

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D. C. 20555

DRAFT 12/17/86-A

MEMORANDUM FOR: John G. Davis, Director  
Office of Nuclear Material Safety  
and Safeguards

FROM: Victor Stello, Jr.  
Executive Director for Operations

SUBJECT: OIA REPORT REVIEW: OIA FILE #86-10 - ESTABLISHMENT OF  
REVIEW GROUP

In order to resolve issues which OIA Report 86-10 has raised, I am taking the following action:

1. You are assigned as Chairman of a Review Group to resolve issues as described below. G. Arlotto, J. Heltemes and C. Paperiello are assigned as members of the Group.
2. The task of the Review Group is to review the technical issues identified in OIA report 86-10 and to determine and document in a report to me (1) the safety significance of those issues for Comanche Peak, i.e., whether actions should be taken to rectify any unsafe conditions; (2) whether the issues when identified were appropriately handled as to process and disposition; and, (3) determine whether the current augmented review and inspection effort at Comanche Peak is sufficient to compensate for any identified weakness in Region IV's Q/A inspection programs.
3. You may task other NRC staff or utilize contractors as required, although I recommend that you keep your requirements to the minimum possible. Necessary funds will be made available at your request by PM. T. Westerman and H. Phillips will be detailed to support your independent review on a full-time basis; other members of RIV are at your full disposal as you may require. Similarly, IE and NRR staff working on Comanche Peak are available to assist.
4. Copies of the report and enclosures will be provided to you by separate cover.
5. I would like to have your report in my hands by January 30, 1987.
