

JAN 6 1987

PDR

NOTE TO: John Longenecker, DOE

FROM: R. Neal Moore, Sr. Licensing Officer  
Export/Import and International Safeguards  
Office of International Programs

NRC regulations 10 CFR 110 were revised on December 31, 1986 (51 FR 47207) to delete the general license with respect to the import of uranium of South African origin. A specific license for the import of South African origin uranium must be requested and obtained.

Four import license requests have been received as of January 6 for the import of South African origin uranium.

Because of the continuing interest generated by Public Law 99-440, the Comprehensive Anti-Apartheid Act of 1986, these four import applications are forwarded for your information.

For further information contact: R. Neal Moore, Office of International Programs, U.S. NRC, (301-492-7984).
