Docket Nos. 50-445  
and 50-446

Mr. William G. Council  
Executive Vice President  
Texas Utilities Electric Company  
400 North Olive Street, L.B. 81  
Dallas, Texas 75201

Dear Mr. Council:

SUBJECT: ISSUANCE OF SUPPLEMENT 14 TO NUREG-0797

The Office of Special Projects of the U. S. Nuclear Regulatory Commission has issued the enclosed Supplement 14 to the Safety Evaluation Report related to the operation of the Comanche Peak Steam Electric Station, Units 1 and 2 (NUREG-0797). This Supplement presents the safety evaluation on matters related to the corrective action program associated with the design of large and small bore piping and pipe supports as summarized in the two Project Status Reports for these scopes of work. The NRC staff concludes that the corrective action efforts establish an acceptable program for resolving the technical concerns associated with the design of large and small bore piping and pipe supports and their implementation should ensure compliance with the applicable requirements of 10 CFR Part 50.

You should note that, in some cases, the staff has accepted with certain qualifications the design criteria and methodologies. These qualifications are described in Section 4.1.2.2 (related to use of later Code editions and addenda) and in Sections 12.1, 18.2, and 25.3 of Appendix A of the enclosed safety evaluation report.

Should you have any questions or comments regarding this Supplement, please contact either of our project managers, Melinda Malloy at (301)492-0738 or Annette Vietti-Cook at (301) 492-0737.

Sincerely,

Christopher I. Grimes, Director  
Comanche Peak Project Division  
Office of Special Projects

Enclosure: Supplement 14 to NUREG-0797
