

January 17, 1984

*Ledall  
Comm. Ed*

Note to Henry Myers

Enclosed are the following inspection reports relating to Byron, which you requested:

- 78-07
- 79-18
- 80-05
- 80-24
- 80-25
- 81-09

I still have to get you 80-04 and 82-05, which I will send on later.

I spoke with Region III. There was no NRC order to CE requiring the reinspection program. They are going to get back to me with the cites for the correspondence, etc., in which the basic requirements for the reinspections were set forth. Also Region III received on Friday a report from CE providing the results of their reinspection effort (except for a few loose ends). We will get you a copy.

They are doing another printing of the ASLB decision. We are getting additional copies, which should be available sometime tomorrow. Right now we are down to our last copy.

Steve Kent
