

Westphalia, Kansas.

February 12, 1981.

The Atomic Safety and Licensing Board.

I have requested to intervene in regards to Licensing the Wolf Creek plant. You have stated that I was too late in my request. Now my dear people you have not put out any notice or date in regards to this intervention in my county Anderson. So please extend the dead line and notify everybody in the county about this serious matter. Your prestige as NRC people is at an all time low since Three Mile Island in Kansas. So as I see it and I happen to know a lot about how people feel especial in this part of Kansas. In order to redeme some of your faith it would seem advisable to corpor to with the people on this matter.

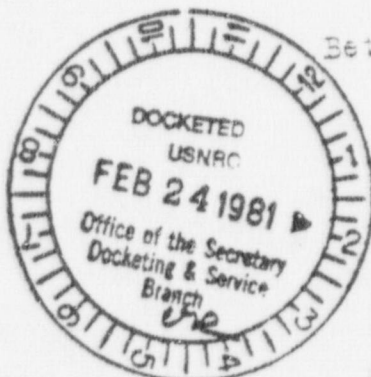

My self I wish to intervene in regards to the various elements which could escape in to the atmosphere from the operation of Wolf Creek I live with in ten miles of the plant along with a thousand other people and there for am concerned.

I have received your Letter No. STM 50-482. This is how I found out that I was too late to testify.

I'll be my own lawyer as I can not afford one.

Yours Truly, Francis Blaufuss.

Westphalia, Kansas. 66093.

Better active today than ~~passive~~ tomorrow.
