

DOCKET NUMBER 72-10, 32, 70, 130
PROPOSED TITLE (43 FR 70374)
SMELTED ALLOYS

002735

7 Dec 1980

Dear Commissioners,

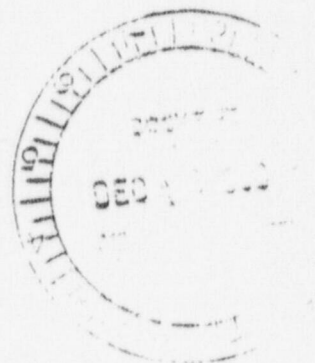

I urge you to oppose any bill, amendment, or proposal that would introduce more radiation into the homes and immediate environments of human and other beings.

Radiation is harmful to presently existing life forms. All levels of radiation can be harmful in time. ~~Low~~ levels are harmful. Please protect us from myopic people who ~~only~~ seem unable to see beyond their own biased accounts.

Nuclear waste disposal is a Big problem; distributing directly into the homes of the people does not increase our safety from radiation exposure.

Please oppose the amendment that would permit uranium emitting low level radiation to be sold to product manufacturers.
