Docket No. 50/395  
Operating License No. NPF-12  
Emergency Planning  
Exercise Scenario Package

Dear Dr. Decker:

Please find attached one copy of the completed scenario package for the Radiological Emergency Exercise to be held on March 16, 1988, at the Virgil C. Summer Nuclear Station. This scenario encompasses the scope and objectives outlined in the December 29, 1987 letter from Mr. D. A. Nauman of South Carolina Electric & Gas Company (SCE&G) to Mr. J. Phillip Stohr of the NRC with two exceptions. Objective 8, "To test the Station on-site fire protection capabilities...." has been deleted from this exercise. This objective could not be reasonably accomplished within the enclosed scenario; however, a test of the fire protection capabilities will be completed sometime during this year. Objective 14, "To test the operability of the Early Warning Siren System," has been deleted for the following reasons: 1) This drill will be held in the evening hours, and sounding the sirens at this time is considered an unnecessary inconvenience to the public. 2) The state and counties are not participating in this drill. 3) A satisfactory test of the sirens was conducted in December 1987; and 4) An additional siren test will be performed at a later date this year.

If you should have any questions or need any additional information, please advise.

Very truly yours,

D. A. Nauman
