Attention: Ms. Carol Martin, Chief

Gentlemen:

SUBJECT: NRC INSPECTION

This refers to the routine safety inspection conducted by Messrs. Paul R. Zurakowski and R. D. Thomas of this office on February 3, 1988 of activities authorized by NRC License No. 02-19920-01 and to the discussion of our findings held by Messrs. P. R. Zurakowski and R. D. Thomas with Dr. George Cattnach and other members of your staff at the conclusion of the inspection.

The inspection was an examination of the activities conducted under your license as they relate to radiation safety and to compliance with the Commission's rules and regulations and the conditions of your license. The inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspector.

Based on the results of this inspection, it appears that certain of your activities were not conducted in full compliance with NRC requirements, as set forth in the Notice of Violation enclosed as Appendix A to this letter. These items have been categorized into severity levels as described in the NRC Enforcement Policy, 10 CFR Part 2, Appendix C.

In addition to the need for corrective action regarding the specific violations included in Appendix A, we are concerned about the effectiveness of your management control system that permitted the violations to occur. Six violations of regulatory requirements were identified which indicate a need for the improvement of your management control and administration of the overall radiation safety program in preventing future violations. Consequently, in your reply you should describe in particular those actions taken or planned to improve the effectiveness of your overall management control system.

Your response to this notice is to be submitted in accordance with the provisions of 10 CFR 2.201 as stated in Appendix A, Notice of Violation.
