Seabrook Station  
Inservice Testing Reference

North Atlantic Energy Service Corporation (North Atlantic) has enclosed the latest revision (06) to the Seabrook Station Inservice Testing Reference (SITR) manual. The SITR is submitted for information only to update the NRC's reference documentation regarding the Seabrook Station inservice testing program for pumps and valves. NUREG-1482, *Guidelines for Inservice Testing at Nuclear Power Plants*, recommends that the NRC be provided with an updated copy of the IST program document on a periodic basis.

Should you have any questions regarding this response, please contact Mr. Terry L. Harpster, Director of Licensing Services, at (603) 773-7765.

Very truly yours,

NORTH ATLANTIC ENERGY SERVICE CORP.
