

UNITED STATES
 NUCLEAR REGULATORY COMMISSION
 WASHINGTON, D. C. 20555

RECEIVED

JUN 20 1985

MEMORANDUM FOR: William O. Miller, Chief
 License Fee Management Branch
 Office of Administration

FROM: R. S. Brown, Jr., Director
 Planning and Program Analysis Staff
 Office of Nuclear Material Safety
 and Safeguards

SUBJECT: LICENSE FEE MEMOS

The enclosed license fee memos and backup materials are for reactor casework with hours expended during the 6 month period 6/24/84 - 12/22/84.

As stated in my July 23 memorandum to you on procedures for administration of the revised fee rule, NMSS expects LFMB to retain backup materials (computer listing of hours and copies of contract correspondence) to be released to licensees upon request. Please note that the monthly letter status reports should not be released without a prescreening by NMSS because they often contain information considered to be sensitive about competitors. As specified in the referenced memorandum, also note that unreconciled monthly letter status reports received from DOE and private contractors are the source of contract costs.

Please note, we are currently processing the remaining OL reviews which involve fresh fuel storage licenses. These will be forwarded as soon as possible.

The following reactors had no casework associated to them during the 6 month period 6/24/84 - 12/22/84, thus no hours have been charged.
