

MAR 17 1986

Docket No. 50-461

Illinois Power Company
ATTN: Mr. W. C. Gerstner
Executive Vice President
500 South 27th Street
Decatur, IL 62525

Gentlemen:

This refers to the special safety inspection conducted by Mr. R. N. Sutphin of this office on January 27-30, February 3-7, 10-13, 24-27, 1986, of activities at Clinton Nuclear Power Station, Unit 1, authorized by NRC License No. CPPR-137 and to the discussion of our findings with Mr. D. P. Hall and others of your staff at the conclusion of the inspection.

This was a special in-depth inspection of the Construction Records Verification Program (RVP) at Clinton. It was prompted by your decision on November 15, 1985, to terminate the RVP before its completion. Your November letter stated that the RVP resulted in no significant adverse findings and expressed your confidence in the construction records' acceptability. As a result of this inspection, we concur with your termination of the RVP.

No violations of NRC requirements were identified during this inspection.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter and the enclosed inspection report will be placed in the NRC Public Document Room.

We will gladly discuss any questions you have concerning this inspection.

Sincerely,

Original signed by
James G. Keppler

James G. Keppler
Regional Administrator
