Re: Letter Dated January 8, 1985 To Amend NRC License Number 13-20329-01

Gentlemen:

In order to complete your amendment request it will be necessary for you to address the following items:

1. Be advised that we cannot authorize Adams County Memorial Hospital as a location of use on both your license and on the license issued to Wells Community Hospital since the administrative control and responsibility of licensed material must be maintained under one institutions' license.

Since Adams County Memorial Hospital is currently a location of use on Wells Community Hospital's license (13-17115-02), we cannot authorize that location of use on your license until Wells Community Hospital requests an amendment to their license to remove Adams County Memorial Hospital as a place of use for licensed materials.

Note that you need to discuss this situation with Wells Community Hospital and determine which hospital may best service Adams County Memorial Hospital and proceed with your licensing action from there.

2. In order to authorize your institution to transfer materials to Wells Community Hospital requires an exemption from the regulations contained in 35.14(b) of 10 CFR Part 35. Specifically, Wells Community Hospital must request an amendment to their license to receive materials from Jay County Hospital (not a radiopharmaceutical supplier licensed under Section 32.72 of 10 CFR Part 32). Be advised that the use of licensed materials at Jay County Hospital and Wells Community Hospital (both NRC licensees) must remain administratively separate, and we cannot authorize two NRC licensees to use materials within the same facilities.
