Gentlemen:

Subject: Operational Quality Assurance Plan Revision 10
Supplement 1
Three Mile Island Nuclear Generating Station, Unit 1 (TMI 1)
Docket 50-289
Oyster Creek Nuclear Generating Station (OCNGS)
Docket 50-219

By letter dated April 25, 1997, GPUN Nuclear submitted Revision 10 of the Operational Quality Assurance (OQA) Plan to the NRC for review and approval. In its review, the staff expressed a concern that the methodology of resolving certain types of disputes, should they arise, was not explicit enough. Therefore, the staff requested that additional information be introduced to Revision 10 of the OQA Plan.

In a July 8, 1997 conference call between the NRC staff and GPU Nuclear Licensing personnel, it was agreed that three paragraphs would be added to the prior submittal. In addition, one minor typographical error has been corrected. The affected pages are attached.

Very truly yours,

A. H. Rone
