

NEGATIVE DECLARATION
SUPPORTING AMENDMENT OF CONSTRUCTION PERMITS
COMANCHE PEAK STEAM ELECTRIC STATION, UNIT NOS. 1 AND 2
(CPPR-126 AND CPPR-127)
TEXAS UTILITIES GENERATING COMPANY ET AL.
DOCKET NOS. 50-445 AND 50-446

The staff of the U. S. Nuclear Regulatory Commission (the Commission) has reviewed the proposed amendment relating to the construction permits for the Comanche Peak Steam Electric Station, Units No. 1 and 2 (CPPR-126 and CPPR-127) located in Somervell County, Texas, issued to Texas Utilities Generating Company, et al. The amendment would authorize a modification of Condition 3.E.(7) to remove the requirement that a chlorine minimization study be performed and the results be submitted to the Commission prior to docketing of the Environmental Report, Operating License Stage.

The Commission's Division of Site Safety and Environmental Analysis has prepared an environmental impact appraisal for the amendment and has concluded that an environmental impact statement for this particular action is not warranted. This conclusion is based on the fact that there will be no significant environmental impacts attributable to the proposed action.

The environmental appraisal is available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D. C. A copy may be obtained upon request addressed to the U. S. Nuclear Regulatory Commission, Washington, D. C. 20555, Attention: Director, Division of Site Safety and Environmental Analysis.
