WILLIAM G. COUNSIL

Mr. Eric H. Johnson, Acting Director Division of Reactor Safety and Projects U.S. Nuclear Regulatory Commission 611 Ryan Plaza Drive, Suite 1000 Arlington, TX 76012

SUBJECT: COMANCHE PEAK STEAM ELECTRIC STATION

DOCKET NO. 50-445

THERMOLAG

SDAR: CP-85-42

Dear Mr. Johnson:

On September 20, 1985, we verbally notified your Mr. T. Westerman of a deficiency regarding the possible adverse effects of substituting pre-formed sections of thermolag on conduit and conduit support installations. This is an interim report of a potentially reportable item under the provisions of 10CFR50.55(e). We have submitted an interim report logged TXX-4572. dated October 16, 1985. The evaluation and disposition of this issue will be formulated in the course of the conduit and cable tray design adequacy programs (CPRT Program Plan Item VIII). The analysis required to resolve this issue is scheduled for completion by April 25, 1986.

We are continuing our investigation and anticipate completion of our final report by May 16, 1986.

Very truly yours,

W. G. Cours, Q

W. G. Counsil
