Attn: Docketing and Service

Dear Sir:

I have a copy of your proposed regulation from the Federal Register, Friday, July 7, 1978, as relates to misadministration. I can only state I wish you people would cease sighting some horrendous story of misadministration as the reason for further regulatory actions on your part. I am firmly convinced most regulatory actions only occur because somebody has to find a position and a form to prove to the world around them and, primarily to themselves, there is a reason and purpose for their miserable existence. I am absolutely sick, tired and fighting mad over you misguided altruists and the utilization of the Federal Register as your fighting ground.

I feel the primary "misadministration" here is your administration of an act you convinced some congressional person was necessary and then wrote a book of regulations on a two page act. I am asking our Radiologist to peruse your letter. If the government would get out of medicine I feel the judicial branch and the private practice of medicine would take care of it far better than what you are.....at much less expense.

Sincerely yours,

*Howard L. Smith*  
Howard L. Smith, M.D.,  
President  
Chaves County Medical Society

Acknowledged by card. *7/10/78 S.S.*
