William G. Council
Executive Vice President

U. S. Nuclear Regulatory Commission
Attn: Document Control Desk
Washington, D. C. 20555

SUBJECT: COMANCHE PEAK STEAM ELECTRIC STATION (CPSES)
DOCKET NOS. 50-445 AND 50-446
ENFORCEMENT ACTION (EA) 86-09,
APPENDIX B, ITEM I.B.2

- REF: 1) TU Electric Letter TXX-4946 from W. G. Council to J. M. Taylor, dated August 4, 1986
2) TU Electric Letter TXX-6439 from W. G. Council to the NRC dated May 6, 1987
3) TU Electric Letter TXX-6899 from W. G. Council to the NRC dated October 30, 1987

Gentlemen:

Reference (3) provided our revised response to EA 86-09, Appendix B, Item I.B.2. In that response we stated that a review was being conducted to assure that any handwritten comments contained in safety related vendor drawings in our active files were properly dispositioned. We also stated that this review would be completed by January 31, 1988.

The identification of safety related active drawings with handwritten comments is nearing completion. The resolution of the resulting Deficiency Reports requires vendor interface and problem reconciliation by our lead contractors. Accordingly, our date when full compliance will be achieved for EA 86-09, Appendix B, Item I.B.2 is hereby revised to be no later than September 1, 1988.

Very truly yours,

W. G. Council

W. G. Council
