License No. 12-15117-01  
General License (10 CFR 31)

Gentlemen:

This refers to the routine safety inspection conducted by Mr. James W. Patterson of this office on March 12, 1986, of activities authorized by NRC Byproduct Material License No. 12-15117-01 and your general license and to the discussion of our findings with you and Mr. Richard W. Morris at the conclusion of the inspection.

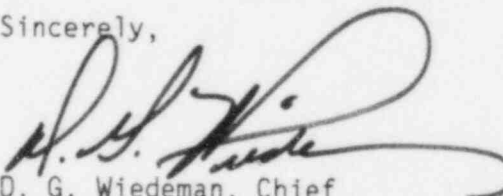

The inspection was an examination of activities conducted under your license as they relate to radiation safety and to compliance with the Commission's rules and regulations and with the conditions of your license. The inspection consisted of a selective examination of procedures and representative records, observations, independent measurements, and interviews with personnel.

During this inspection, certain of your activities under License No. 12-15117-01 appeared to be in violation of NRC requirements, as specified in the enclosed Appendix and a written response is required.

No violations were identified for your General License.

We will gladly discuss any questions you have concerning this inspection.

Sincerely,

  
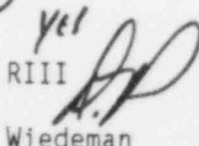

D. G. Wiedeman, Chief  
Nuclear Materials Safety  
Section 1
