes, sir.  |
| 17 | MR. KATZ: So that will make it possible for   |
| 18 | them to use the opportunities that are presented by the   |
| 19 | 50.59; is that right?   |
| 20 | MR. HOLLER: What the gentleman is referring   |
| 21 | to is 10CFR, the code of Federal Regulation 50.59, which  |
| 22 | allows the licensee to engage in other activities, as   |
| 23 | described in its FSAR, if it meets certain criteria?  |
| 24 | MR. MATZ: See, this is very circumlocutious,  |
| 25 | you see? Because at Rowe what we experienced was  |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>(202) 7.34-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

| 1  | 84   |
|----|--|
| 1  | 10CFR50.59 being utilized in a closed reactor, and usually   |
| 2  | that regulation is used for operating reactors, which we   |
| 3  | found very puzzling.   |
| 4  | But now you are telling me that since the  |
| 5  | license has been changed, they can use it, and it is   |
| 6  | perfectly all right.   |
| 7  | In terms of invoking any trust, what I'm   |
| 8  | experiencing right now, is having my head twisted around   |
| 9  | in a circumlocutious way. I think that this is an example  |
| 10 | of what Judge Ponzer was talking about.  |
| 11 | MR. HOLLER: All I can say, sir, I take your  |
| 12 | point. I think we have probably reached the point of   |
| 13 | where we both understand the positions that we've taken,   |
| 14 | and I don't know if we will accomplish anything more.  |
| 15 | MR. KATZ: Well, I understand it perfectly  |
| 16 | well, but we will have no opportunity to have a hearing on   |
| 17 | the choice of the decommissioning option.  |
| 18 | MR. HOLLER: That is correct.   |
| 19 | MR. KATZ: That is correct. Thank you. It   |
| 20 | doesn't leave me feeling very trustful.  |
| 21 | DR. RAYBLATT. Please stay, because I have a  |
| 22 | question that involves   |
| 23 | MR. HOLLER: Your name, please?   |
| 24 | DR. RAYBLATT: My name is Dr. Rayblatt, and   |
| 25 | I'm from Bridgeport, Connecticut. I received a letter  |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>(202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

| 1  | 85   |
|----|--|
| 1  | from Mr. Seymour Weiss, who unfortunately is not here  |
| 2  | tonight. And in that letter which is concerned with  |
| 3  | information regarding the fraudulent tests on TMI II, that   |
| 4  | resulted, finally, in the worst disaster in the history of   |
| 5  | generation of nuclear power in the United States.  |
| 6  | And the reason why I was denied the  |
| 7  | information I was seeking, was that there is no health   |
| 8  | significance, anymore, since the plant is shut down.   |
| 9  | My question to you is, since the Haddam Neck   |
| 10 | at CY is going to be, or actually is, permanently shut   |
| 11 | down, does this mean that any information that otherwise   |
| 12 | would have been made available to citizens, would not be   |
| 13 | available anymore?   |
| 14 | DR. MASNIK: In the situation that you've   |
| 15 | explained with TMI, I think your request was to require  |
| 16 | us, the NRC, to produce that information. And require the  |
| 17 | licensee to submit it.   |
| 18 | And, basically, we came to the conclusion that   |
| 19 | since the plant could you let go of the mike, please?  |
| 20 | If you would let go of the mike please, it is causing  |
| 21 | interference in the system. Yes, that is fine.   |
| 22 | The Agency took the position that they were  |
| 23 | not going to compel the licensee to provide that   |
| 24 | information. Now, any information that is provided to the  |
| 25 | NRC, and any information that is provided by Haddam to the   |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>(202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

NRC, or that we require of Haddam, is put in the public 1 2 docket. And that public docket is available to 3 everyone. That information is down at the local public 4 document room in Middletown. We were there today, and it 5 is accessible. 6 DR. RAYBLATT: This is not true. Simply, I 7 have a document which says that the report of the vital 8 leak rate test of the containment system on TMI II has 9 never been placed in the public documents room, until 10 February of 1996, 18 years, or 17 years after the 11 disaster. 12 The report on structural integrity test, the 13 test that shows whether the containment can withstand 14 pressure, is not available even today, has never been 15 placed, according to response to my FOIA. 16 And Mr. Weiss, he is the person who is 17 responsible for such things, for violations, severe 18 violations of Freedom of Information Act. 19 As a matter of fact, today, I filed a petition 20 to punish Mr. Weiss and the NRR, much more than it was 21 done by removing Mr. Taylor and other heroes, Russell. We 22 must change the staff at the NRC. 23 Until people like Weiss and other heroes are 24 there, we are not sure that things will be done right. 25 NEAL R. GROSS COURT REPORTERS AND TRANSCRIBERS 1323 RHODE ISLAND AVE., N.W. WASHINGTON, D.C. 20005-3701

(202) 234-4433

(202) 234-4433

|    | 87   |
|----|--|
| 1  | These people are simply puppets of the industry.   |
| 2  | MR. CLEW: My name is Harvey Clew, C-L-E-W,   |
| 3  | from Haddam, I'm a selectman here, which is our version of   |
| 4  | the Town Council.  |
| 5  | Several years down the road Haddam may wish to   |
| 6  | make sure of the Connecticut Yankee site to produce tax  |
| 7  | revenue, or for residential purposes, or recreation  |
| 8  | purposes, or something or other.   |
| 9  | Forgive me if you've covered this, but have  |
| 10 | any decommission are any decommission sites now in use   |
| 11 | for something other than nuclear power generation, and do  |
| 12 | any of these sites contain nuclear fuel, high level  |
| 13 | nuclear fuel, or other nuclear waste?  |
| 14 | DR. MASNIK: We've only of course, Shoreham   |
| 15 | is the only one that has a recent plant that has been  |
| 16 | decommissioned. I know that there is some plans at other   |
| 17 | facilities, but they haven't come to fruition, yet, to re-   |
| 18 | power the sites, using gas and gas turbines.   |
| 19 | In fact, one of the plants that I work on,   |
| 20 | Trojan, is actively pursuing that, and they plan to have   |
| 21 | an independent spent fuel storage this dry storage   |
| 22 | facility, so the fuel would be on-site, and they are   |
| 23 | planning to convert the turbine deck into a couple of gas  |
| 24 | turbines.  |
| 25 | So I don't believe that there are any  |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>(202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

|    | 88   |
|----|--|
| 1  | facilities that have undergone that sort of conversion,  |
| 2  | but there are some that are planned. And there is no   |
| 3  | reason why that can't occur. I mean, we would have to  |
| 4  | look at the safety significance of whatever activity is  |
| 5  | planned for there, if we do have one of these dry storage  |
| 6  | facilities, there.   |
| 7  | Of course, if the license is completely  |
| 8  | eliminated, and the fuel is shipped off-site to a  |
| 9  | permanent repository, then the licensee would be free to   |
| 10 | do whatever they want with the site.   |
| 11 | MR. CLEW: I'm aware of that. My point is   |
| 12 | that it may be very difficult to get anyone else to occupy   |
| 13 | this site for any other purpose, as long as there is   |
| 14 | nuclear fuel there, or any other suspicion that the site   |
| 15 | is still contaminated, or dangerous in some way.   |
| 16 | Now, the Trojan plan, of course, they are very   |
| 17 | familiar with radioactivity and so on. But most people   |
| 18 | aren't. My point is, won't it be difficult for to make   |
| 19 | some other use of this site, as long as there is nuclear   |
| 20 | fuel there.  |
| 21 | DR. MASNIK: You may be right, I clearly can't  |
| 22 | answer further than what I just said.  |
| 23 | Yes, Debbie?   |
| 24 | MS. KATZ: I just wanted to make a clarifying   |
| 25 | point, because you keep bringing up the Shoreham reactor   |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>(202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

|    | 89   |
|----|--|
| 1  | as the one reactor that is decommissioned. That reactor  |
| 2  | was only in operation for 100 hours. And so it really  |
| 3  | didn't operate for very long, so its decommissioning isn't   |
| 4  | quite the same as Connecticut Yankee or Yankee Rowe.   |
| 5  | I just felt that was clear. And the other  |
| 6  | point is that the site will, in fact, remain contaminated.   |
| 7  | Reactors are allowed to leak 15 milli-rem a year about   |
| 8  | background radiation, at site, according to your own   |
| 9  | regulations.   |
| 10 | DR. MASNIK: The gentleman in the back with   |
| 11 | the black shirt.   |
| 12 | MR. MALONEY: Hi, I'm Tom Maloney, from the   |
| 13 | Connecticut River Watershed Council. And I would just  |
| 14 | like to re-emphasize a question that was raised by   |
| 15 | somebody over here, and maybe follow up on selectman   |
| 16 | Clew's point.  |
| 17 | Did I hear correctly that there will be no   |
| 18 | opportunity for a public Hearing to discuss  |
| 19 | decommissioning options? Which I think the community here  |
| 20 | would be very interested in having that opportunity to   |
| 21 | discuss what options the utility might take in the future.   |
| 22 | MR. HOLLER: Gene Holler, again. Just so we   |
| 23 | are clear, there is an opportunity for the public to   |
| 24 | comment, both in writing, and there will be a public   |
| 25 | meeting similar to this one, once the licensee has   |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>(202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

|    | 90   |
|----|--|
| 1  | submitted its PSDAR, the post-shut down decommissionin~  |
| 2  | activities report.   |
| 3  | If you mean a hearing in the sense of an   |
| 4  | adjudicatory hearing, then the regulations do not provide  |
| 5  | for an adjudicatory hearing. They do provide, though, for  |
| 6  | public comment on what the licensee chooses to put in its  |
| 7  | PSDAR.   |
| 8  | MR. MALONEY: Even in the event that the PSDAR  |
| 9  | prescribes something that is a fundamental change in the   |
| 10 | existing license?  |
| 11 | MR. HOLLER: Well now, again, we are getting  |
| 12 | into the previous discussion we had. If the licensee were  |
| 13 | proposing to do something that is not allowed under its  |
| 14 | license, such that it would require a fundamental change,  |
| 15 | if that is the background you set up, then that  |
| 16 | fundamental change would require a license amendment, and  |
| 17 | then there would be an opportunity for a hearing.  |
| 18 | But, again, we are talking hypotheticals and   |
| 19 | it is difficult to do that.  |
| 20 | MR. MALONEY: Right. But in the event that it   |
| 21 | is just a PSDAR there is not a public hearing?   |
| 22 | MR. HOLLER: That is a correct statement.   |
| 23 | MR. MALONEY: Okay.   |
| 24 | MR. HOLLER: And the licensee then is   |
| 25 | proposing in its PSDAR to do those things that are allowed   |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>(202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

| 2  | MR. FEIGENBAUM: Ted Feigenbaum from Northeast  |
|----|--|
| 3  | Utilities. Again, as I said earlier, once we go through  |
| 4  | 1997 and decide on the options, and research and evaluate  |
| 5  | the best methodology, we will come to the public, we will  |
| 6  | talk about why we selected the option we did, and we want  |
| 7  | to hear your input, we want to get your input.   |
| 8  | And if you don't feel comfortable at a public  |
| 9  | meeti g, you can come to my office, we will sit down, we   |
| 10 | will go over it in detail, what the issues are, and we'd   |
| 11 | like to hear your input.   |
| 12 | You can mail us information. So I think there  |
| 13 | will be plenty of opportunity for the public input, and we   |
| 14 | do want to get it, and we do want to receive it, and we do   |
| 15 | want to consider it.   |
| 16 | MS. DEBOLD: I know that your question relates  |
| 17 | to this statement, is that correct?  |
| 18 | ANSWER: Yes, ma'am.  |
| 19 | MS. DEBOLD: If you want to come to the mike I  |
| 20 | will recognize one quick short question, and then, if we   |
| 21 | may, in an effort to keep this to the timetable that we  |
| 22 | established earlier, I'd like to begin a comment period.   |
| 23 | The names that are on the list who have signed   |
| 24 | up, we will go through them, but I will explain that after   |
| 25 | your question gets answered, and hopefully thank you.  |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>(202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

1 QUESTION: What we are trying to say, sir, is that you are making a decision, and then allowing us to 2 3 comment on it, or vent. 4 What we are saying is, we would very much like to be a part of the decision making process. And that is 5 not allowed, at this point, by you. We are asking for 6 that to change. You are asking for our support and our 7 8 trust. By excluding us from the process, I believe 9 you are diminishing, greatly, that trust. Thank you. 10 MS. DEBOLD: Thank you for helping us get 11 12 through the question and answer period. The next part of the session is a period of public comment. I had hoped 13 that we would have time for a break, but I think in the 14 interest of giving everyone a chance to say what they wish 15 to, we will continue. 16 If you need to leave, if you would just leave 17 quietly, and otherwise we will go right ahead. 18 There are two papers that are sign-up sheets 19 that people have signed up on. Some of you who have 20 signed up may not wish to speak. There are about 40 names 21 22 listed. It was not clearly, and that is my fault, 23 noted that the two sheets I'm holding are for making a 24 comment that would be record, and hopefully will be 25 NEAL R. GROSS COURT REPORTERS AND TRANSCRIBERS 1323 RHODE ISLAND AVE., N.W. WASHINGTON, D.C. 20005-3701

(202) 234-4433

(202) 234-4433

|    | 93   |
|----|--|
| 1  | responded to at a later time, not at this time, by either  |
| 2  | the utility or the NRC.  |
| 3  | So I'll start with the names on the list, and  |
| 4  | read them and we will go right in order. If you wish to  |
| 5  | be excused or excluded or say pass or whatever, we will  |
| 6  | take you off the list if you don't want to speak.  |
| 7  | I'll give you the first five names, and you  |
| 8  | can arrange yourselves in that order. Thomas LaGuardia,  |
| 9  | Donald Eggett, Paul Jacobson, Charles sorry about that.  |
| 10 | Connecticut Department of Environmental Protection, if you   |
| 11 | could give us the name yourself.   |
| 12 | And then I think the fifth one is Nick   |
| 13 | Williams. So is Thomas LaGuardia interested in speaking?   |
| 14 | Good. Step right up, and after him it will be Donald   |
| 15 | Eggett.  |
| 16 | If you keep it to two minutes, please.   |
| 17 | MR. LAGUARDIA: Thomas LaGuardia, President of  |
| 18 | TLC services. We are in the decommissioning planning and   |
| 19 | field services business.   |
| 20 | The work that has been done in decommissioning   |
| 21 | the plants, to date, has been done safely and with public  |
| 22 | interest at heart. Public health and safety, as well.  |
| 23 | The work that goes on during decommissioning   |
| 24 | is drastically different than what goes on during  |
| 25 | operations. The systems that are used to maintain and  |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>(202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

|    | 94   |
|----|--|
| 1  | operate a plant in a safe operating condition, are not of  |
| 2  | concern in decommissioning.  |
| 3  | In decommissioning the only concern is, where  |
| 4  | is the contamination, and how do we deal with it? And  |
| 5  | this has been done safely, repeatedly, at decommissioning  |
| 6  | projects dating back from the early 1960's.  |
| 7  | The planning that is being done now by this  |
| 8  | utility, and by the Nuclear Regulatory Commission, and all   |
| 9  | of the contractors that work in this industry, is done   |
| 10 | with the interest of protecting public health and safety,  |
| 11 | and our own workers.   |
| 12 | I have a stake in this. Every time I bid a   |
| 13 | job my house is on the line, to fund and to support the  |
| 14 | project. I have an interest in public safety, and the  |
| 15 | safety of my workers, and all the co-workers.  |
| 16 | This is a safe industry. It is the safest  |
| 17 | industry in the decommissioning field, because it has been   |
| 18 | done with experience based, now, some 30 odd years long.   |
| 19 | Thank you.   |
| 20 | MS. DEBOLD: Thank you. Donald Eggett,  |
| 21 | please. Followed by Paul Jacobson.   |
| 22 | MR. EGGETT: My name is Don Eggett, I'm with  |
| 23 | Commonwealth Edison in Chicago. I didn't really plan to  |
| 24 | come here, it was just an opportunity to come here because   |
| 25 | I was in the neck of the woods, here, at Tom LaGuardia's   |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N W.<br>(202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

|    | 95   |
|----|--|
| 1  | office.  |
| 2  | I just wanted to respond to one of the   |
| 3  | questions regarding re-powering or other future  |
| 4  | alternative uses that was brought up by one of the   |
| 5  | comments.  |
| 6  | Fort St. Vrain in Colorado has re-powered a  |
| 7  | gas turbine unit, 133 megawatts, and they plan to re-power   |
| 8  | two additional 133 megawatt gas turbines, on site. They  |
| 9  | do have an independent spent fuel storage facility, which  |
| 10 | is on site, under the part 50.72 license.  |
| 11 | I agree that the spent fuel issue is something   |
| 12 | we have to deal with. But as you probably know, that is  |
| 13 | the Department of Energy's responsibility, today, and we   |
| 14 | have to work with them.  |
| 15 | Thank you.   |
| 16 | MS. DEBOLD: Thank you. Paul Jacobson? Nick   |
| 17 | Williams, please.  |
| 18 | MR. WILLIAMS: My name is Nick Williams, from   |
| 19 | radiological services of New London, Connecticut. I'm a  |
| 20 | lifelong Connecticut resident.   |
| 21 | I'd like to echo Mr. LaGuardia's comments. F   |
| 22 | was a radiation protection manager on the Shoreham   |
| 23 | decommissioning, which is mentioned with a reactor that  |
| 24 | didn't operate very long.  |
| 25 | However, there were about four million pounds  |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>(202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

|    | 96   |
|----|--|
| 1  | of radioactive material shipped from that site, and dose   |
| 2  | rates of up to 1200 R per hour, so it was fairly   |
| 3  | significant. And we had very good cooperation and  |
| 4  | reaction from the public, and also we had extensive NRC  |
| 5  | involvement, even long after the license was terminated,   |
| 6  | we still had follow-up and review, and incredibly thorough   |
| 7  | work by the NRC in that project, to the satisfaction of  |
| 8  | the general public on Long Island.   |
| 9  | That is it.  |
| 10 | MS. DEBOLD: Thank you. Let me give you the   |
| 11 | next few names. James McClear, if you would speak next.  |
| 12 | Then we have Ted Feng, Ernie Woods, Adam Levin, and  |
| 13 | William looks like I'm going to say Fair, but it is  |
| 14 | but we will get it in a minute.  |
| 15 | How about Ted Feng, please? Ernie Woods,   |
| 16 | please.  |
| 17 | MR. WOODS: I have a short, prepared  |
| 18 | statement. Good evening, my name is Ernest Woods, I've   |
| 19 | lived in Haddam for forty years, and I've been an employee   |
| 20 | at Haddam Neck for 15.   |
| 21 |  |
| 22 |  |
| 23 |  |
| 24 |  |
| 25 | I have the utmost confidence in the leadership   |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>(202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

| 1  | 97   |
|----|--|
| 1  | of Bruce Kenyon, President and CEO of NU nuclear, and the  |
| 2  | management of CY.  |
| 3  | At the Haddam Neck plant, safety is stressed   |
| 4  | over and over, every day. Station management continually   |
| 5  | states that no job is so important that safety has to be   |
| 6  | compromised.   |
| 7  | The employees and management are sensitive to  |
| 8  | the concerns of the public and safety, environmental, and  |
| 9  | radiological issues.   |
| 10 | We, myself as a worker and also a town   |
| 11 | resident, is confident that the decommissioning process at   |
| 12 | Haddam Neck will be completed correctly, safely,   |
| 13 | professionally, and in a timely manner.  |
| 14 | MS. DEBOLD: Thank you. Adam Levin, please.   |
| 15 | MR. LEVIN: No comment.   |
| 16 | MS. DEBOLD: William  |
| 17 | ANSWER: No comment.  |
| 18 | MS. DEBOLD: I'll never find out the last   |
| 19 | name. Kim Medeiros, please.  |
| 20 | MS. MEDEIROS: I'm going to forfeit my time to  |
| 21 | Debbie Katz.   |
| 22 | MS. DEBOLD: Fine. Although she is down here  |
| 23 | later. Do you want to go now, Debbie?  |
| 24 | MS. KATZ: Yes, I'll take it now.   |
| 25 | MS. DEBOLD: Thank you.   |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>(202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

|    | 98   |
|----|--|
| 1  | MS. KATZ: What we experienced at the Rowe  |
| 2  | reactor in Massachusetts was the meltdown of democracy.  |
| 3  | Yankee Atomic engaged in experimental decommissioning that   |
| 4  | we believe exposed workers and the public to unnecessary   |
| 5  | radiation.   |
| 6  | And the people that are accountable for this   |
| 7  | are the NRC. Yankee Atomic is a corporation, it is their   |
| 8  | job to do the decommissioning and to get rid of the  |
| 9  | radiation.   |
| 10 | The reality about nuclear power is that it is  |
| 11 | a dirty technology, and it contaminates everything it  |
| 12 | comes in contact with. And what you have left after 30   |
| 13 | years of operation, is an enormous amount of contaminated  |
| 14 | waste that is really deadly, and you have to find another  |
| 15 | community to dump it on, to get rid of it from the site it   |
| 16 | is on.   |
| 17 | This raises ethical issues about what we do  |
| 18 | with waste, in terms of who do we contaminate, what  |
| 19 | communities suffer the sacrifice of increased exposure to  |
| 20 | radiation, and increases in disease.   |
| 21 | In our community, we have an epidemic of   |
| 22 | disease that we fear is related to long-term exposure to   |
| 23 | radiation from that reactor going into our local Little  |
| 24 | River.   |
| 25 | But Rowe removed over 136,000 curies from that   |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>(202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

| 1  | 99   |
|----|--|
| 1  | reactor without an approved decommissioning plan. And  |
| 2  | when we won a court case against the NRC, and the NRC was  |
| 3  | found to be arbitrary, capricious and utterly irrational,  |
| 4  | in their allowing the stripping of the Rowe reactor, and   |
| 5  | when the NRC was found to have violated the national   |
| 6  | environmental policy act, the administrative procedures  |
| 7  | act, and the atomic energy act, and was told by the court  |
| 8  | that decommissioning is a major federal action, and you  |
| 9  | cannot skirt that by calling it another name.  |
| 10 | The NRC made a new rule in which   |
| 11 | decommissioning is no longer a major federal action, in  |
| 12 | which there are no longer hearings allowed for citizens to   |
| 13 | be involved in matters that vitally affect them, like how  |
| 14 | do they want their community contaminated, and do they   |
| 15 | want other communities contaminated in the process of  |
| 16 | having themselves cleaned up.  |
| 17 | And what do we do with this incredible problem   |
| 18 | of nuclear waste that, in fact, we have no solution for.   |
| 19 | And what we are doing is shifting it from pillar to post,  |
| 20 | because this whole process is bankrupt, and nobody knows   |
| 21 | what to do with it.  |
| 22 | And instead of creating a policy that will   |
| 23 | allow looking at it, we are creating a very dangerous  |
| 24 | precedent. I want to acknowledge that we think that NRC  |
| 25 | is in violation. T CAN v NRC at this point, in terms of  |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>(202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

|    | 100   |
|----|---|
| 1  | that Appellate Court decision, and that you are operating   |
| 2  | outside the law.  |
| 3  | MS. DEBOLD: Thank you. Brian Wood. All  |
| 4  | right, I'm not seeing Brian. How about Tom Cleary?  |
| 5  | MR. CLEARY: No comment.   |
| 6  | MS. DEBOLD: No comment. Paul Blanch?  |
| 7  | MR. BLANCH: Again, Paul Blanch from West  |
| 8  | Hartford, Connecticut.  |
| 9  | Just to expand on some of the issues that I   |
| 10 | brought up in the questioning of the NRC. We have a basic   |
| 11 | credibility problem, here, with the NRC and with Northeast  |
| 12 | Utilities.  |
| 13 | I have six inches worth of Inspector General  |
| 14 | reports on my desk, that report on the incompetence and   |
| 15 | false statements made by various levels of NRC people, to   |
| 16 | the public, to Congress, and so on and so forth.  |
| 17 | We just don't have the confidence that the NRC  |
| 18 | is going to do their job. We've already seen an   |
| 19 | indication, tonight, how they are going to ignore the   |
| 20 | requirements for high level waste storage.  |
| 21 | If we remember, a few years back, it was  |
| 22 | proposed to site low level waste storage here in  |
| 23 | Connecticut. There was a public outcry. We don't have,  |
| 24 | and will not have low level waste storage.  |
| 25 | But yet, what is going on, what I hear tonight  |
|    | NEAL IR. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>(202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

100|

|    | 101  |
|----|--|
| 1  | is, we are going to have high level waste storage, and we  |
| 2  | are going to have no requirements for a high level waste   |
| 3  | storage.   |
| 4  | Why do we need requirements? We need   |
| 5  | requirements, specially a safety analysis report, which is   |
| 6  | required by part 72. This safety analysis report will  |
| 7  | determine what the risk is associated with the storage of  |
| 8  | spent fuel.  |
| 9  | Why do we need that? We need it so that we   |
| 10 | can determine whether there is a credible risk, such that  |
| 11 | do we need off-site emergency planning? Do we need safety  |
| 12 | related cooling systems? Do we need qualified operators?   |
| 13 | All these questions beg answers. What we are   |
| 14 | seeing tonight is, anyone can do just about anything they  |
| 15 | want, because there are a total of 102 words covering  |
| 16 | spent fuel storage in 10CFR50.   |
| 17 | We look at part 72, it goes on for probably 20   |
| 18 | or 30 pages, and it is a rearonable regulation, and I urge   |
| 19 | you to Address everything contained within part 72.  |
| 20 | Thank you.   |
| 21 | MS. DEBOLD: Thank you, Paul. Next I have   |
| 22 | John Block, followed by Paul Guntner, and Gerald Reardon.  |
| 23 | Do those people wish to speak.   |
| 24 | MR. BLOCK: My comment is addressed to  |
| 25 | something that has not been discussed this evening by  |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>(202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

|    | 102  |
|----|--|
| 1  | either the NRC or the utility. And perhaps it wasn't   |
| 2  | included in the nda, because it seems to have been left  |
| 3  | out of the NRC's rules, even its new rules.  |
| 4  | And that is, the need, in the NRC's rules, to  |
| 5  | have a mandated, economic decommissioning plan for every   |
| 6  | area of the country that is affected by the process of   |
| 7  | shutting down a large scale industry that employs many,  |
| 8  | many people, and moving it away, so that the tax base of a   |
| 9  | community is sometimes irreparably damaged by that shift.  |
| 10 | And people have been speaking of Shoreham.   |
| 11 | Well, the people out in Shoreham got a real surprise after   |
| 12 | they had been continuing to tax Wilco to run their school,   |
| 13 | and found that millions of dollars that they had taxed the   |
| 14 | utility for, have to be paid back.   |
| 15 | And I think that unless something is done to   |
| 16 | demand this kind of an economic plan that includes   |
| 17 | planning to retrain workers, relocate people, and in the   |
| 18 | long term assure the economic viability of towns that have   |
| 19 | come to live on the largesse of having a very large  |
| 20 | employer there, that is suddenly going to go away, that  |
| 21 | nothing will be done, the towns will be left in ruin, in   |
| 22 | addition with being left with big piles of waste sitting   |
| 23 | there for long periods of time.  |
| 24 | So I think that my comment is addressed to the   |
| 25 | NRC, that it is time to have a rule making, not only to  |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>(202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

|    | 103  |
|----|--|
| 1  | deal with the need to increase decommissioning funds.            |
| 2  | I mean, this was mentioned here previously and                   |
| 3  | it is absolutely ludicrous for you to stand up there and         |
| 4  | listen to somebody tell you that a reactor a third the           |
| 5  | size of this one is going to cost, you know, something on        |
| 6  | the order of 360 million, and you are not requiring that         |
| 7  | they have funds sufficient to pay for the decommissioning.       |
| 8  | Why isn't there a rule that requires that                        |
| 9  | there be economic dislocation planning for every community       |
| 10 | that has to experience what this one is going to                 |
| 11 | experience, and what Rowe experienced, and what Shoreham         |
| 12 | experienced.   |
| 13 | So it is time for that rule making. That is                      |
| 14 | my comment.  |
| 15 | MS. DEBOLD: Paul, you are the next one.                          |
| 16 | Thank you.   |
| 17 | MR. GUNTNER: Just briefly. I think that                          |
| 18 | we've heard, guite eloquently this evening, that there is        |
| 19 | some very real concerns that the public is being removed         |
| 20 | from this process, and that the Nuclear Regulatory               |
| 21 | Commission when the rules don't work to shield the               |
| 22 | industry, the NRC changes the rules.                             |
| 23 | And I think that given that in this era of                       |
| 24 | electric industries deregulation, when the rising                |
| 25 | competition associated with this out of control                  |
|    | NEAL R. GROSS  |
|    | COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W. |

|    | 104  |
|----|--|
| 1  | decommissi ning costs, what we are faced with is the   |
| 2  | public left holding the bag, without a voice.  |
| 3  | And I think that my message here is that the   |
| 4  | warning clearly goes out, tonight, that it is our  |
| 5  | responsibility as a democracy, to reclaim our voice, and   |
| 6  | take our stand.  |
| 7  | MR. REARDON: Gerald Reardon, Newington,  |
| 8  | Connecticut. The spelling is the same.   |
| 9  | I have in my hand two documents that were  |
| 10 | recently issued. They both speak to the public's trust   |
| 11 | and confidence in Northeast Utilities and the NRC.   |
| 12 | The first document is a 300-plus page report   |
| 13 | that was issued by the Department of Public Utilities,   |
| 14 | State of Connecticut, on December 31st, 1996.  |
| 15 | It says a lot of things about Northeast  |
| 16 | Utilities management. None of them very flattering.  |
| 17 | The second report was issued in November, by   |
| 18 | the Citizens Awareness Network, and the Nuclear  |
| 19 | Information and Resources Services.  |
| 20 | It is a petition for enforcement, a 2.206 to   |
| 21 | the NRC, and it is focused on CY operations and its  |
| 22 | management. Again, it is not very flattering to that   |
| 23 | organization.  |
| 24 | In total, they represent serious doubts  |
| 25 | whether NU is capable and ethically on an ethical and  |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>(202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

|     | 105  |
|-----|--|
| 1   | competency basis, to operate as well as decommission any   |
| 2   | of their nuclear units.  |
| 3   | And I urge the NRC, I beg the NRC, to tonight  |
| 4   | establish a commitment that will address and resolve all   |
| 5   | the issues raised in both these documents, prior to any  |
| 6   | further steps to be taken about CY's decommissioning.  |
| 7   | I'd like to speak, also, to the point of   |
| 8   | estimates in the nuclear industry. I want to bring to  |
| 9   | your attention that when Millstone III was initially   |
| 10  | began its construction, and these are very round numbers,  |
| 11  | these are estimates of estimates, it was estimated that  |
| 12  | that plant would cost 800 million dollars.   |
| 13  | When it was completed, the cost of that plant  |
| 14  | was 3.6 billion dollars. It is the nature of the nuclear   |
| 15  | industry, in my past 25 years in it, that estimates are  |
| 16  | grossly under-estimated in factors, as a previous  |
| 17  | gentleman mentioned, of three to five, and I would not be  |
| 18  | surprised in the order of magnitude, would be the final  |
| 19  | cost to CY's decommissioning.  |
| 2.0 | Thank you.   |
| 21  | MS. DEBOLD: Thank you, Mr. Reardon. Next we  |
| 22  | have I'll read through the names of the next few, so   |
| 23  | you can get ready. I have Peter Smith, Rosemary  |
| 24  | Bassilakis, I've got Debbie Katz again, but maybe you will   |
| 25  | writ until the end, this was the second request. We will   |
|     | NEAL R. GROSS      COURT REPORTERS AND TRANSCRIBERS      1323 RHODE ISLAND AVE., N.W.      (202) 234-4433      WASHINGTON, D.C. 20005-3701      (202) 234-4433 |

\*

|    | 100  |
|----|--|
| 1  | go to David looks like Koffer.   |
| 2  | We will do those in that order, if we may.   |
| 3  | Peter? Peter must have left. Rosemary?   |
| 4  | MS. BASSILAKIS: I want to make it very clear   |
| 5  | that this meeting does not satisfy our decommissioning   |
| 6  | concerns.  |
| 7  | What we want is an adjudicatory hearing, where   |
| 8  | we are allowed to question both the NRC and the utility,   |
| 9  | under oath, and that we have disclosure of their records.  |
| 10 | We want to have meaningful input in the decommissioning  |
| 11 | process.   |
| 12 | We want to participate in pollution prevention   |
| 13 | and control. We don't accept the new decommissioning   |
| 14 | rule, and we believe it is unconstitutional.   |
| 15 | We further want decommissioning to be  |
| 16 | recognized as a major federal act. And because of that,  |
| 17 | we would like it to have to be in compliance with the  |
| 18 | national Environmental Policy Act.   |
| 19 | Further, as a good neighbor policy, we would   |
| 20 | like prior notification to all releases from the reactor,  |
| 21 | into both the air and the water. And we would like prior   |
| 22 | notification to any waste shipments off the property,  |
| 23 | starting now.  |
| 24 | We would like something like an 800 number set   |
| 25 | up, where we can call to be notified of this information.  |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>(202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

| 1  | 107  |
|----|--|
| 1  | We would like to have a resident inspector on-site,  |
| 2  | throughout decommissioning, given Northeast Utilities'   |
| 3  | track record, or bad track record, should I say.   |
| 4  | They are under criminal investigation, that is   |
| 5  | not a petty deal. We would like a resident inspector   |
| 6  | there at all times.  |
| 7  | And although this has never been done before,  |
| 8  | I would like to see the reactor put on the watch list.   |
| 9  | Although it is not operating, it should be on the watch  |
| 10 | list, until they are proven to be willing to follow NRC  |
| 11 | compliance.  |
| 12 | Thank you.   |
| 13 | MS. DEBOLD: Thank you. David?  |
| 14 | MR. KOFFER: Yes, my name is David Koffer. I  |
| 15 | was puzzled. This was originally going to be a question  |
| 16 | having to do with the NRC's additional requirements on   |
| 17 | decommissioning activities, and I was confused in that the   |
| 18 | licensee, which in this case would be Haddam, was  |
| 19 | prohibited from performing any decommissioning activity  |
| 20 | that results in significant environmental impacts.   |
| 21 | And it occurred to me that since the only dump   |
| 22 | actually available for radioactive waste disposal in this  |
| 23 | country is Barnwell, which is in South Carolina, and since   |
| 24 | it is an acknowledged fact that the Barnwell dump is   |
| 25 | leaking into its aquifer, and since the dump is unlined,   |
|    | NEAL R. GROSSCOURT REPORTERS AND TRANSCRIBERS1323 RHODE ISLAND AVE., N.W.(202) 234-4433WASHINGTON, D.C. 20005-3701(202) 234-4433 |

|    | 108   |
|----|---|
| 1  | and since, if you went into Haddam tomorrow and said, you   |
| 2  | propose the Barnwell dump is what they should do for their  |
| 3  | municipal waste, they would laugh you out of town.  |
| 4  | Clearly, putting nuclear waste in an unlined  |
| 5  | dump that wouldn't make standards for a municipal waste   |
| 6  | dump in most states, is going to result in significant  |
| 7  | environmental impacts.  |
| 8  | And I was going to ask what interpretation of   |
| 9  | their own rules the NRC was able to use to spin this  |
| 10 | around not to be a problem.   |
| 11 | But since the question period is over, I'll   |
| 12 | just frame it as a comment, and just ask people to  |
| 13 | remember that the end of the process that the NRC is  |
| 14 | proposing here isn't some magic isn't a technological   |
| 15 | quick fix answer, it is just that a small town in South   |
| 16 | Carolina gets poisoned more, as it has been for a number  |
| 17 | of years.   |
| 18 | And it is not really any reason they didn't   |
| 19 | buy into that, they didn't ask for that, and that is  |
| 20 | something that we should consider when it is a question of  |
| 21 | Haddam trying to get rid of all the radioactive liability   |
| 22 | on land it owns, to fulfill what it sees as its   |
| 23 | responsibilities for its shareholders.  |
| 24 | That is all.  |
| 25 | COMMENT: There was a gentleman who wrote a  |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

|       | 109  |
|-------|--|
| 1     | book about the truth about Chernobyl. He was the high  |
| 2     | Soviet bureaucrat in the nuclear agency there. And he  |
| 3     | went there to investigate and report to the Politburo, and   |
| 4     | basically he was kind of given the charge, find out the  |
| 5     | truth, but make sure the truth is this.  |
| 6     | And I think that is too much happening in this   |
| 7     | country, also. And he refers to the international  |
| 8     | agencies, and the NRC, and the nuclear utilities, as the   |
| 9     | nuclear mafia.   |
| 10    | And I think that is really a quite accurate  |
| 11    | assessment of the situation. That you simply are engaged   |
| 12    | in an act of criminal syndication to foist mass murder on  |
| 13    | the population of the earth.   |
| 14    | Whether it be the 400 that die per reactor   |
| 15    | year, from the mining of uranium, from those that die of   |
| 16    | breast cancer all around plants around the United States,  |
| 17    | those that are dying from Chernobyl, those that are dying  |
| 18    | and have died from atmospheric nuclear tests, you simply   |
| 19    | are engaged in mass murder, and thus are criminal, and are   |
| 20    | part of a criminal conspiracy or syndicate.  |
| 21    | And there is really no other way to view you,  |
| 22    | and I wish my fellow citizens would delve into that view a   |
| 23    | little further. Because it is certainly my belief very   |
| 24    | true.  |
| 25    | Mr. Feigenbaum says he wants to be a good  |
|       | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>(202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

.

|    | 110  |
|----|--|
| 1  | neighbor. Logic simply dictates, a good neighbor does not  |
| 2  | dump poisons in one's public waters. Does that mean, Mr.   |
| 3  | Feigenbaum and Northeast Utilities are now going to cease  |
| 4  | dumping chemical and radioactive poisons into the  |
| 5  | Connecticut River from Connecticut Yankee?   |
| 6  | Or if because if we follow logic, that   |
| 7  | means if they dump poisons, they are not a good neighbor.  |
| 8  | So, are they going to be a good neighbor?  |
| 9  | And that leads me to a request. I would like   |
| 10 | the NRC's best estimate for further releases, airborne,  |
| 11 | and affluent, involved in decommissioning from Connecticut   |
| 12 | Yankee, precisely what types, kind, and radioactive levels   |
| 13 | will we be seeing during the decommissioning of  |
| 14 | Connecticut Yankee.  |
| 15 | And I'm simply concerned I'm very  |
| 16 | conservative. Right, liberty what is it, life? Would   |
| 17 | some conservative help me here? Life, liberty, pursuit of  |
| 18 | happiness, U.S. Constitution?  |
| 19 | I consider the dumping of poisons in the   |
| 20 | public water an attack on my right to life. And I would  |
| 21 | hope my federal government would protect my right to life.   |
| 22 | And if you are not, I guess you just proved my point, you  |
| 23 | are part of that criminal syndicate.   |
| 24 | And I will close with one observation. We  |
| 25 | heard a comment that closing down Connecticut Yankee was   |
|    | NEAL R. GROSS      COURT REPORTERS AND TRANSCRIBERS      1323 RHODE ISLAND AVE., N.W.      (202) 234-4433      WASHINGTON, D.C. 20005-3701      (202) 234-4433 |

| 1.1 | 111  |
|-----|--|
| 1   | going to save the rate payers money. And by saving the   |
| 2   | rate payers money, we are going to be able to have more  |
| 3   | money for decommissioning costs.   |
| 4   | Well, I'm not sure what Connecticut Yankee   |
| 5   | cost is to produce power, but we will say five cents a   |
| 6   | kilowatt hour, for the sake of argument here. Millstone  |
| 7   | must be over 20 cents a kilowatt hour, Seabrook must be 25   |
| 8   | cents plus. 25 cents, 30 cents a kilowatt hour.  |
| 9   | Does that mean Northeast Utilities is going to   |
| 10  | shut down Millstone III, shut down Seabrook, and buy   |
| 11  | cheaper power and give the money back to the rate payers?  |
| 12  | Thank you.   |
| 13  | MS. DEBOLD: David Hyman, followed by Fred  |
| 14  | Katz and Stacy is David here? Fred?  |
| 15  | MR. KATZ: I'm Fred Katz, and I just have I   |
| 16  | briefly want to say that my presence and my little   |
| 17  | participation here, I want to make sure is not construed   |
| 18  | as my assenting to this process as satisfying, in any way,   |
| 19  | the requirements under the Constitution, and under the   |
| 20  | Atomic Energy Act.   |
| 21  | That an opportunity for a hearing be presented   |
| 22  | at the point that a license amendment is required at   |
| 23  | decommissioning. So that I believe that NRC is engaged in  |
| 24  | a concerted bureaucratic effort to thwart the intention of   |
| 25  | the Constitution, the Congress, the Atomic Energy Act, and   |
|     | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>(202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

|----|---|
| 1  | of the citizen's participation in events that vitally   |
| 2  | affect them.  |
| 3  | Thank you.  |
| 4  | MS. DEBOLD: Stacy, Barbara Day? Tom Maloney,  |
| 5  | you are next, followed by Art Collins and Walt Czaka.   |
| 6  | Tom, did you wish to speak, is he still here? All right,  |
| 7  | he may have spoken his words earlier.   |
| в  | How about Arthur Collins Junior? Walt Czaja.  |
| 9  | After Walt is Robert Groves.  |
| 10 | MR. CZAJA: My name is Walt Czaja. I'm a   |
| 11 | minority selectman in the town of Haddam.   |
| 12 | Being a mechanical engineer, I've always felt   |
| 13 | that there was a place in this world for nuclear power.   |
| 14 | And I based this on the fact that several years ago, one  |
| 15 | of the very few times he was on public television, Admiral  |
| 16 | Rickover said, that it is the safest type of power you can  |
| 17 | have, providing you have the right people running the   |
| 18 |   |
| 19 |   |
| 20 |   |
| 23 |   |
| 23 | running the reactors on a submarine, and they have people   |
| 23 |   |
| 2  |   |
| 2  | 5 with him completely. And this is what has happened.   |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>WASHINGTON, D.C. 20005-3701 (202) 230-4433 |

×

| 1.1 |  |
|-----|--|
| 1   | Now, we are in a position in town, where we  |
| 2   | are going to suffer from the standpoint of taxes. But, if  |
| 3   | decommissioning shall take place, it shall take place.   |
| 4   | But the things that I cannot fathom, as I just spoke with  |
| 5   | Mr. Nericcio about, and I've talked many times with Ernie  |
| 6   | Woods, you people are dedicated people that do your job.   |
| 7   | You've worked over there to the best of your   |
| 8   | ability. The problems are, I feel, are in the top echelon  |
| 9   | of Northeast Utilities, which always have said, we are   |
| 10  | your good neighbor. I have no trust in these people, even  |
| 11  | today. Including Mr. Kenyon, after that public address   |
| 12  | statement he made over to our people in the business   |
| 13  | community, in East Haddam, here about a month ago.   |
| 14  | Just a bunch of drivel. The same general, run  |
| 15  | of the mill statements that any politician would make to   |
| 16  | its constituents.  |
| 17  | But let me tell you why I suspect, and have no   |
| 18  | trust in these people. They have told us they are going  |
| 19  | to shut down this facility, which I think, from a  |
| 20  | standpoint of maybe 40 to 60 million dollars, could be put   |
| 21  | on line to NRC specifications, and continue to live its  |
| 22  | life and generate power.   |
| 23  | Now, remember this. That this facility has   |
| 24  | had an outstanding record over the years. It was number  |
| 25  | two reactor in the country, okay? Now, we are in a   |
|     | NEAL R. GROSS      COURT REPORTERS AND TRANSCRIBERS      1323 RHODE ISLAND AVE., N.W.      (202) 234-4433      WASHINGTON, D.C. 20005-3701      (202) 234-4433 |

.

|    | 114  |
|----|--|
| 1  | position where we are going to retire this reactor.  |
| 2  | Okay, our top echelon management in Northeast  |
| 3  | said they are going to save 120 million dollars. And yet   |
| 4  | our Public Utilities Commission, our Attorney General only   |
| 5  | recently said, that they suspect mismanagement to the tune   |
| 6  | of 600 to 800 million dollars of Northeast Utilities, over   |
| 7  | the last several years.  |
| 8  | Now, does it take a kid in the first grade to  |
| 9  | understand the mathematics of what that statement I just   |
| 10 | made to you, is? Now, who in heaven's name is really   |
| 11 | telling us the truth? I suspect that either what the   |
| 12 | Attorney General is telling me is true, and if it is, we   |
| 13 | should never be shutting this plant down.  |
| 14 | But if this is the case, we have no choice.  |
| 15 | This is why I have no confidence in these people who are   |
| 16 | now going to direct the decommissioning of this facility.  |
| 17 | Thank you for your time.   |
| 18 | MS. DEBOLD: Thank you, Walt. Bob Groves is   |
| 19 | next. Ray, he must have left also Mr I'm not sure.   |
| 20 | Rich Badon. Next name I don't have a good  |
| 21 | COMMENT: I already spoke.  |
| 22 | MS. DEBOLD: Thank you. Tony Nericcio? Peter  |
| 23 | Bowman.  |
| 24 | MS. BOWMAN: Peter is out of the building at  |
| 25 | this time, and my name is after his, so if you want me to  |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>(202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

| 1  |   |
|----|---|
| 2  | MS. DEBOLD: Sure, why don't you please come   |
| з  | up.   |
| 4  | MS. BOWMAN: Thank you. I think we should be   |
| 5  | talking about the decommissioning of all the plants right   |
| 6  | now at Northeast Utilities, and under their control. I  |
| 7  | wish we were.   |
| 8  | I was going to ask a question, and I also   |
| 9  | didn't realize that the question and answer period would  |
| 10 | be over. But I have something on my mind that worries me,   |
| 11 | and I do need a response.   |
| 12 | The Department of Energy is planning to enlist  |
| 13 | nuclear commercial nuclear reactors to volunteer to   |
| 14 | have plutonium loade fuel roads, called MOX, mixed oxide  |
| 15 | fuel, in commercial nuclear power plants, for the reasons   |
| 16 | that they've listed in the papers, I don't have to go into  |
| 17 | that.   |
| 18 | I would like to know, since Northeast   |
| 19 | Utilities is in a pretty precarious position financially,   |
| 20 | in a period of deregulation and possible competition,   |
| 21 | whether Northeast Utilities is looking to the Department  |
| 22 | of Energy to volunteer either Connecticut Yankee or any of  |
| 23 | the other plants, to be rebuilt, as they have to do, and  |
| 24 | to process these plutonium fuel roads, which is weapons   |
| 25 | grade plutonium, which would be then transported, and then  |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

×

1 finally put into the reactors.

| 2  | And I understand that 13 utilities have                   |
|----|---|
| 3  | volunteered already, and I would like to know if there is |
| 4  | any discussion going on, I would alert if you haven't     |
| 5  | already thought of it, the public here, to keep your eyes |
| 6  | and ears open, and try to monitor this.                   |
| 7  | And I would like a response from the NRC, and             |
| 8  | if it is directly directed to me by letter or by phone,   |
| 9  | then I will pass it on. But another correction a          |
| 10 | question was asked, whether any other nuclear plant that  |
| 11 | had been decommissioned was in a position where other     |
| 12 | forms of energy were being used.                          |
| 13 | And, actually, the Sacramento Municipal                   |
| 14 | Utility District shut down a nuclear plant, which I       |
| 15 | believe was Diablo Canyon, I'm not sure which one. Rancho |
| 16 | Seco, thank you.  |
| 17 | And they are presently using clean energy and             |
| 18 | conservation to service their public. And it would seem   |
| 19 | to me that the public here, the people here, should get   |
| 20 | right on the ball with their legislators, and in this     |
| 21 | period of deregulation and reconstruction, insist that    |
| 22 | Northeast Utilities either shut down completely, as a     |
| 23 | corporation, or convert as Sacramento Municipal Utility   |
| 24 | District did, to alternate clean energies and             |
| 25 | conservation, or that the public public control of its    |

|----|--|
| ı  | utilities, public control of the electricity that has to   |
| 2  | be put into people's homes and into factories and  |
| 3  | businesses, that this be a major change.   |
| 4  | That we have clean energy, clean safe jobs for   |
| 5  | the workers who are presently, specially the transients  |
| 6  | and the people who go into the hot parts of the plant, who   |
| 7  | are risking their health and their children's futures  |
| 8  | their children's health, and have to work in these filthy  |
| 9  | dangerous plants, where you don't see, smell, or taste the   |
| 10 | danger, but it is there.   |
| 11 | These people would then have jobs in clean,  |
| 12 | solar based energy, and would be able to use their skills  |
| 13 | effectively, there, for the people.  |
| 14 | Thank you.   |
| 15 | MS. DEBOLD: And is Mr. Bowman here?  |
| 16 | MS. BOWMAN: He hasn't come back.   |
| 17 | MS. DEBOLD: He hasn't come back. I have no   |
| 18 | further names on my list. But I did agree that I would   |
| 19 | stay until 10. If there is anyone else who wishes to   |
| 20 | speak, or I don't know what Northeast Utilities or the NRC   |
| 21 | be willing to take a question or two, since we cut people  |
| 22 | off early.   |
| 23 | If you would like to ask a question, if you  |
| 24 | would step to a mike after you've gotten the okay, then we   |
| 25 | will let you announce who you are.   |
|    | NEAL R. GROSS      COURT REPORTERS AND TRANSCRIBERS      1323 RHODE ISLAND AVE., N.W.      (202) 234-4433      WASHINGTON, D.C. 20005-3701      (202) 234-4433 |

|    | 118  |
|----|--|
| 1  | Let's start with the next hand that is up. If              |
| 2  | you would make sure to identify yourself and who you want  |
| 3  | to answer the question, so that they will start listening. |
| 4  | MR. MCCORMICK: Tom McCormick, it is for the                |
| 5  | NRC. And Paul, if you would please help me out here. In    |
| 6  | New London, there was an NRC hearing where I asked about   |
| 7  | the possibility of criticality in a spent nuclear fuel     |
| 8  | pool, and what would happen if there was a loss of coolant |
| 9  | in a spent nuclear fool pool that was fully loaded, or at  |
| 10 | least say five or six years of fuel in there.              |
| 11 | And a gentleman from the NRC said, yes, that               |
| 12 | pool could go critical, conceivably, at least in terms of  |
| 13 | physics, if there was a loss of coolant.                   |
| 14 | And at that time, I believe, there was a                   |
| 15 | statement from an NRC person that as part of re-opening    |
| 16 | the Millstone facility, that there would be a full         |
| 17 | evaluation of what would happen in a loss of coolant       |
| 18 | accident to a spent fuel pool.                             |
| 19 | Yes, I've heard it, and other people have                  |
| 20 | heard it. I would like to know what is the status of that  |
| 21 | study, and when we will be seeing a full-fledged spent     |
| 22 | fuel pool study of a fully loaded pool.                    |
| 23 | DR. MASNIK: I'm not prepared to answer that,               |
| 24 | because I know nothing well, I don't know nothing, but     |
| 25 | I know very little about what is occurring at Millstone.   |

|    | 119  |
|----|--|
| 1  | Is there anyone else on the NRC staff here                       |
| 2  | that has a response to that?                                     |
| 3  | (No response.)   |
| 4  | I can address in general terms what might                        |
| 5  | happen. Obviously, it is highly dependent on how long the        |
| 6  | fuel has been taken out of the reactor. And, over time,          |
| 7  | the danger decreases.  |
| 8  | So after a number of years, there could be a                     |
| 9  | loss of coolant accident with very little consequence,           |
| 10 | other than extremely high radiation fields in the area of        |
| 11 | the pool.  |
| 12 | Now, if it occurs early on, there is the                         |
| 13 | possibility that you could have a fire, basically, and a         |
| 14 | release of radioactive material to the atmosphere.               |
| 15 | The pool is designed so that a loss of coolant                   |
| 16 | accident is a very, very small probability. There is             |
| 17 | other sources of make-up water to the pool. They are             |
| 18 | typically redundant, in some cases, five or six different        |
| 19 | sources of water.  |
| 20 | The probability of a pool failing                                |
| 21 | catastrophically, and the loss of liquid at such a rate .        |
| 22 | that it could not be made up, is close to incredible.            |
| 23 | MR. BLANCH: Again, this is Paul Blanch in                        |
| 24 | response. And you just supported my point, before, that I        |
| 25 | made before. You are not sure what that probability is,          |
|    | NEAL R. GROSS  |

|    | 120  |
|----|--|
| 1  | I'm not sure what it is, I don't know what the   |
| 2  | consequences are. I have a good idea.  |
| 3  | This is why we need a complete safety  |
| 4  | analysis, to determine what that risk is. Nobody knows.  |
| 5  | The NRC has promised it to us, we are still requesting it.   |
| 6  | Now they are reneging on their promise.  |
| 7  | But I believe that before Connecticut Yankee   |
| 8  | goes into decommissioning, we need a full safety analysis  |
| 9  | to determine what these risks are. And the NRC is  |
| 10 | extremely reluctant to provide that.   |
| 11 | MS. DEBOLD: Is there anyone else who would   |
| 12 | like to ask a question? Rosemary. Again say your name  |
| 13 | for us, and to whom you wish to ask your question.   |
| 14 | MS. BASSILAKIS: Either the NRC actually  |
| 15 | the NRC should be able to answer this. Rosemary  |
| 16 | Bassilakis.  |
| 17 | As far as the reactor goes, since there is   |
| 18 | going to be no maintenance being done, I'm just curious  |
| 19 | whether or not anything like cutting up control rods are   |
| 20 | considered maintenance.  |
| 21 | MR. FAIRTILE: That is an operation that is   |
| 22 | commonly done at operating plants, and it is done  |
| 23 | underwater, and it is a routine operation.   |
| 24 | MS. BASSILAKIS: But it won't be done prior to  |
| 25 | the decommissioning plan being submitted to the NRC.   |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>(202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

11

....

|    | 121  |
|----|--|
| l  | MR. FAIRTILE: I have no idea what the  |
| 2  | licensee schedule is. Ted?   |
| з  | MS. BASSILAKIS: I was hoping the NRC would be  |
| 4  | able to answer it, since they are the ones overseeing the  |
| 5  | utilities.   |
| 6  | MR. LAPLATNEY: My understanding of the   |
| 7  | regulation is, there is nothing prohibiting us from  |
| 8  | cutting those up, okay? We have 45 control rods in the   |
| 9  | cavity. In order to take the water out of the cavity   |
| 10 | right now, we would have to do something with those rods.  |
| 11 | We may choose to cut them up, we may not. It   |
| 12 | is not a major activity, it's been done many times. It   |
| 13 | was done at Connecticut Yankee a couple of years ago.  |
| 14 | That is not a major decommissioning activity.  |
| 15 | That is my take on it, Rosemary.   |
| 16 | MS. BASSILAKIS: So you may do that, before   |
| 17 | you submit your partial decommissioning plan to the NRC.   |
| 18 | My point is that   |
| 19 | MR. LAPLATNEY: We may or we may not. And   |
| 20 | we've done it before at Connecticut Yankee. That is an   |
| 21 | activity under our current license that we have  |
| 22 | participated in.   |
| 23 | MS. BASSILAKIS: I guess my point is, since   |
| 24 | you are no longer an operating facility, what happens from   |
| 25 | now forward is part of decommissioning, and that if  |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>(202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

| l  | workers are going to incur a certain dose of radiation,   |
|----|---|
| 2  | that this should be considered under decommissioning.     |
| 3  | MR. LAPLATNEY: I understand your point. You               |
| 4  | are asking about the total dose commitment. You know, I   |
| 5  | think we will end up discussing that. I think that will   |
| 6  | be one of the issues we will be talking at our meetings   |
| 7  | with the Committee, and I'm sure you recognize we are     |
| 8  | going to invite your group to be on this committee.       |
| 9  | Quite frankly, we are aiming to reduce the                |
| 10 | dosage to extremely low levels. Connecticut Yankee is one |
| 11 | of the most highly contaminated plants in the country.    |
| 12 | The Environmental Impact Statement is something like 1200 |
| 13 | rems at Connecticut Yankee. We intend to come well below  |
| 14 | that from this point forward.                             |
| 15 | That is our goal, so there was questions about            |
| 16 | will we give numbers, will we give effluent? We will give |
| 17 | you everything we have. This stuff is in the docket. We   |
| 18 | docket every six it used to be every six months, now it   |
| 19 | is every year, all the effluents from Connecticut Yankee. |
| 20 | We will continue doing that. This information             |
| 21 | is provided as a matter of record. If you want to come    |
| 22 | visit Connecticut Yankee, I'll give you a meter, and you  |
| 23 | can measure the radiation yourself. This is going to be   |
| 24 | an open process.  |
| 25 | MS. BASSILAKIS: I would like to find out                  |
|    | NEAL R. GROSS   |

COURT REPORTERS AND TRANSCRIBERS 1323 RHODE ISLAND AVE., N.W. WASHINGTON, D.C. 20005-3701

(202) 234-4433

|    | 123  |
|----|--|
| l  | before the six months are up. I know that you file every   |
| 2  | six months, but we want to know before the beans are out   |
| 3  | of the can.  |
| 4  | MR. LAPLATNEY: You are talking if we are   |
| 5  | planning a release or something like that? You know, we  |
| 6  | will talk about that. I just right now I'm trying to   |
| 7  | think of a process to do that, but we can certainly  |
| 8  | discuss it. It is all a matter of public record.   |
| 9  | MS. BASSILAKIS: Call an adjudicatory hearing.  |
| 10 | MR. LAPLATNEY: I don't preside over  |
| 11 | adjudicatory hearings.   |
| 12 | MS. BASSILAKIS: I understand. Thank you.   |
| 13 | MS. BOWMAN: I wanted to ask my question both   |
| 14 | to the Nuclear Regulatory Commission and to Northeast  |
| 15 | Utilities.   |
| 16 | And that is, if my previous point, if my   |
| 17 | previous question, if there is any approach by either the  |
| 18 | DOE or the utility to consider restructuring for the use   |
| 19 | of MOX, will the public be told; at what point in the  |
| 20 | process will the public be told, and who and how.  |
| 21 | MR. FEIGENBAUM: Ms. Bowman, Ted Feigenbaum,  |
| 22 | Northeast Utilities. There is absolutely no plans to use   |
| 23 | mixed oxide fuel in any of the Connecticut reactors.   |
| 24 | And if there ever was a change in that   |
| 25 | approach, we would certainly make that public.   |
|    | NEAL R. GROSS      COURT REPORTERS AND TRANSCRIBERS      1323 RHODE ISLAND AVE., N.W.      (202) 234-4433      WASHINGTON, D.C. 20005-3701      (202) 234-4433 |

.

ŧI.

|    | 124  |
|----|--|
| 1  | MS. BOWMAN: How?   |
| 2  | MR. FEIGENBAUM: But there are no plans to do                     |
| 3  | that.  |
| 4  | MS. BOWMAN: How and when would you make it                       |
| 5  | public, at the first contact, or after the decision?             |
| 6  | MR. FEIGENBAUM: All our contacts with the NRC                    |
| 7  | are public, those are in the public document room I              |
| 8  | mentioned earlier.   |
| 9  | MS. BOWMAN: I'm talking about the DOE.                           |
| 10 | MR. FEIGENBAUM: Same thing. Same deal. We -                      |
| 11 | - all those letters and correspondence                           |
| 12 | MS. BOWMAN: Well, I wouldn't know how to                         |
| 13 | access that information. Could you tell me how?                  |
| 14 | MR. FEIGENBAUM: Well, anything that deals                        |
| 15 | with the regulations, we send on the copy of the NRC, and        |
| 16 | that ends up in the public document room, which is here in       |
| 17 | Middletown. So it is all a matter of public record. And          |
| 18 | something as significant as that, we would also have a           |
| 19 | press release, and a public statement.                           |
| 20 | But, again, I'm talking about a hypothetical.                    |
| 21 | There is absolutely no plans to use mix oxide fuel.              |
| 22 | MS. BOWMAN: In any of your plants?                               |
| 23 | MR. FEIGENBAUM: In any of our plants, that is                    |
| 24 | correct.   |
| 25 | MS. BOWMAN: Thank you.   |
|    | NEAL R. GROSS  |
|    | COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W. |
|    | (202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433        |

|    | 125  |
|----|--|
| 1  | MS. DEBOLD: Maybe this could be the last   |
| 2  | question. Let's have this one be the last question, and  |
| 3  | then I will make a comment or two. Yes, Debbie?  |
| 4  | MS. KATZ: I had my hand up, as well.   |
| 5  | MR. REARDON: Jerry Reardon, Newington. My  |
| 6  | question is for Dr. Masnik of the NRC.   |
| 7  | In your presentation you listed a series of  |
| 8  | new plants that have been shut down for decommissioning.   |
| 9  | Amongst them are Dresden. I recollect, some years ago,   |
| 10 | where the NRC had issued an inspection report, identifying   |
| 11 | that that utility had allowed their containment heating to   |
| 12 | be shut down, which subjected their cooling water pipes to   |
| 13 | the spent fuel pool, to freezing conditions, and had also  |
| 14 | allowed their spent fuel pool water quality to degrade to  |
| 15 | the point where there was actually algae, as an old  |
| 16 | swimming pool that has not been chlorinated.   |
| 17 | Has NRC obtained any lessons learned from that   |
| 18 | activity, and what have you put in place to assure the   |
| 19 | public that such violations of just general maintenance  |
| 20 | conditions don't occur, again, under the NRC's nose.   |
| 21 | DR. MASNIK: The Dresden plant was in long-   |
| 22 | term storage, and you are correct in saying that there was   |
| 23 | a rather cold weather, which resulted in the freezing of a   |
| 24 | pipe.  |
| 25 | And after we after we did an investigation   |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>(202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433 |
|    |  |

\*

|    | 126  |
|----|--|
| 1  | at Dresden, which resulted in a civil penalty, we  |
| 2  | conducted a series of inspections at all shut down plants  |
| 3  | that had fuel in spent fuel pools.   |
| 4  | We've also reviewed all the procedures   |
| 5  | associated with cold weather precautions at these plants.  |
| 6  | And to answer your question, yes there was a lessons   |
| 7  | learned document that was prepared in response to that   |
| 8  | event.   |
| 9  | And we are confident that the licensees have   |
| 10 | gotten the word, and additionally, our inspectors are also   |
| 11 | sensitive to that issue.   |
| 12 | So the answer is yes, we learned a lesson.   |
| 13 | MR. REARDON: In response to my previous plea   |
| 14 | to you, and the NRC tonight, can you commit to the public,   |
| 15 | the general public, to address and resolve both those  |
| 16 | documents that I spoke to, in my previous discussion? The  |
| 17 | DPUC report, and Citizens Awareness Network's petition   |
| 18 | before proceeding further?   |
| 19 | DR. MASNIK: I can't commit to that, no, I  |
| 20 | cannot.  |
| 21 | MR. REARDON: What do you need to do to I   |
| 22 | mean the   |
| 23 | DR. MASNIK: Those documents will be handled  |
| 24 | in the manner the normal manner that we do. One is a   |
| 25 | 2.206 petition, and that document will be handled as we  |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>(202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

|    | 127  |
|----|--|
| 1  | handled 2.206 petitions, by the regulations. So it will  |
| 2  | be considered, yes.  |
| 3  | MR. REARDON: Well, judging by how long it  |
| 4  | took you to handle George Galatis' petition, which is  |
| 5  | still pending, it is several years. By that time it is   |
| 6  | too late.  |
| 7  | That petitic. and the DPUC report contain very   |
| 8  | serious information regarding the competency of NU   |
| 9  | management to decommission CY.   |
| 10 | MS. DEBOLD: Debbie, you have a quick   |
| 11 | question?  |
| 12 | MS. KATZ: Yes. Thank you very much for your  |
| 13 | generosity in letting me do this.  |
| 14 | I would like to know if Connecticut Yankee   |
| 15 | would, in fact, create a good neighbor policy, in which  |
| 16 | they would give prior notification of all releases into  |
| 17 | the air and water, and prior notification of all shipments   |
| 18 | of radioactive waste out of this community.  |
| 19 | To whoever from NU will answer that, because   |
| 20 | it wasn't clear that you would do that, and Rosemary   |
| 21 | didn't really ask for an answer. But I'd like an answer.   |
| 22 | MR. LAPLATNEY: And the answer is, this   |
| 23 | evening I will not make that commitment, I have to figure  |
| 24 | out what that means to us. However, I think this is an   |
| 25 | excellent first topic for the citizens decommissioning   |
|    | NEAL R. GROSS<br>COURT REPORTERS AND TRANSCRIBERS<br>1323 RHODE ISLAND AVE., N.W.<br>(202) 234-4433 WASHINGTON, D.C. 20005-3701 (202) 234-4433 |

| l  | advisory committee.  |
| 2  | If that body decides they want that  |
| 3  | information, so it is a representation of the entire   |
| 4  | community, not just one particular faction, we will  |
| 5  | definitely consider that request. It is not something  |
| 6  | that we can't do.  |
| 7  | I'd like to hear from the rest of the  |
| 8  | community, first.  |
| 9  | MS. KATZ: Because in Maine, Maine Yankee,  |
| 10 | provides that information to the whole community, as a   |
| 11 | public service.  |
| 12 | MR. LAPLATNEY: We'll have a representation,  |
| 13 | let the whole community be heard. I'd rather hear it from  |
| 14 | everyone first, before we go and commit the resources to   |
| 15 | do it.   |
| 16 | MS. DEBOLD: I want to thank everyone who has   |
| 17 | come tonight. If you will be patient with me long enough   |
| 18 | to say thank you to the Northeast Utilities people, and to   |
| 19 | the NRC people. And I will say that the comments and the   |
| 20 | questions left a lot to be considered, and I think they  |
| 21 | are taken in the right vein. I notice the Nuclear Energy   |
| 22 | Advisory Council had members here, tonight.  |
| 23 | And also, there are several people here who  |
| 24 | may have membership on the at any rate, thank you for  |
| 25 | coming, and I hope there will be more meetings, and we   |

# Connecticut Yankee Decommissioning

NRC Public Meeting Haddam-Killingworth High School January 15, 1997

# Introduction

### Ted C. Feigenbaum Executive Vice President & Chief Nuclear Officer - Connecticut Yankee

# Agenda

- Decommissioning
  Overview / Commitment
  to Public Participation
- Plans for 1997 / Decommissioning Priorities and Options
- Closing Remarks

**Ted Feigenbaum** 

Jere LaPlatney

**Ted Feigenbaum** 

# Our Decommissioning Commitments

- Safety
- Providing Adequate Resources
- Vigilant Compliance with all the Rules and Regulations
- Public Participation

# Jere LaPlatney Unit Director Connecticut Yankee

# CY in 1997

- ... a year for improvement and planning
  - Complete Corrective Actions for 1996
    Performance Problems
  - Organize and Staff for Decommissioning
  - Change License to Reflect Defueled
    Plant

# CY in 1997

... a year for improvement and planning

- Develop and Submit Post-Shutdown Decommissioning Activities Report (PSDAR)
- Begin Planning of Actual Decommissioning Work
- No Major Decommissioning Work Will Be Done Until at Least 90 Days After
   PSDAR is Submitted

# CY Decommissioning Priorities

- Safety
- fuel storage
- radiological
- environmental
- industrial
- Quality
- Performance

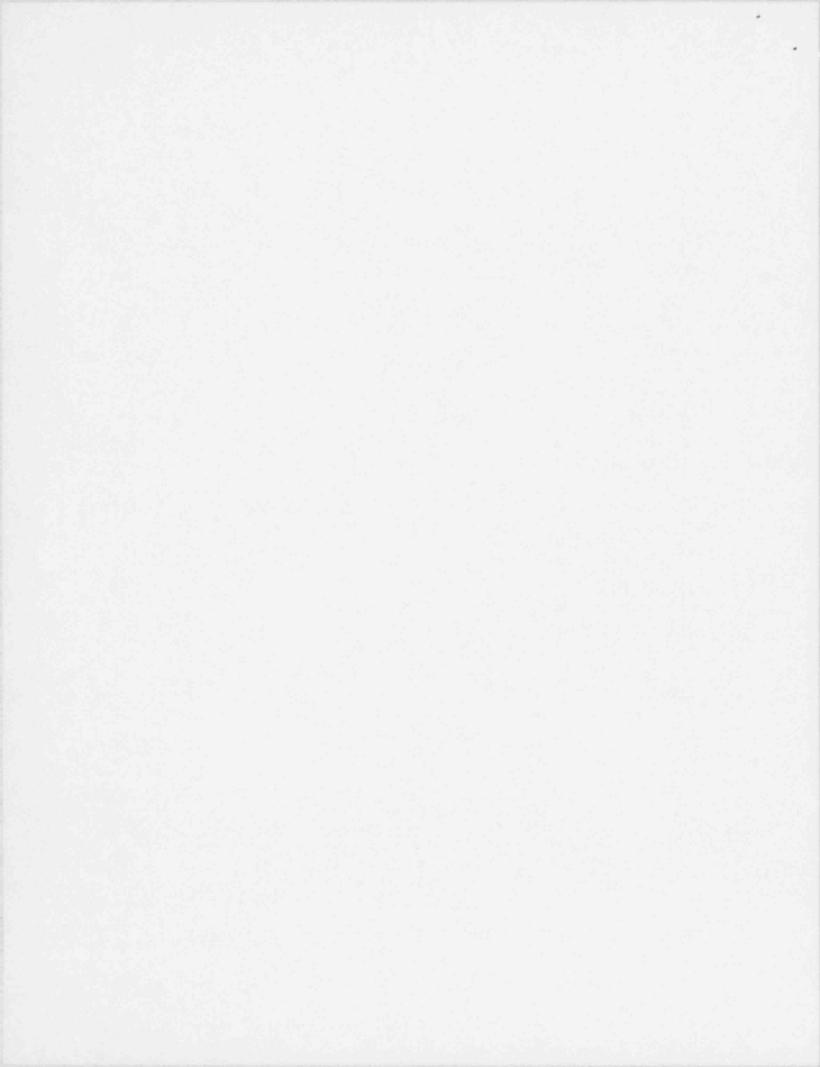

## **Decommissioning Options**

- Prompt Dismantlement (DECON), Safe Storage (SAFSTOR), or Entombment (ENTOMB)
- All Options Will Be Evaluated
- Current Cost Estimate Based on Prompt Dismantlement
- PSDAR will Include the Final Decision and Cost Estimate
- There are no Future Plans for the Site

#### AGENDA

- 1. 6:30 to 7:00pm. Advance sign-up for public. Each person, depending on number of sign-ups and time available, will be able to make comments during public comment period.
- 2. 7:00 pm. Mrs. Marjorie DeBold, First Selectman of Haddam chairs meeting. She describes purpose of meeting, briefs attendees on agenda and establishes ground rules.
- 7:10 pm Mr. Ted Feigenbaum of Northeast Utilities and Mr. Jere LaPlatney, Plant Manager will outline future plans for the plant. Open to questions after presentation.
- 4. 8:00 pm. Mr. Michael Masnik of NRC describes decommissioning regulations and proposed future NRC oversight. Open to questions after presentation.
- 5. 9:00 pm. Public comment period.
- 6. 10:00 pm. Closing remarks by Chair and adjournment.

#### DECOMMISSIONING NUCLEAR POWER PLANTS

#### Background

Several licensees have announced their decisions to permanently cease power operation of their nuclear power plants. The licensees' decisions have been based on economic and technical considerations. Thus, these facilities and several others have entered the decommissioning process before their operating licenses expire, earlier than originally anticipated. Decommissioning highlights for individual plants are presented in Tables 1 and 2.

#### Decommissioning

Title 10 of the <u>Code of Federal Regulations</u>, Section 50.2 (10 CFR 50.2), defines decommissioning as the safe removal of a facility from service and reduction of residual radioactivity to a level that permits release of the property for unrestricted use and termination of the license. Decommissioning involves three different alternatives: DECON, SAFSTOR, or ENTOMB.

Under DECON (immediate dismantlement), equipment, structures, and portions of the facility containing radioactive contaminants are removed or decontaminated to a level that permits release for unrestricted use and termination of the license.

Under SAFSTOR, often considered "delayed DECON," a nuclear facility is maintained in a condition that allows the decay of radioactivity to reduce radiation levels at the facility; afterwards, it is dismantled.

Under ENTOMB, radioactive contaminants are encased in a structurally long-lived material such as concrete and the entombed structure is appropriately maintained and monitored until the radioactivity decays to a level permitting unrestricted release of the property.

To be acceptable, the method selected must provide for completion of decommissioning within 60 years. A time beyond 60 years will be considered only when necessary to protect public health and safety in accordance with Nuclear Regulatory Commission (NRC) regulations.

#### Regulations

The procedure for decommissioning a nuclear power plant is set out principally in NRC regulations 10 CFR Parts 50.75, 50.82, 51.53, and 51.95. An underlying assumption embodied in the regulations when the Commission issued the original decommissioning regulations in 1988 was that decommissioning would occur after the facility operating license expired. Five

years before the licensee expected to end operation of the plant, it was obligated to submit a preliminary decommissioning plan containing a cost estimate for decommissioning and an up-to-date assessment of the major technical factors that could affect planning for decommissioning. Then, within one year before expiration of the license, (or two years after operation for plants closing before their license expires) a licensee had to submit to NRC an application for authority to decommission that facility, together with an environmental report covering the proposed decommissioning activities. However, several licensees have permanently ceased operations prematurely without having submitted the documentation required under the regulations. In addition, these licensees requested exemptions from some safety requirements to reflect their status of no longer having fuel present in the reactor. Because the regulations did not specifically address prematurely shutdown facilities, these situations were handled on a case-by-case basis.

Throughout fiscal years 1995 and 1996, the NRC staff worked on revisions to NRC regulations to clarify their applicability and to make certain changes in decommissioning policy regarding permanently shut down reactors. On July 20, 1995, the Commission issued a "Notice of Proposed Rulemaking on Decommissioning of Nuclear Power Plants." On July 2, 1996, the Commission approved the final rule. The rule was published in the Federal Register July 29 and became effective 30 days from the date of publication (on August 28, 1996). The final rule redefines the decommissioning process, defines terminology related to decommissioning, requires licensees to provide the NRC with early notification of planned decommissioning activities at their facilities, and explicitly sets forth the applicability of certain NRC requirements to permanently shutdown reactors.

The Commission believes the amendments will enhance efficiency and uniformity in the decommissioning process for nuclear power reactors. The amendments allow for public participation in the decommissioning process and furnish the licensed community and the public a better understanding of the process as the operating personnel at a nuclear power reactor facility undergo the transition from an operating organization to a decommissioning organization.

The revisions to 10 CFR 2, 50, and 51 related to the final rule on decommissioning power reactors require that:

- (a) Within 30 days after a nuclear power plant licensee decides to cease operations permanently, the licensee must submit a written certification to the NRC, and
- (b) When the licensee permanently removes nuclear fuel from the reactor vessel, the licensee must submit another written certification to the NRC.

When NRC receives these certifications, the licensee's authority to operate the reactor or load fuel into the reactor vessel will be removed by regulation. This will entitle the licensee to an annual fee reduction and eliminate the obligation to adhere to certain requirements needed only during reactor operation. Within two years after submitting the certification of permanent cessation of operations, the licensee must submit a post-shutdown decommissioning activities report (PSDAR) to the NRC. This report must provide a description of the licensee's planned decommissioning activities, along with a schedule for accomplishing them, and an estimate of the expected costs.

In the ISDAR, the licensee is required to discuss the reasons for concluding that environmental impacts associated with the sitespecific decommissioning activities have already been considered in environmental reports or environmental impact statements prepared previously. If this has not been done, the licensee would have to request a license amendment for approval of the activities and submit to the NRC an environmental report on the additional impacts.

After receiving a PSDAR, the NRC must publish a notice of receipt, make the PSDAR available for public review and comment, and hold a public meeting in the vicinity of the plant to discuss the licensee's intentions.

Ninety days after the NRC receives the PSDAR, and generally 30 days after the public meeting, the licensee can begin to perform major decommissioning activities without specific NRC approval. These activities could include permanent removal of such major components as the reactor vessel, steam generators, large piping systems, pumps, and valves.

The final regulations state that decommissioning activities conducted without specific prior NRC approval must not:

- foreclose release of the site for possible unrestricted use,
- result in there being no reasonable assurance that adequate funds will be available for decommissioning,
- cause any significant environmental impact not previously reviewed.

If any decommissioning activity could not meet these terms, the licensee is required to submit a license amendment request, which would provide an opportunity for a public hearing.

Initially, the licensee could use up to three percent of the amount specified in 10 CFR 50.75 for decommissioning activities without prior NRC approval. An additional 20 percent could be expended 90 days after submittal of the PSDAR. The remaining decommissioning trust funds would be available for decommissioning activities when the licensee submits a detailed

site-specific decommissioning cost estimate to the NRC.

#### Rulemaking

A new rule, entitled "Safeguards for Spent Nuclear Fuel or High-Level Radioactive Waste = 10 CFR Parts 60, 72, 73, and 75" (SECY-95-104), addresses physical protection requirements for the storage of spent fuel and high level radioactive waste in a permanently shutdown reactor, independent spent fuel storage installation, monitored retrievable storage installation, or a geologic repository. The Commission published the proposed rule on August 18, 1995. After a period for public comment, a final rule was scheduled to be issued April 15, 1996. However, the NRC staff is requesting a Commission policy review of ISFSI safeguards based on public comments and staff reviews. Following the Commission policy review, the proposed rule will be revised and will be submitted for public comment if significant changes occur.

Other rulemakings that are anticipated in the decommissioning area include a revision of regulations to address spent fuel cooling periods and indemnity issues; decommissioning costs, funding, and financial assurance.

#### Prematurely Shutdown Plants

Since the original decommissioning rule was published in 1988, seven power reactor facilities have shut down prematurely:

- · Fort St. Vrain Nuclear Generating Station,
- · Shoreham Nuclear Power Station,
- · Rancho Seco Nuclear Generating Station,
- · Yankee Rowe Nuclear Station,
- · San Onofre Nuclear Generating Station, Unit 1,
- · Trojan Nuclear Plant, and
- · Haddam Neck Plant.

Three Mile Island Nuclear Station, Unit 2, also ceased operation after the March 28, 1979, accident. In addition, Indian Point Nuclear Generating Station Unit 1 and Dresden Nuclear Power Station Unit 1, Humboldt Bay Power Plant Unit 3, and LaCrosse Boiling Water Reactor, which were shut down in 1974, 1978, 1980, and 1987, respectively, are in the decommissioning process.

#### Approved Decommissioning Plans

In June 1992, the NRC issued an order to Long Island Power Authority, approving the Shoreham decommissioning plan. Long Island Power Authority announced completion of dismantlement of the facility in October 1994.

In November 1992, the NRC issued an order approving the Fort St. Vrain decommissioning plan and dismantlement activities are nearly completed.

The NRC approved Yankee Rowe's decommissioning plan on February 14, 1995. Subsequently, due to a U.S. Court of Appeals ruling, the Commission rescinded its approval on October 12, 1995. A hearing was conducted and on October 18, 1996, the Commission denied the most recent petition regarding the decommissioning plan. On October 28, 1996, the NRC staff informed Yankee Atomic that decommissioning activities may be conducted at Yankee Rowe.

On June 16, 1993, the NRC staff issued its safety evaluation and environmental assessment of the Rancho Seco decommissioning plan. The plan proposes safe storage (SAFSTOR) of the facility for about 20 years followed by dismantlement and decontamination. Approval of the decommissioning plan was delayed because of contentions raised by the Environmental and Resources Conservation Organization (ECO). However, ECO reached a settlement with the Sacramento Municipal Utility District, the licensee for Rancho Seco, and on August 1, 1994, withdrew from the proceeding. The staff reviewed and updated its previous safety evaluation and issued the order authorizing decommissioning of Rancho Seco on March 20, 1995.

On April 15, 1996, the NRC issued an order approving the Trojan decommissioning plan and dismantlement activities are engoing.

### NRR/NMSS Memorandum of Understanding on Decommissioning

On March 15, 1995, the Office of Nuclear Reactor Regulation (NRR) and the Office of Nuclear Material Safety and Safeguards (NMSS) reached agreement on a realignment of certain responsibilities regarding power reactor decommissioning. In the future, NRR will maintain project management responsibility for power reactor facilities until fuel is permanently transferred from the spent fuel pool.

Seymour H. Weiss, Non-Power Reactors and Decommissioning Project Directorate, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC 20555, (301) 415-2170

#### TABLE 1

#### DECOMMISSIONING HIGHLIGHTS

INDIAN POINT UNIT 1

- October 31, 1974, plant was permanently shut down because its emergency core cooling system did not meet current regulatory requirements.
- January 1976, reactor was defueled.
- June 19, 1980, NPC order revoked authority to operate plant.
- October 17, 1980, licensee submitted proposed decommissioning plan. NRC review has been ongoing since then and has prompted numerous supplemental licensee submittals.
- January 1996, the proposed decommissioning plan was submitted to Commission for approval.

HUME OLDT BAY POWER PLANT UNIT 3

- July 2, 1976, plant was shut down due to seismic issues.
- July 30, 1984, Decommissioning Plan submitted.
- July 19, 1988, SAFSTOR Decommissioning Plan approved. Spent fuel (390 assemblies) will remain onsite in the spent fuel pool until a federal repository is available for it.

DRESDEN UNIT 1

- Occober 31, 1978, plant was shut down to meet new federal regulations and to perform chemical decontamination of major piping systems.
- January 7, 1986, while plant was still out of service, licensee announced its decision to decommission the plant, rather than comply with regulations imposed in response to the March 1979 accident at Three Mile Island Unit 2.
- July 23, 1986, license was amended to possession only license (POL) status.
- September 3, 1993, decommissioning plan was approved.
- January 25, 1994, licensee personnel discovered about 55,000 gallons of water in the containment building. The source of the water was a service water line which that had frozen and ruptured within the unheated containment. The water was pumped from the containment building for processing by the site radwaste system. The NRC responded by conducting a two-week special team inspection that identified numerous discrepancies that the licensee had to address.
- July 13, 1994, licensee submitted a check for \$200,000 in response to the NRC-imposed civil penalty for its failure to maintain required systems and to staff unit in accordance with Dresden Unit 1 decommissioning plan.

LA CROSSE

- April 30, 1987, plant was permanently shut down.
- August 7, 1991, SAFSTOR decommissioning plan was approved.

FORT ST. VRAIN

- August 18, 1989, plant was permanently shut down because of failure of the control rod drives and degradation of the steam generator ring header.
- May 21, 1991, license was amended to possession only license (POL) status.
- June 11, 1992, all fuel was placed in an onsite independent spent fuel storage installation (ISFSI).
- November 23, 1992, NRC issued order approving licensee decommissioning plan.
- September 1, 1993, removal of the prestressed concrete reactor vessel top head was completed.
- April 1, 1994, all of the graphite reflector blocks had been removed from the reactor vessel and shipped to the low level waste burial site at Hanford, Washington.
- July 1, 1996, dismantlement is nearly complete.

#### SHOREHAM

- June 28, 1989, licensee's shareholders approved agreement with the New York State to not operate the facility.
- August 24, 1989, reactor vessel was defueled.
- June 14, 1991, license was amended to POL status.
- February 29, 1992, license was transferred to Long Island Power Authority for decommissioning of plant.
- June 11, 1992, NRC issued order approving licensee decommissioning plan.
- September 1993, transfer of fuel to Limerick began. Fuel transfer was completed June 1994.
- October 1994, the licensee announced completion of the dismantlement. Confirmatory surveys conducted.
- April 11, 1995, decommissioning complete, POL terminated.

#### RANCHO SECO

- June 7, 1989, plant was shut down because voters approved non-binding referendum prohibiting licensee from operating facility.
- December 8, 1989, reactor vessel was defueled.
- March 17, 1992, license was amended to POL status.
- Environmental and Resources Conservation Organization (ECO) was active intervenor in regards to proposed decommissioning plan.
- June 16, 1993, NRC issued safety evaluation and environmental assessment of proposed decommissioning plan.

- November 30, 1993, the Atomic Safety and Licensing Board (ASLB) admitted for hearing certain contentions associated with decommissioning funding and costs of Rancho Seco independent spent fuel storage installation.
- August 1, 1994, ECO reached settlement with Sacramento Municipal Utility District and filed notice of withdrawal; ASLB terminated proceeding.
- September 2, 1994 Commission order (CLI-94-14) authorized NRC staff to issue decommissioning order.
- March 20, 1995, NRC approved the decommissioning plan for SAFSTOR by issuing the decommissioning order.

#### YANKEE ROWE

- October 1, 1991, plant was shut down and vessel defueled because of concerns about reactor vessel integrity.
- February 27, 1992, licensee announced permanent cessation of operations because of inability to address uncertainties associated with the safety margin of the reactor vessel.
- August 5, 1992, license was amended to POL status.
  Tulu 15, 1992, NEC stated it had "no objection to estimate the state of the state of
- July 15, 1993, NRC stated it had "no objection to early component removal activities" proposed by the licensee.
- November 16 to December 8, 1993, as part of the early component removal activities, the four steam generators and pressurizer were shipped from the plant to the low level waste burial site in Barnwell, South Carolina.
- March 11, 1994, NRC stated it had "no objection" to use of decommissioning trust funds for proposed second phase of activities associated with early removal of components, including reactor coolant pumps, contaminated piping, and asbestos. Activities were completed by June 30, 1994.
- March 31, 1994, Citizens Awareness Network (CAN) filed a complaint in the Massachusetts District Federal Court claiming the NRC did not follow National Environmental Protection Act (NEPA) in its review of licensee's early component removal program. The court denied the complaint on jurisdictional grounds; however, CAN appealed to the U.S. Court of Appeals for the First Circuit in Boston.
- February 14, 1995, NRC approved the decommissioning plan for SAFSTOR.
- March 23, 1995, Yankee Atomic applied for a (10 CFR 71) license to enable shipment of the reactor vessel. The vessel will not be shipped before summer 1996.
- July 20, 1995, First Circuit found that the Commission erred when it rejected CAN's request for a hearing on the component removal program, that CAN was entitled to a hearing under section 189a of the Atomic Energy Act, and that the NRC had violated NEPA by permitting YAEC to initiate the component removal program before the agency had prepared an environmental assessment or impact statement. The Court remanded the case to the Commission for further action.

- October 27, 1995, in response to the July 1995 Court of Appeals decision, the NRC staff issued a Federal Register notice offering the public an opportunity for hearing.
- November 30, 1995, CAN and the New England Coalition on Nuclear Pollution submitted a joint petition to intervene on the Yankee decommissioning plan.
- October 18, 1996, the Commission issued an order which denied CAN's latest petition regarding the decommissioning plan.
- October 28, 1996, the NRC staff informed Yankee Atomic that decommissioning activities may be conducted at Yankee Rowe.

#### THREE MILE ISLAND UNIT 2

- March 28, 1979, accident occurred in the plant that caused permanent cessation of operations.
- January 30, 1990, reactor was defueled.
- August 12, 1993, processing of accident-generated water was completed.
- September 14, 1993, POL amendment was issued.
- December 28, 1993, post-defueling monitored storage technical specifications were issued.

#### SAN ONOFRE, UNIT 1

- November 30, 1992, based on settlement agreement with California Public Utilities Commission licensee permanently shut down plant rather than bring it into compliance with current NRC safety requirements.
- October 23, 1992, POL amendment was issued. Amendment became effective March 9, 1993, when reactor vessel was certified as completely defueled.
- December 28, 1993, permanently defueled technical specifications were issued.
- November 3, 1994, licensee submitted proposed decommissioning plan for NRC review.

#### TROJAN

- January 4, 1993, licensee announced permanent cessation of operations.
- January 27, 1993, reactor was defueled.
- May 5, 1993, NRC issued POL amendment.
- November 1994, licensee commenced removal of steam generators and pressurizer for shipment to the U.S. Ecology low level waste burial site at Hanford, Washington.
- January 26, 1995, licensee submitted proposed decommissioning plan.
- November 1, 1995, licensee completed the large component removal project.

- December 22, 1995, NRC staff published Federal Register notice offering opportunity for public comment on Environmental Assessment and Safety Evaluation for the decommissioning plan. The 30-day comment period passed without a request for hearing.
- March 31, 1996, permanently defueled technical specifications were issued.
- April 15, 1996, NRC issued the order approving the decommissioning plan.

#### HADDAM NECK

December 4, 1996, licensee announced permanent cessation of operations.

#### BIG ROCK POINT

- May 31, 2000, is expiration date of current license.
- February 27, 1995, licensee submitted SAFSTOR decommissioning plan for early NRC review.
- February 14, 1996, Consumers Power Company requested that the NRC defer review of the Big Rock Point decommissioning plan until after issuance of the revised 10 CFR Part 50 decommissioning regulations.

United States Nuclear Regulatory Commission

## PUBLIC MEETING ON DECOMMISSIONING

January 15, 1997

\* Post-defueling monitored storage (PDMS).

# **DECOMMISSIONING PROCESS**

- Preliminary cost estimate five years before permanent shutdown
- Certification of permanently ceasing power generation operations - within 30 days of the decision
- Certification of permanent fuel removal from the reactor regulatory relief
- Submission of the Post-Shutdown Decommissioning Activities Report (PSDAR) - within 2 years of shutdown
- Long term storage followed by dismantlement or immediate dismantlement
- License Termination Plan submitted approximately two years prior to expected license termination
- License termination

### POST-SHUTDOWN DECOMMISSIONING ACTIVITIES REPORT (PSDAR)

- Description of the planned decommissioning activities
- Schedule for the accomplishment of the planned activities
- Estimate of expected costs
- Discussion of environmental impacts

## ADDITIONAL REQUIREMENTS ON DECOMMISSIONING ACTIVITIES

The licensee is prohibited from performing any decommissioning activity that:

- Forecloses the release of the site for possible unrestricted use; or
- results in significant environmental impacts; or
- results in there no longer being reasonable assurance that adequate funds will be available.

# LICENSE TERMINATION PLAN

- Site characterization
- Identification of remaining dismantlement activities
- Plans for site remediation
- Detailed plans for the final radiation survey
- Description of end use of site if restrictions are imposed
- Updated site-specific cost estimate of remaining costs
- Supplement to the environmental report describing new information

## LICENSE TERMINATION

• License terminated if the license termination plan was followed and the site radiologically cleaned up.
