Executive Vice President

U. S. Nuclear Regulatory Commission  
Attn: Document Control Desk  
Washington, D. C. 20555

SUBJECT: COMANCHE PEAK STEAM ELECTRIC STATION (CPSES)  
DOCKET NOS. 50-445 AND 50-446  
INSPECTION REPORT NOS. 50-445/85-13 AND 50-446/85-09  
REVISED DATE OF FULL COMPLIANCE FOR  
NOTICE OF VIOLATION, ITEM D

REF: TU Electric letter TXX-6424 from W. G. Council to the  
USNRC dated May 6, 1987

Gentlemen:

The referenced letter provided our revised response to Notice of Violation, Item D (445/8513-V-01). In that response we stated that electrical sleeve identification field verification activities for Unit 2 were scheduled for completion by January 31, 1988, with final design verification by March 31, 1988. To more efficiently utilize the resources available to CPSES, it has been necessary to reschedule completion of these activities. Accordingly, our date for completion of both activities for Unit 2 (field verification followed by design verification) is hereby revised to be no later than Unit 2 fuel load.

Very truly yours,

*W. G. Council*
