MIDLAND PROJECT
DOCKET NO 50-329, 50-330
INSERVICE INSPECTION PROGRAM
FILE: 0505.8 SERIAL: 5930

Enclosed with this letter are five (5) copies (copy numbers 19-23) of the "Preservice and First 10 Year Interval Inspection Plan for Nondestructive Examination and System Pressure Testing at the Consumers Power Company Midland Plant Units 1 and 2." This Plan is submitted in response to NRC Requests 121.1 and 121.14 relative to the Midland Operating License Review. Consumers Power reserves the right to revise this Plan should any of the following conditions occur:

1. If changes are made to Section XI of the ASME Code which Consumers Power determines are in its best interests to implement and which are accepted by means of a change to 10 CFR 50.55a or which clarify the intent of existing versions of the ASME Code;
2. If changes are made to the design or construction of the plant which impact the commitments made in this plan;
3. If preservice examinations demonstrate that commitments contained in this plan are impractical.

It should also be recognized that due to the current stage of design and construction of the Midland Plant certain data reported in Section 3 of the Plan relative to the "Number of Areas Subject to Examination", "Number Subject to PSI" and "Number Subject to ISI" are preliminary and subject to change as construction progresses.

An updated ISI Plan will be submitted to the NRC six months prior to anticipated commercial operation of Midland Plant Unit 2 as requested by NRC Request 121.1.

This Plan will, in part, form the basis of our planned meeting with the Staff on October 25, 1978 at which time Consumers Power Company will make a summary presentation of the Plan and discuss initial Staff comments.

A handwritten signature in cursive script, reading "Stephen W. Howell". The signature is written in dark ink and is positioned in the upper right quadrant of the page.
