Docket No. 030-10541

Wheeling-Pittsburgh Steel Company
ATTN: Mr. T. H. Blackma
Environmental Control Specialist
12th Street and Schoolmaker Avenue
Monessen, Pennsylvania 15222

Gentlemen:

Subject: Inspection 030-10541/78-01

This refers to the inspection conducted by Ms. M. Campbell of this office on October 13, 1978, of activities authorized by NRC License No. 37-16179-01 and to the discussions of our findings held by Ms. Campbell with yourself at the conclusion of the inspection.

The area examined during this inspection was limited to a discussion of your future plans for use of cesium-137 sources in interlock systems. From this discussion, it is our understanding that this interlock system was never purchased and that you do not anticipate the possession of licensed material under the authorization of this license.

Within the scope of this inspection, no items of noncompliance were observed.

In accordance with Section 2.790 of the NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations, a copy of this letter will be placed in the Public Document Room.

No reply to this letter is required; however, should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

Robert O. McClintock, Chief
Materials Radiological Protection
Section
