Dear Dr. Niemczyk:

This responds to your letters of November 26 and December 27, 1985, requesting support from the NRC for the upcoming symposium on Chemical Phenomena Associated with Severe Nuclear Plant Accidents. We agree that this symposium offers a unique opportunity for researchers to discuss the chemical problems related to severe nuclear plant accidents and should benefit our current research program.

NRC will award a \$5000 grant to the American Chemical Society for partial support of the symposium. We intend that these funds be used only for those expenses which are directly related to the administrative costs of the symposium, e.g., payment for meeting facilities, secretarial salaries, supplies, telephone and preparation of the proceedings manuscript. You will be contacted by our Division of Contracts for execution of the grant and for more specifics on use of the grant funds.

In addition, we have requested the NRC Division of Technical Information and Document Control to contact you concerning the printing of the symposium proceedings.

Sincerely,

Original signed by:

ROBERT B. MINOGUE
