AEC SCHEDULES PUBLIC HEARING FOR CALIFORNIA REACTOR

The Atomic Energy Commission has scheduled a public hearing July 5 to consider initial operation of the nuclear power reactor of Pacific Gas and Electric Company located at Humboldt Bay, near Eureka, California. The hearing will be at 10 a.m. in the Auditorium of AEC Headquarters at Germantown, Maryland.

The Pacific Gas and Electric Company facility will be a single-cycle, internal-natural circulation, boiling water reactor with a gross electrical output of approximately 50,000 kilowatts. The provisional operating license sought by the company would permit loading of nuclear fuel into the reactor and operation up to approximately 50,000 electrical kilowatts.

A copy of the Commission's "Notice of Hearing" is attached.
