DOCKET NO.: 50-29

DATE: MAR 5 1976

LICENSEE: Yankee Atomic Electric Company (YAEC)

FACILITY: Yankee Nuclear Power Station (Yankee-Rowe)

SUMMARY OF MEETING HELD ON FEBRUARY 24 CONCERNING DEVELOPMENT OF
REVISED YANKEE-ROWE TECH SPECS

On February 24, 1976, we met in Bethesda with representatives of YAEC. The purpose of this meeting was to establish the guidelines and a schedule for the revision of the Yankee-Rowe Tech Specs and to review YAEC comments on the first parts of a W-STS package which had been adapted by NRC staff to the Yankee-Rowe design.

The understanding on guidelines reached in previous telephone conversations was restated and agreed upon as outlined below:

- a. W-STS format will be adapted for Yankee-Rowe;
- b. All applicable current NRC Tech Spec requirements which would not involve changes to plant features will be considered for inclusion; and
- c. Efforts to incorporate on-going Tech Spec requirements, such as SG tube surveillance, hydraulic snubbers, etc., into these tech specs will be made, but will not be permitted to holdup the schedule.

NRC staff proposed a schedule for the revision of Yankee-Rowe Tech Specs by May 20, 1976, which YAEC agreed to in principle and expects to affirm within 2-3 days.

NRC staff and YAEC reviewed YAEC comments on W-STS Sections 1.0, 2.0, 3/4.0 and 3/4.1 adapted for Yankee-Rowe design. NRC staff committed to incorporating all agreements and questions into a typed smooth copy of these sections within one week.
