

May 28, 1963

Mr. M. Nugent  
Monsanto Chemical Company  
Carondelet Plant  
8201 Idaho Avenue  
St. Louis 11, Missouri

Dear Mr. Nugent:

I wish to acknowledge receipt of your letter of May 14, 1963 regarding a test involving the use of radioisotopes with teeth.

It appears that the most reasonable course of action would be to request amendment of the Monsanto Chemical Company License No. 24-1113-7 (currently showing Dr. Thomas Schiff as individual user). This amendment application should show that you will be the using individual and will replace Dr. Schiff and should give a brief resume of your training and experience with radioactivity. In addition, the amendment application should show any changes in facilities, equipment, and procedures from that of the application on which the license was based. I note that an application of May 8, 1963 for renewal of License No. 24-1113-7 currently is pending with the Division of Licensing and Regulation in Washington, D. C. Your amendment application should mention this pending application.

Your application should be submitted in three copies to:

Isotopes Branch  
Division of Licensing and Regulation  
U. S. Atomic Energy Commission  
Washington 25, D. C.

The application may be in the form of a letter or on the enclosed application Forms AEC-313. You should note that information
