Subject: Duke Power Company
McGuire Nuclear Station
Docket Nos. 50-369, -370

Gentlemen:

During the AEOD inspection conducted at McGuire Nuclear Station during December 1987 and January 1988 NRC inspectors noted that a Safety Evaluation Report had not been issued on McGuire's Procedure Generation Package. The inspectors further advised that the NRC's review of this portion of McGuire's response to Supplement 1 to NUREG-0737 was currently in progress.

Because of planned revisions to the McGuire Emergency Procedures Writer's Guide, a component of the Procedure Generation Package, the NRC inspectors felt it would be appropriate to suspend the review process until the revised Writer's Guide is submitted. Duke Power concurs with this proposal; therefore, the purpose of this letter is to advise the appropriate NRC personnel that Duke Power will submit a revised Emergency Procedures Writer's Guide for McGuire Nuclear Station by July 1, 1988.

Very truly yours,

Hal B. Tucker
