from R. Muench, WCNOG, to NRC  
Subject: Docket No. 50-482: Supplemental Response to Generic Letter  
96-06, "Assurance of Equipment Operability and Containment  
Integrity During Design-Basis Accident Conditions"

Gentlemen:

Reference 1 involves Nuclear Regulatory Commission (NRC) concerns with equipment operability and containment integrity during design-basis accident conditions. Reference 1 requested Licensees to provide two responses; one within 30 days, and another within 120 days, of the date of the reference. Reference 2 provided the requested 30-day response for the Wolf Creek Nuclear Operating Corporation (WCNOG). Reference 3 provided the requested 120-day response for WCNOG. The purpose of this letter is to revise the schedule for completion of the corrective actions discussed in Reference 3. A meeting was held between WCNOG and NRC personnel on June 25, 1997. In that meeting, WCNOG committed to complete all evaluations and any necessary plant modifications, as discussed in Reference 3, prior to startup from our tenth refueling outage. The Wolf Creek Generating Station's tenth refueling outage is scheduled for the Spring of 1999.

If you have any questions concerning this response, please contact me at (316) 364-8831, extension 4034, or Mr. Richard D. Flannigan at extension 4500.

Very truly yours,

Richard A. Muench
