

Callaway Plant

October 28, 1987

Mr. W. G. Snell  
Chief, Emergency Preparedness Section  
U. S. Nuclear Regulatory Commission  
Region III  
799 Roosevelt Road  
Glen Ellyn, IL 60137

ULNRC-1662

Dear Mr. Snell:

Over the past few months, we have been discussing arrangements and objectives for the 1988 Callaway Plant Radiological Emergency Response Exercise with the Missouri State Emergency Management Agency (SEMA) and with Montgomery, Osage, Gasconade, and Callaway Counties. As a result of these discussions, the 1988 Exercise has been scheduled for Monday, June 6, 1988. This Exercise will be an off-hours exercise and will begin at the plant at 6:00 p.m.

We had previously discussed this date with you, and SEMA has discussed the date with the Federal Emergency Management Agency Region VII. It is our understanding that this date is acceptable to both of you.

Please revise your schedule to reflect the date of Monday, June 6, 1988, for the 1988 Callaway Plant Exercise.

M. A. Stiller  
Manager, Nuclear Safety and  
Emergency Preparedness
