Re: Docket Nos. 50-277
50-278

Mr. Darrell G. Eisenhut, Director
Division of Licensing
US Nuclear Regulatory Commission
Washington, DC 20555

SUBJECT: Peach Bottom Plans for Implementing Items
I.A.1.3 and III.A.2 of NUREG 0737,
"Clarification of TMI Action Plan Requirements"

Dear Mr. Eisenhut:

This letter revises our schedule for submitting a plan to the NRC for the implementation of Sections I.A.1.3 and III.A.2 of NUREG 0737. Section I.A.1.3 includes a requirement for limiting overtime for plant staff personnel performing safety-related functions. Section III.A.2 requires a program for calculating off-site radiological conditions during an emergency in accordance with Appendix 2 to NUREG 0654. In correspondence, S. L. Daltroff to D. G. Eisenhut, NRC, dated December 22, 1980, Philadelphia Electric Company requested additional time to complete a review and submit a plan for the implementation of these NUREG 0737 requirements. In response to a request from the Peach Bottom NRC Project Manager, we are revising the commitment in the December 22, 1980 letter for submitting our plans on Sections I.A.1.3 and III.A.2 from April 1, 1981 to on or before March 31, 1981.

Should you have any questions regarding this matter, please do not hesitate to contact us.

Very truly yours,

A046
