Docket No. 50-456
Docket No. 50-457

Commonwealth Edison Company
ATTN: Mr. Cordell Reed
Vice President
Post Office Box 767
Chicago, IL 60690

Gentlemen:

The Nuclear Regulatory Commission has completed its Systematic Assessment of Licensee Performance (SALP) relating to the performance of the Braidwood Station and will present its findings at a meeting on March 14, 1986, at 10:00 a.m. at the U.S. Nuclear Regulatory Commission, Region III Office in Glen Ellyn, Illinois. Arrangements for this meeting were made between M. Wallace of your staff and R. Gardner of Region III on February 18, 1986.

We encourage Commonwealth Edison Company to have appropriate corporate and plant management representation at the meeting to ensure a mutual understanding of the issues and findings being presented by NRC.

While this meeting is considered a presentation and discussion forum between Commonwealth Edison and the NRC, the meeting will be opened to any other interested parties as observers. Those persons outside the licensee and NRC staffs should inform the Regional Office, in advance of the meeting, of their intent to participate.

We hope this meeting will benefit your organization and provide you with a meaningful characterization of the overall safety performance for the Braidwood Station.

Sincerely,

"Original Signed by E. G. Greenman" for

Charles E. Norelius, Director
Division of Reactor Projects
