MONSANTO CHEMICAL COMPANY

ST. LOUIS 4, MISSOURI

January 4, 1954

Dr. Paul Aebersold, Director
Isotopes Branch
Atomic Energy Commission
Oak Ridge, Tenn.

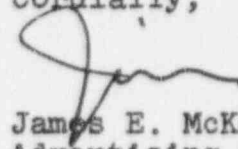

Dear Paul:

I'm attaching a copy of Dr. Thomas' article on atomic energy which appeared in the anniversary issue of the ST. LOUIS POST-DISPATCH. As you can see, material you sent was most helpful and we certainly appreciate your help.

After seeing you in New York in November and Dr. Woodruff at Mound Laboratory last month, I must say that either the radioactivity or the Tennessee air must be most beneficial to you both.

Best wishes for the New Year.

Cordially,

James E. McKee
