Docket 50-344
License NPF-1

U.S. Nuclear Regulatory Commission
ATTN: Document Control Desk
Washington, DC 20555

Dear Sirs:

Trojan Nuclear Plant Fire Protection Plan, Amendment 18, PGE-1012

This letter documents the transmittal of eleven copies of Amendment 18 to PGE-1012, "Trojan Nuclear Plant Fire Protection Plan." In accordance with 10 CFR 50.48(f), Amendment 18 reflects revisions to the Fire Protection Program made during decommissioning activities. The changes do not reduce the effectiveness of fire protection for facilities, systems, and equipment which could result in a radiological hazard, and take into account the decommissioning plant conditions and activities.

PGE certifies that Amendment 18 accurately presents changes to PGE-1012 since the previous submittal of Amendment 17, necessary to reflect information and analyses submitted to the Commission or prepared pursuant to Commission requirements.

Sincerely,

Stephen M. Quennoz

Summary Description of Changes

The following list provides a synopsis of the changes incorporated into PGE-1012, Amendment 18. These changes have been evaluated and determined not to involve an unreviewed safety question as required by 10 CFR 50.59.

In accordance with 10 CFR 50.48(f), Amendment 18 reflects revisions to the Fire Protection Program made during decommissioning activities. The changes do not reduce the effectiveness of fire protection for facilities, systems, and equipment which could result in a radiological hazard, and take into account the decommissioning plant conditions and activities.

These changes also have been shown to meet the criteria of Amendment No. 192 of Trojan Possession Only License, NPF-1, in that the changes do not adversely impact the safe storage of irradiated fuel or increase the likelihood of an offsite release of radioactive material due to a fire.

- | | |
|-------------|---|
| LDCR 97-011 | These changes reflect the use of the Condensate Demineralizer Building for radwaste processing. Section 5 was revised to correct the description concerning combustion product monitoring. Exception to the applicable Branch Technical Position was clarified and changes were made to denote that automatic fire detection is not installed or required in the Condensate Demineralizer Building. |
| LDCR 97-014 | Changes to the text were made to delete specific fire protection equipment that has been deactivated and removed. A correction to Section 3.8 was included to reflect a two-person fire brigade, a change that was made with Revision 17. |
