Gentlemen:

This refers to the inspection conducted by Mr. B. L. Bartlett of this office during the period January 4 through February 14, 1988, of activities authorized by NRC Operating License NPF-42 for the Wolf Creek Generating Station, and to the discussion of our findings with Mr. G. D. Boyer and other members of your staff at the conclusion of the inspection.

Areas examined during the inspection included onsite event followup, engineered safety features system walkdown, operational safety verification, monthly maintenance observation, monthly surveillance observation, Part 21 followup, allegation followup, physical security verification, and radiological protection. Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations by the NRC inspector. The inspection findings are documented in the enclosed inspection report.

During this inspection, it was found that certain of your activities were in violation of NRC requirements. Consequently, you are required to respond to this violation, in writing, in accordance with the provisions of Section 2.201 of the NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations. Your response should be based on the specifics contained in the Notice of Violation enclosed with this letter.

The response directed by this letter and the accompanying Notice is not subject to the clearance procedures of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, PL 96-511.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

Original Signed By

L. J. Callan, Director
Division of Reactor Projects
