MEMORANDUM TO: Claudia Seelig, Chief
Program Analysis Branch
Program Management, Policy Development
and Analysis Staff

FROM: Michael F. Weber, Chief Original signed by:
Licensing Branch
Division of Fuel Cycle Safety
and Safeguards

SUBJECT: COMBUSTION ENGINEERING, DOCKET 70-36, SNM-33

I am responding to the request in a June 26, 1997, memorandum from Diane B. Dandois to Claudia Seelig for a review for the appropriateness of the charges under Invoice Nos. FL0364-97 and FL0295-97 (for Amendment No. 16.)

We have reexamined the staff hours that we had reported for the Amendment 16 (TAC No. L30916) and conclude that the charges under the two invoices listed above are correct. The Fuel Cycle Licensing Branch staff has reported a total of 76 hours of review time for Amendment 16, including 65 hours of technical review and 11 hours of project management. This review was more complicated than the two prior reviews because it required coordination with NRC inspection staff.

Any questions should be referred to Sean Soong, NRC's project manager for Combustion Engineering-Hematite, at (301) 415-8155.
