COMPLIANCE INSPECTION REPORT - MONSANTO CHEMICAL COMPANY, ST. LOUIS 24,
MISSOURI - LICENSE NO. 24-1113-4

RECEIVED: NY:JNT

Enclosed is the compliance inspection report covering the byproduct
material program of the subject licensee.

There are no items of noncompliance listed upon the report but it is
felt that some clarification is necessary with respect to license
condition number 13 prohibiting removal of the source from the
Tracerlab, Inc., Model No. 35-34 Gauge. This license condition
does not seem to be in agreement with the licensee's application
dated May 25, 1958, and referenced to the license in condition 14.
The application does not mention the use of the 35-34 gauge in any
way but does refer to storage of the source in a lead container
supplied by Tracerlab, Inc. As the inspection showed that the
source was, in fact, being stored as mentioned in the application,
no citation was made.
