F. Schroeder, Acting Director, Division of Technical Review, NRR

TECHNICAL ASSISTANCE REQUEST NO. ORB-2-169

Plant Name: Humboldt Bay Power Plant, Unit No. 3

Docket Number: 50-133

Branch Code: ORB-2

Project Manager: Fred Anderson (7403)

Technical Review Branches: Containment System Branch (CSB)
Structural Engineering Branch (SEB)
Materials Engineering Branch (MEB)

Target Completion Date: September 1, 1975

Description of Request: As requested by our letter dated April 17, 1975, Pacific Gas and Electric Company (PG&E) has completed their review of the effect of pool dynamic loads on the design of their containment structures. You are requested to review the attached PG&E report to determine if the analysis of this generic concern is acceptable. The review to be performed by the designated TR branches should be in accordance with an April 17, 1975 memorandum from TR to RL titled, "Proposed Method For Review of Mark I, II and III Pool Dynamics Loads."

Original Signed by:
Dennis L. Ziemann

Dennis L. Ziemann, Chief
Operating Reactors Branch #2
Division of Reactor Licensing
