GENERAL

On February 5, 1986, the NRC staff met with South Carolina Electric and Gas Company (SCE&G) to discuss management philosophy and to tour the site. The meeting was held at the V. C. Summer Nuclear Station. A list of those persons who attended the meeting is enclosed.

DISCUSSION

First, a meeting was held at the site and items discussed were spent fuel storage, the missing jumpers in the overpower-delta T circuit cords, transfer of operations to the alternate shutdown panel, and containment tendon surveillance. A plant tour was then conducted and included the control room, the technical support center, the intermediate building, the turbine building, a diesel generator room and the service water intake structure. Finally, a tour was conducted of the simulator, emergency operations facility, and the environmental laboratory contained at the nuclear training center.
