COMMENTS:

I approve the staff proposal subject to the following conditions:

1. That the primary end user of the data and its analysis be assigned responsibility for the project management of this effort,
2. That the organization responsible for maintaining the database and producing the analysis output is tasked with supporting the primary end user's needs, and
3. That the primary end user advises the Commission after a one year period of using the proposed approach whether the voluntary approach has been successful and remains viable to meet regulatory needs.
