Docket Nos.: STN 50-546
STN 50-547

Marble Hill Nuclear Generating Station
Units 1 & 2
Archeological Mitigation Plan

Dear Mr. Denton:

With reference to the telecopied letter from Mr. Ballard, which we received on November 1, 1978 concerning the archeological mitigation plan, Public Service Company of Indiana, Inc. agrees that at least 5% of the Site JE 119/120 will be surveyed. In addition the artifacts recovered in the salvage of the site will be the property of the U.S. Government and will be curated by the Glenn A. Black Laboratory of Archeology.

Sincerely,

James Coughlin
Vice President-Nuclear

Enclosure 3C

NOV 8 1978

Docket Nos. STN 50-046
and STN 50-047

Mr. Joseph D. Cloud
Director
Department of Natural Resources
State Office Building
Indianapolis, Indiana 46204

Dear Mr. Cloud:

The enclosed letter, dated October 18, 1978, from Ms. Myra Harrison of the Advisory Council for Historic Preservation to Mr. Ronald Ballard of the U. S. Nuclear Regulatory Commission (NRC) indicates approval of the mitigation plan to recover the archeological resources of Site 12 Je 119/120, subject to the concurrence of the NRC as lead agency and of the Indiana State Historic Preservation Officer (SHPO) with the additional conditions listed in this letter.

It is the NRC's understanding that the Indiana SHPO approves the plan with the condition that at least 5% of the Site 12 Je 119/120 will be surveyed. It is our further understanding that the artifacts recovered in the salvage of the site will be the property of the U. S. Government and will be curated by the Glenn A. Black Laboratory of Archeology in accordance with the standards set forth in proposed regulations 36 CFR Part 66.

We have recently learned that Public Service company of Indiana plans to contract with Soil Systems, Inc., of Bloomington, Indiana to carry out the mitigation plan, as conditioned in the October 18, 1978 letter. The NRC concurs in this arrangement provided that you, as State Historic Preservation Officer, certify that Soil Systems, Inc., is qualified to perform this additional archeological surveying. Your prompt attention to this matter would be appreciated since Public Service Company of Indiana is anxious to complete the archeological work at the Marble Hill site as soon as possible.

Sincerely,

RSI

Ronald L. Ballard, Chief
Environmental Projects Branch 1
Division of Site Safety
and Environmental Analysis

September 6, 1978

Mr. Harold R. Denton, Director
Office of Nuclear Reactor Regulation
U.S. Regulatory Commission
Washington, D. C. 20555

Docket Nos. STN 50-546
STN 50-547

Dear Mr. Denton:

Marble Hill Nuclear Generating Station
Units 1 & 2

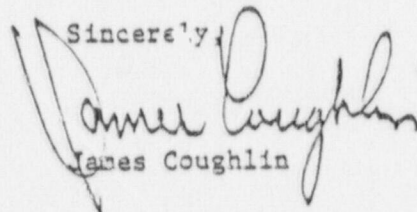

Section 4.5.2 of the Final Environmental Statement for the Marble Hill Nuclear Generating Station Units 1 & 2 requested that PSI submit plans for staff review and approval concerning the disposal of dredging spoil from the construction of the intake and discharge structures. The activities discussed below fulfill this requirement.

A total of approximately 675 cubic yards of dredging spoil material from the river pumphouse and the blowdown structure excavation will be disposed in designated spoils areas (see attached map) on the bluff above the river where the main plant facilities are located; no dredge spoil material will be disposed of on the flood plain. The soil material will be compacted, graded and seeded in accordance with Indiana State Highway specifications. Liming, fertilizing and watering will be performed as required to produce stands of grass.

No adverse environmental impact is anticipated from the disposal of dredge spoils. Disposal of the spoil material off the flood plain precludes reintroduction of the spoil into the river during flood periods, and proper compaction, grading and seeding of the spoil material will allow stabilization and prevent soil erosion.

Construction of the intake structure is scheduled to commence in October, 1978. Therefore prompt approval of the above disposal plans is requested.

Sincerely,

James Coughlin

Enclosure 4b

OCT 3 1978

DoDocket Nos. STN 50-546
and STN 50-547

Public Service Company of Indiana, Inc.
ATTN: Dr. James Coughlin
Vice President - Nuclear
1000 E. Main Street
Plainfield, Indiana 46168

Gentlemen:

Section 4.5.2 of the Final Environmental Statement for the Marble Hill Nuclear Generating Station required that the Public Service Company of Indiana submit plans for staff review and approval concerning the disposal of dredging spoil from the construction of the intake and discharge structures. Your letter of September 6, 1978 fulfilled this requirement.

The NRC has reviewed the proposed disposal method and has determined that its environmental consequences are acceptable.

Sincerely,

RSI
