Dear Mr. Franklin:

Enclosed are the plans of our Nuclear Medicine Lab as requested. This describes the lay-out of the laboratory and other facilities. The description of the facilities should be self explanatory.

We respectfully request a change of address as outlined in our previous communication to you dated January 30, 1987. Our new address is as above.

We are in the process of finalizing plans for handling I-131 for therapy at this time. Hopefully, in the near future, we will be implementing I-125 for diagnostic purposes relating to Tyroxin, Cortisol by RIA, etc. We do not have a target date as yet for this procedure. In addition, we have not started doing scans at this time and we are uncertain as to the target date for this.

Sincerely,

8801260299 870623
